OKLAHOMA.

Table 1 shows the manufacturing and mechanical industries of the territory of Oklahoma as returned at the censuses of 1890 (the first census at which separate totals were published) and 1900, with the percentages of increase for the decade.

TABLE 1.—COMPARATIVE SUMMARY, 1890 AND 1900, WITH PER CENT OF INCREASE FOR THE DECADE.

	DATE OF CENSUS.		Per cent of increase, 1890 to 1900.
	1900	1890	
Number of establishments	870	72	1,108.3
Capital	$3,352,064	$95,519	3,409.3
Salaried officials, clerks, etc., number	202	[1]48	320.8
Salaries	$159,554	[1]$19,592	714.4
Wage-earners, average number	2,054	147	1,297.3
Total wages	$807,826	$52,326	1,443.8
Men, 16 years and over	1,876	133	1,310.5
Wages	$775,707	$50,660	1,431.2
Women, 16 years and over	140	3	4,566.7
Wages	$27,180	$620	4,283.9
Children, under 16 years	38	11	245.5
Wages	$4,939	$1,046	372.2
Miscellaneous expenses	$246,081	$21,970	1,020.1
Cost of materials used	$4,449,944	$56,518	7,773.5
Value of products, including custom work and repairing	$7,083,938	$180,445	3,825.8

[1] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 6.)

There has been a remarkable increase in the manufacturing and mechanical industries of this territory since 1890, an increase even more striking than the increase in population (518.2 per cent), exceeding that of any other state or territory. The number of establishments has increased over elevenfold, and the value of products over thirty-eightfold. Compared with older localities, however, the amount of manufacturing carried on in the territory is still insignificant. Oklahoma is essentially an agricultural and stock-raising territory, and the industries most developed are those which are common to rural as well as urban localities. A notable product is the manufacture of cottonseed oil, which has grown up in connection with the rapid development of the cotton crop of the territory.

Table 2 divides the industries of the territory between the hand trades and the manufactures proper. This table also gives the statistics for governmental establishments, an institution, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS.		Miscellaneous expenses.	COST OF MATERIALS USED.				Value of products, including custom work and repairing.
				Average number.	Total wages.		Total.	Purchased in raw state.	Purchased in partially manufactured form.	Fuel, freight, etc.	
Total	1,161	$3,477,489	1,322	2,160	$814,173	$250,857	$4,477,279	$3,142,204	$1,120,756	$214,319	$7,160,210

[1] Embraces bicycle and tricycle repairing, 8; blacksmithing and wheelwrighting, 160; boots and shoes, custom work and repairing, 15; carpentering, 34; clothing, men's, custom work and repairing, 20; clothing, women's, dressmaking, 6; dyeing and cleaning, 2; furniture, cabinetmaking, repairing, and upholstering, 4; lock and gun smithing, 3; masonry, brick and stone, 3; millinery, custom work, 39; painting, house, sign, etc., 12; plumbing, and gas and steam fitting, 4; sewing machine repairing, 1; watch, clock, and jewelry repairing, 25.

Of the 1,161 establishments of all classes, shown in Table 2, 624, or 53.7 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $1,023,903, or only 14.3 per cent of the total products of the territory.

In addition to the 1,161 active establishments in the territory during the census year, with a capital of $3,477,489, shown in this table, there were 5 idle establishments with a capital of $13,720.

Table 3 presents the totals for the manufacturing industries in Guthrie and Oklahoma City, and places them in comparison with the totals for the entire territory, and the territory exclusive of these cities.

TABLE 3.—URBAN MANUFACTURES.

	Number of establishments.	Capital.	Proprietors and firm members.	Wage-earners. Average number.	Wage-earners. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.
Total for territory	870	$3,352,064	999	2,054	$807,826	$246,081	$4,449,944	$7,083,938
Total for urban manufactures	186	1,015,279	203	804	343,846	71,484	1,166,425	2,079,361
Guthrie	85	415,240	96	346	139,077	36,706	430,869	837,374
Oklahoma City	101	600,039	107	458	204,769	34,778	735,556	1,241,987
Total for territory exclusive of urban manufactures	684	2,336,785	796	1,250	463,980	174,597	3,283,519	5,004,577
Per cent of urban manufactures to total for territory	21.4	30.3	20.3	39.1	42.6	29.0	26.2	29.4

Of the 870 establishments in the territory, 186, or 21.4 per cent, were located in these 2 cities. The capital reported for these establishments is $1,015,279, or 30.3 per cent of that for the entire territory. They furnished employment to 804 wage-earners, or 39.1 per cent of the total number; paid $343,846 in wages, or 42.6 per cent of the total amount; and the value of their products, $2,079,361, formed 29.4 per cent of the total for the territory.

Table 4 shows the totals for all industries in the cities withdrawn from the enumerators.

Table 5 shows the totals for the territory by counties.

Table 6 shows the totals for the territory by specified industries.

TABLE 4.—MANUFACTURES IN CITIES UNDER 20,000 IN POPULATION: 1900.

Cities.	Number of establishments.	Capital. Total.	Capital. Land.	Capital. Buildings.	Capital. Machinery, tools, and implements.	Capital. Cash and sundries.	Proprietors and firm members. OREGON.

Table 1 shows the manufacturing and mechanical industries of the state of Oregon as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

Per cent of assessed value	8.7	11.6									

[1] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 7.)
[2] Not reported separately.
[3] Decrease.
[4] Not reported.
[5] Exclusive of 3,772 Indians and other persons on Indian reservations, which classes were not included at previous censuses.
[6] As given for the year 1900 in Dana's supplement, "State and City," to the Commercial and Financial Chronicle, under date of April 13, 1901.
[7] Does not include value of rented property.

Although agriculture is the most important industry of Oregon, the development of manufacturing and mechanical industries during the half century from 1850 to 1900, as indicated in Table 1, has been very marked. The increase in the value of the products was greatest during the decade from 1880 to 1890, amounting to 279 per cent, while during the decade from 1890 to 1900, the increase was but 11 per cent, the smallest per cent of increase during any decade since 1850. The average number of wage-earners engaged in manufactures constituted 4.2 per cent of the population of the state in 1900, as compared with 2.1 per cent in 1850.

The natural resources of the state are extensive, furnishing material for its various manufacturing enterprises, while it has three good harbors for the marketing of manufactured goods. The streams of the state furnish abundant power at The Dalles, the Cascades, and Oregon City, while the mines are producing a continually increasing supply of coal for fuel.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for penal institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS.		Miscellaneous expenses.	COST OF MATERIALS USED.				Value of products, including custom work and repairing.
				Average number.	Total wages.		Total.	Purchased in raw state.	Purchased in partially manufactured form.	Fuel, freight, etc.	
Total	3,581	$33,724,348	4,138	17,508	$8,368,593	$2,261,693	$26,222,109	$9,328,547	$15,717,259	$1,176,303	$46,239,570
Hand trades[1]	1,250	1,867,385	1,483	2,985	1,508,254	404,848	2,809,865	25,294	2,668,106	116,465	6,417,260
Penal institutions	4	54,705	--------	179	28,213	3,193	65,468	224	57,027	8,217	107,370
Establishments with a product of less than $500	489	247,250	539	93	6,947	15,705	48,328	3,911	43,312	1,105	131,613
All other establishments	1,838	31,555,008	2,116	14,251	6,825,179	1,837,947	23,298,448	9,299,118	12,948,814	1,050,516	39,583,327

[1] Includes bicycle and tricycle repairing, 52; blacksmithing and wheelwrighting, 343; boots and shoes, custom work and repairing, 111; carpentering, 122; clothing, men's, custom work and repairing, 105; clothing, women's, dressmaking, 71; dyeing and cleaning, 14; furniture, cabinetmaking, repairing, and upholstering, 45; lock and gun smithing, 25; masonry, brick and stone, 24; millinery, custom work, 79; painting, house, sign, etc., 79; paper hanging, 6; plastering and stuccowork, 11; plumbing, and gas and steam fitting, 60; sewing machine repairing, 2; typewriter repairing, 3; watch, clock, and jewelry repairing, 98.

In addition to the 3,581 active establishments in the state during the census year, with a capital of $33,724,348, shown in Table 2, there were 43 idle establishments with a capital of $1,050,193. Of the 3,581 establishments of all classes, 1,739, or 48.6 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments consisted principally of the sums received for custom work and repairing, and amounted to $6,548,873, or 14.2 per cent of the total products of the state.

Comparative statistics for the 8 leading industries in Oregon are presented in Table 3.

TABLE 3.—COMPARATIVE SUMMARY OF EIGHT LEADING INDUSTRIES.

INDUSTRIES.	Year.	Number of establishments.	Capital.	WAGE-EARNERS.		Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.

	1890	6	1,350,585	858	142,538	86,906	327,502	614,932

[1] Decrease.

As indicated in Table 3, the manufacture of lumber and timber products is the principal industry in the state. In 1900 there were 4,084 wage-earners employed in this industry, and the products were valued at $10,352,167, as compared with 4,214 wage-earners and products valued at $6,530,757 in 1890. There were 734,538,000 feet (board measure) of lumber, inclusive of custom sawing, sawed in 1900, as compared with 462,620,000 feet in 1890. The importance of this industry is due to the remarkable forest lands of the state, over 4,500,000 acres of which have been recently set off by the United States Government as a forest reserve.[1]

In 1900 reports were received from 17 ship and boat builders, including one builder of iron and steel vessels. Figures for the latter can not be shown without disclosing the operations of an individual establishment. The 16 establishments constructing wooden ships and boats reported 338 wage-earners and products valued at $654,385, as compared with 14 establishments, 199 wage-earners, and products valued at $320,715 in the same industry in 1890.

Flour milling stands second among the manufacturing industries of Oregon, and reflects the large wheat-growing interests of the state, the production of this cereal amounting to 16,198,012 bushels in 1900.[2] The flour-milling industry gave employment to 443 wage-earners in 1900, and had a product valued at $6,364,023, as compared with 281 wage-earners in 1890 and products valued at $4,184,473.

The canning of fish ranks next among the industries of the state, with products valued at $1,788,809 in 1900, as compared with $1,643,324 in 1890. This industry, which is almost entirely the canning of salmon caught in the waters of the Columbia River and its tributaries, has its center in the city of Astoria, and is carried on almost exclusively by the Chinese.[3] The industry dates back to 1866, and reached its maximum production in 1883.[4] It is carried on also on the north side of the Columbia River, in the state of Washington, the value of the product of this latter state in 1890 being nearly a third of that of Oregon. The Columbia River has long been famous for its salmon, the product for the year 1895 "exceeding in value that of any other river in the United States or the world."[5] The exhaustion of these fisheries, threatened in the early years of the decade, has been averted by more rigid laws against improvident fishing, and by the artificial propagation of fish.[6] The value of the fish taken in the two states of Oregon and Washington in 1899 amounted to $3,747,788, and 15,554 persons were employed in the industry.[7] During the last decade several refrigerating and freezing plants have been erected, and these, together with the use of refrigerator cars, have made possible the shipment of hundreds of tons of fresh fish annually from Portland to the East and to European cities[8]—a fact which has tended to check the increase in the canned product during recent years.

In 1900 the woolen manufacture gave employment to 672 wage-earners, and had products valued at $897,824, as compared with 358 wage-earners and products valued at $614,932 in 1890. In the number of sheep owned in 1899, Oregon ranked sixth in the country, over 2,000,000 having been reported for that year.

In addition to the industries included in Table 3, attention may be called to the manufacture of paper and wood pulp, the statistics for which appear in Table 7. Five establishments were reported in 1900, with 716 wage-earners and products valued at $1,305,696. Measured by the value of its product, this industry is more important than certain of the industries included in Table 3. These figures, however, can not be used for comparative purposes, because only 2 establishments were reported as engaged in this industry in 1890, and the figures were withheld in order to avoid disclosing the operations of individual establishments.

URBAN MANUFACTURES.

Table 4 shows the totals for the manufacturing and mechanical industries of the city of Portland, as returned at the censuses of 1890 and 1900, with the percentages of increase. The industries of Portland are separately presented in detail in Table 8.

TABLE 4.—COMPARATIVE SUMMARY, PORTLAND, 1890 AND 1900, WITH PER CENT OF INCREASE.

	DATE OF CENSUS.		Per cent of increase, 1890 to 1900.
	1900	1890	
Number of establishments	1,064	569	87.0
Capital	$13,331,500	$16,863,568	[1] 20.9
Wage-earners, average number	8,572	8,653	[1] 0.9
Total wages	$4,347,876	$6,220,337	[1] 30.1
Miscellaneous expenses	$1,186,072	$1,220,577	[1] 2.8
Cost of materials used	$13,312,036	$12,807,106	3.9
Value of products, including custom work and repairing	$23,451,132	$25,427,603	[1] 7.8

[1] Decrease.

It appears from Table 4 that the number of establishments in the city increased during the decade from 569 to 1,064, or 87 per cent; while the average number of wage-earners decreased from 8,653 to 8,572, or 0.9 per cent; and the value of products decreased from $25,427,603 to $23,451,132, or 7.8 per cent. The decrease in these particulars is to be attributed largely to the extraordinary activity in the building trades, and in the manufacturing industries incidental thereto, in 1890 as compared with

1900. The city of Portland is the principal seaport and railroad center of the state. It is the terminus of three transcontinental lines, and a distributing point for the products and supplies of Oregon, and, to some extent, of Washington, Idaho, and Montana. Manufacturers have, therefore, found it advantageous to locate in this vicinity, many establishments making use of the abundant water-power furnished by the falls of the Willamette, 12 miles above the city. There were 1,064 establishments in Portland in 1900, or 34.5 per cent of the entire number located within the state. These establishments had a combined capital amounting to $13,331,500, or 39.9 per cent of all the capital employed in the state. Of the wage earners, 8,572, or 49.7 per cent of all in the state, were employed in Portland. The total amount of wages paid in the city amounted to $4,347,876, or 52.2 per cent of all wages paid in the state. The value of products, including custom work and repairing, during 1900 was $23,451,132, or 51 per cent of the total product for the state.

Table 5 presents the totals for the manufacturing industries in Astoria, Baker City, La Grande, Oregon City, Portland, and Salem, and places them in comparison with the totals for the entire state, and the state exclusive of these cities.

TABLE 5.—URBAN MANUFACTURES.

	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS.		Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.
				Average number.	Total wages.			
Total for state	3,088	$33,422,398	3,598	17,236	$8,333,433	$2,242,795	$26,099,885	$46,000,587
Total for urban manufactures	1,413	20,954,790	1,576	11,356	5,633,063	1,684,862	17,114,671	30,353,620

Portland	1,064	13,331,500	1,181	8,572	4,347,876	1,186,072	13,312,036	23,451,132
Salem	88	651,478	106	374	148,696	53,556	427,495	808,538
Total for state exclusive of urban manufactures	1,675	12,467,603	2,022	5,880	2,700,370	557,933	8,985,214	15,646,967
Per cent of urban manufactures to total for state	45.8	62.7	43.8	65.9	67.6	75.1	65.6	66.0

The statistics in Table 5 emphasize the concentration of the manufacturing industries of the state in its cities. The urban manufactures constitute 45.8 per cent of the establishments in the state, 62.7 per cent of the capital, 65.9 per cent of the wage-earners, 67.6 per cent of the wages, and 66 per cent of the products.

Table 6 shows the totals for the state by counties.

Table 7 shows the totals for the state by specified industries.

Table 8 shows the totals for the city of Portland by specified industries.

Table 9 shows the totals for all industries in the cities withdrawn from the enumerators, exclusive of the city of Portland.

PENNSYLVANIA.

Table 1 shows the manufacturing and mechanical industries of the state of Pennsylvania as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

[1] Decrease.
[2] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 7.)
[3] Not reported separately.
[4] Not reported.
[5] Exclusive of 81 Indians and other persons on Indian reservations, which classes were not included at previous censuses.
[6] As given in the Annual Report of the Secretary of Internal Affairs, 1900.
[7] Does not include value of rented property.

Table 1 shows that there has been a large growth in the manufacturing and mechanical industries of Pennsylvania during the half century. The population during these years increased from 2,311,786 to 6,302,034, while the average number of wage-earners employed in manufacturing establishments increased from 146,766 to 733,834, embracing, in 1900, 11.6 per cent of the entire population, compared with 6.3 per cent in 1850. Probably the best indication of the importance of the wage-earning class is afforded by the greatest number employed at any one time during the year. In 1900 this was 928,522, or 14.7 per cent of the total population of the state. The greatest percentage of increase in the value of products, 145.4, is shown for the decade ending with 1870, but the greatest absolute increase, $586,976,456, was between the years 1880 and 1890. The absolute increase during the decade ending with the year 1900, $502,995,959, was greater than that shown for any other state of the United States.

In 1840 and in 1850 Pennsylvania ranked third in the United States in manufacturing and mechanical industries, but at all succeeding censuses its rank has been second. In the amount of power used in manufacturing—an index of the factory system proper—Pennsylvania has ranked first since 1870, using in that year 15.5 per cent of the total power used in the United States and 16.4 per cent in 1900.

Among the various causes which contributed to the early development of manufacturing in Pennsylvania, the favorable location of the state for marketing its manufactured products must be given a very important place. No other state touches the Atlantic seacoast, the Great Lake system, and the navigable waters of the Ohio-Mississippi Valley. Before the construction of railroads, when the densest population was along the Atlantic coast and in the valleys of the Mississippi and Ohio rivers, this location proved a great stimulus to manufacturing. Many of the manufacturers of Philadelphia and vicinity sold their products in the states immediately to the south, while the iron, steel, lumber, and leather industries of the western part of the state, as well as the woolen industry generally, were greatly stimulated by the market for their products afforded by the settlements along the Ohio and Mississippi rivers. The first steam vessel launched on these waters was built at Pittsburg, in 1811, and regular communication was shortly afterwards established between Pittsburg and the Southern states. Communication in the interior

of the state was improved between 1826 and 1839 by the construction of a network of canals and canalized rivers aggregating 578 miles in length—a greater mileage than that of any other state except New York and Ohio. After the building of railroads, many of these canals were abandoned, but the stimulus they gave to manufacturing is evidenced by the fact that of the 12 leading manufacturing cities in the state in 1900, 9 were touched by these canals, while 2 of the remaining 3 were located on the navigable waters of the Delaware and Allegheny rivers. In railroad mileage Pennsylvania ranked second in the United States in 1899, with 10,181 miles of road in operation.[1]

Few states have been so favored as Pennsylvania in natural resources. The raw materials for many kinds of manufactures are abundant, the state ranking high in the production of lumber, tanbark, tobacco, cereals, crude petroleum, and iron ore. It not only has fuel sufficient for its extensive manufactures, but ships an immense surplus each year to other states. The annual coal production of Pennsylvania between the years 1880 and 1899 was each year more than one-half of the total for the United States.[2] Natural gas has been used in the state for manufacturing purposes since 1874.[3] This fuel is without a rival for the manufacture of glass, the puddling of iron, the heating of large furnaces in the manufacture of steel, and the roasting of ores.[4] In 1899 it was used for manufacturing in Pennsylvania in 50 rolling mills and steel works, 75 glass works, and 1,111 other establishments. Although many of the gas fields prominent twelve years ago are now almost exhausted, and the value of the production in 1899 amounted to less than one-half that of 1888, the state still ranked second in production. Partly as a result of these abundant supplies of fuel, the use of waterpower has been relatively of less importance in Pennsylvania than in most other states, and has declined very much in recent years. In 1870 the waterpower was 141,982 horsepower, or 39 per cent of the total power, while in 1900 it had declined to 86,223 horsepower and represented but 4.6 per cent of the total. The use of waterpower was confined very largely to the manufacture of flouring and grist mill products, lumber and timber products, and paper and wood pulp, the amount used in these three industries constituting 82.7 per cent of the total waterpower used in the state.

At the end of the last century manufacturing in Philadelphia and the adjacent parts of Pennsylvania was very much stimulated by the activity of one man, Benjamin Franklin, whose interests extended to the promotion of almost every form of industry. The Society of Arts, the American Philosophical Society, and other similar associations in Philadelphia were active at this time, offering prizes for inventions which were desired in various lines of manufacturing. The Centennial Exposition, held in Philadelphia in 1876, was a great benefit to the industries of the state, and in 1883, a textile department was added to the Pennsylvania Museum and School of Industrial Art.[5] More recently, the Philadelphia Commercial Museum has been organized, for the purpose of assisting American manufacturers to enter the foreign market with their products.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for governmental establishments, educational, eleemosynary, and penal institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS.		Miscellaneous expenses.	COST OF MATERIALS USED.				Value of products, including custom work and repairing.
				Average number.	Total wages.		Total.	Purchased in raw state.	Purchased in partially manufactured form.	Fuel, freight, etc.	
Total	63,228	$1,562,286,508	70,254	737,258	$332,881,798	$134,671,739	$1,043,912,345	$249,529,532	$731,218,337	$63,164,476	$1,838,987,038
Hand trades[1]	20,799	53,748,704	23,061	59,196	29,735,786	22,815,039	50,489,016	1,183,050	48,297,303	1,008,663	134,678,795
Governmental establishments	3	3,199,131	--------	397	307,913	14,875	261,064	----------	251 936	9,128	588,062
Educational, eleemosynary, and penal institutions	17	3,763,917	--------	676	371,551	26,726	369,255	39,883	299,072	30,300	816,007
Establishments with a product of less than $500	11,023	3,774,748	11,418	2,351	129,664	285,869	847,427	99,328	748,099	----------	2,792,109
All other establishments	31,386	1,497,800,008	35,775	674,638	302,336,884	111,529,230	991,945,583	248,207,271	681,621,927	62,116,385	1,700,112,065

[1] Includes bicycle and tricycle repairing, 502; blacksmithing and wheelwrighting, 4,509; boots and shoes, custom work and repairing, 2,580, carpentering, 1,846; clothing, men's, custom work and repairing, 2,231; clothing, women's, dressmaking, 1,196; dyeing and cleaning, 184; furniture, cabinetmaking, repairing, and upholstering, 710; lock and gun smithing, 197; masonry, brick and stone, 608; millinery, custom work, 1,344; painting, house, sign, etc., 1,512; paper hanging, 389; plastering and stuccowork, 207; plumbing, and gas and steam fitting, 1,552; sewing machine repairing, 32; taxidermy, 10; typewriter repairing, 3; watch, clock, and jewelry repairing, 1,187.

Of the 63,228 establishments of all classes shown in this table, 31,822, or 50.3 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $137,470,904, or only 7.5 per cent of the total value of the products of the state.

In addition to the 63,228 active establishments in the state during the census year, with a capital of $1,562,286,508, shown in Table 2, there were 349 idle establishments, with a capital of $10,751,710, divided as follows:

INDUSTRIES.	Number of idle establishments.	Capital.	INDUSTRIES.	Number of idle establishments.	Capital.
Bicycles and tricycles	2	$36,500	Leather, tanned, curried, and finished	13	$807,866
Brass castings and brass finishing	1	20,717	Liquors, distilled	8	122,230
Brick and tile	26	660,512	Liquors, malt	1	15,000
Cheese, butter, and condensed milk, factory product	8	15,675	Lumber and timber products	38	201,223
Clothing, men's, factory product	1	12,000	Lumber, planing mill products, including sash, doors, and blinds	10	49,355
Coke	4	59,200	Marble and stone work	3	48,500
Cooperage	1	38,000	Masonry, brick and stone	1	20,000
Explosives	3	23,300	Paints	3	16,600
Flouring and grist mill products	32	155,270	Paper and wood pulp	2	154,000
Foundry and machine shop products	11	262,480	Paving and paving materials	4	30,089
Fruits and vegetables, canning and preserving	3	24,750	Pottery, terra cotta, and fire-clay products	4	211,200
Furniture, factory product	2	65,500	Pumps, not including steam pumps	1	10,000
Gas and lamp fixtures	1	16,800	Roofing and roofing materials	3	84,500
Glass	19	1,968,582	Silk and silk goods	7	235,381
Hosiery and knit goods	9	61,843	Soap and candles	1	30,000
Ice, manufactured	2	117,000	Tin and terne plate	2	76,000
Iron and steel	38	4,455,269	Woolen goods	20	255,100
Iron and steel, forgings	1	15,000	All other industries	63	118,596
Iron and steel, pipe, wrought	1	257,672			

TABLE 3.—COMPARATIVE SUMMARY OF TWENTY-FIVE LEADING INDUSTRIES.

INDUSTRIES.	Year.	Number of establishments.	Capital.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.

The 25 leading industries of the state in 1900, as shown in Table 3, embraced 15,665 establishments, or 30 per cent of the total number in the state; used a capital of $1,111,294,443, or 71.6 per cent of the total; gave employment to 478,780 wage-earners, or 65.2 per cent of the total number; and paid $221,138,148, or 66.6 per cent of the total wages. The value of their products was $1,291,000,950, or 70.4 per cent of the total. In the dis-

cussion of Table 3, which follows, these industries are ranked with reference to the value of their products.

Table 3 shows that the manufacture of iron and steel is the most important industry in the state. The 291 establishments reported in 1900 gave employment to 110,864 wage-earners, or 15.1 per cent of the wage-earners employed in the state, and the products were valued at $434,445,200, or 23.7 per cent of the total value of the products of the state. In 1890 there were 311 establishments, 92,473 wage-earners, and products valued at $264,571,624. The increase in the value of products during the decade was $169,873,576, or 64.2 per cent.

From a very early period Pennsylvania has ranked first in this industry. In 1880 the value of its iron and steel products amounted to 49.1 per cent of the total for the United States, and in 1900 to 54 per cent. Allegheny county, which includes the cities of Pittsburg, McKeesport, and Duquesne, was the most important center for the industry in 1900. Other important centers were Johnstown and Newcastle. Iron had been made in several of the other colonies before its manufacture was attempted in Pennsylvania. The industry had its beginning under the encouragement of William Penn. In a book published in Philadelphia in 1692 it was stated that a small amount of iron had been made in the state, but the location was not specified.[1] The first successful attempt to establish works in Pennsylvania for the manufacture of iron was made in 1716, when Thomas Rutter, a smith, erected a bloomery forge on Manatawny Creek, in Berks county, about three miles above Pottstown. In 1728–29 the colony exported 274 tons of pig iron to England. In 1756 Pennsylvania was spoken of as "the most advanced of all the American colonies in regard to its iron works." The industry was greatly stimulated by the discovery of immense deposits of magnetic iron ore in the Cornwall ore hills, near the city of Lebanon. Beginning in 1788 there was a considerable development of the industry in the Juniata Valley, in the south central part of the state, the pig and bar iron manufactured being sold chiefly in Pittsburg, to which point it was carried partly on the backs of horses and partly on flatboats, until the canals were built between the years 1826 and 1839.[2] The first blast furnace west of the Allegheny Mountains was erected on Jacob's Creek, in Fayette county, south of Pittsburg, in 1789, and was blown in 1790.[3] This was the great iron center of western Pennsylvania far into the Nineteenth century, supplying Pittsburg and the Ohio and Mississippi valleys with pig iron and castings for many years. A blast furnace erected at Pittsburg about the year 1792 was soon abandoned, because no ore could be found in the vicinity, and the expense of transporting it from a distance was too great.[4] It was not until 1859 that pig iron was again made in Pittsburg, the Clinton Furnace having been built and blown in that year. In 1812 a rolling mill was built at Pittsburg, and in 1829 there were 8 rolling mills in Allegheny county.

Practically all the furnaces operated in the state prior to 1840 used charcoal as fuel. About that year the use of mineral fuel was introduced, and the modern era of the industry began. With the immense coal supplies of the state available as fuel, the production of charcoal pig iron declined until in 1900 it amounted to only 4,341 tons. Anthracite coal was used first, and for many years was more important than bituminous fuel, but since 1875 this relation has been reversed. In 1880 bituminous coal and coke pig iron constituted 34.9 per cent of the total production, as compared with 61.3 per cent in 1890 and 76.1 per cent in 1900. In the latter year almost all the pig iron made with bituminous fuel was produced with coke alone, very little bituminous coal being mixed with the coke. There are extensive deposits of iron ore in the state, and these local ores were used almost exclusively, up to the middle of the century. Since then the production of iron ore has greatly increased, amounting to 1,009,327 long tons in 1899, when the state ranked fourth in the United States,[5] but these ores supplied but a small part of the blast furnaces of the state, the more important source of supply, in recent years, being the mines in the Lake Superior district. This ore was first used in a blast furnace in the United States near Sharon, Pa., in 1853. In 1855 the Sault Ste. Marie Canal was opened, and the great development of the Lake Superior iron ore trade began.[6] Of the 18,251,804 long tons of iron ore shipped from these mines in 1899, 15,222,187 tons were received at the eleven Lake Erie ports, the greater part of this being shipped directly to Pennsylvania.[7] To control deliveries and freight rates, one Pennsylvania steel company has built a railroad connecting its works at Pittsburg with Lake Erie.

As a result of these two important changes—the increased use of bituminous as compared with anthracite fuel, and the increased use of Lake Superior iron ores as compared with the Pennsylvania ores—the localization of the iron industry in the state has been considerably changed. The anthracite coal region is in the eastern part of the state, chiefly in Luzerne, Lackawanna, and Schuylkill counties, and the iron ore deposits are located here and in the southern parts of the state.[8] Until about the middle of the century the center of iron manufactures also was here. During recent years, however, as a result of the causes just named, the greatest production has come to be in the western part of the state, chiefly in the Pittsburg district. Here the blast furnaces are nearer the Lake Superior ore, and are favored by their proximity to the abundant coke of the Connellsville region, which is equal, if not superior, to

any other coke produced in the United States. The western part of the state has been further favored by the abundant production of natural gas in that region. This fuel is very largely used in the rolling mills of the state, its cost during the census year constituting 22.3 per cent of the total cost of fuel.

The development of the steel manufacture in Pennsylvania was slow. It had been attempted about 1750, and in 1805 there were 2 steel furnaces in the state which produced annually 150 tons of steel. In 1810 only 917 tons were produced in the United States, of which amount 531 tons were produced in 5 furnaces in Pennsylvania. Three years later there was a steel furnace in Pittsburg, the first in that city. While there was a considerable increase in the quantity, the quality was variable until 1860, when crucible cast steel of the highest grade was made in Pittsburg as a regular product.[1] This triumph marks the establishment of a new industry. The manufacture of Bessemer steel was begun in Pennsylvania in 1867, an establishment at Steelton, in Dauphin county, being the third in the United States to use this process. The first steel rails made in the United States upon order, in the way of regular business, were manufactured in the same year at Johnstown.[2] The most characteristic development in the steel industry of Pennsylvania during the last fifteen years has been the increasing importance of open-hearth as compared with Bessemer steel.

Closely allied to the iron and steel industry is the manufacture of tin and terne plate, the statistics of which are shown in Table 7. There were 25 establishments engaged in this industry in 1900, with 1,578 wage-earners, and products valued at $12,530,991. The state ranked first in this manufacture, the value of its products amounting to 39.3 per cent of the total for the United States. Tin and terne plate was first regularly made in the United States in 1872, at an establishment in Pittsburg, but the great development of the industry has taken place since 1890.

The manufacture of textiles ranks second among the industries of the state, with 1,102 establishments, 102,213 wage-earners, and products valued at $158,782,087. In 1890 there were 1,028 establishments, 79,579 wage-earners, and products valued at $134,001,269. The increase in the value of products during the decade was $24,780,818, or 18.5 per cent.

Pennsylvania ranked second in the United States in this industry in 1900, by far the larger part of the operations being confined to the city of Philadelphia, which is the greatest textile center in the country.

Of the several branches of the industry, the manufacture of silk stood first in the value of products in 1900. In 1880 Pennsylvania ranked fifth in this manufacture in the United States, having 8.5 per cent of the total value of products for the country. In 1900 it ranked second, with 29 per cent of the total. The industry was carried on most extensively at Philadelphia, Scranton, Allentown, and Easton. Silk culture was recommended and encouraged very early in the history of the state, and a filature for reeling silk from cocoons was opened in Philadelphia in 1750, under the patronage of Benjamin Franklin and others. Considerable quantities of sewing silk were made in families, and to Susanna Wright, of Columbia, Lancaster county, a Quaker of some literary fame, a premium was awarded in 1770 for reeling and weaving, from home-grown cocoons, a piece of "mantua" sixty yards long, from which a dress was made for Queen Charlotte.[3] In 1793 the making of fringes, coach laces, and tassels was begun in Philadelphia. and in 1815 the industry was expanded to include silk trimmings, naval sashes, ribbons, and braids. Power looms were introduced about 1837, for weaving ribbon and other narrow goods. One establishment soon became the most extensive producer of trimmings in the United States, having made gold lace several years before its manufacture was attempted in Europe. Excellent black silk plush was made in Philadelphia in 1831, and figured silk vestings and other woven goods at Economy about the same time. About 1839 the culture of silk was abandoned, and attention confined to the manufacture, which has advanced steadily, the greatest growth being between the years 1880 and 1890. During the last decade many localities have offered financial inducements to attract the industry. At many of the establishments in recent years the operations consist entirely in "throwing," the thrown silk being sent to other states to be woven into cloth.

In 1880 Pennsylvania ranked sixth in the United States in the manufacture of cotton goods, having 5.7 per cent of the total value of products for the United States. In 1900 the state ranked fifth, with 7.0 per cent of the total. The industry was carried on in 1900 most extensively at Philadelphia and Chester. As early as 1775 a spinning jenny of 24 threads was put into operation in Philadelphia, and in 1782 Samuel Wetherall advertised for sale probably the first factory-made jeans, fustians, and everlastings made in the United States.[4] In 1810, 611,481 yards of cotton goods of household manufacture were produced in the state, 233,232 yards of which were made in the county of Philadelphia. The industry was reported, however, for almost every county in the state. In addition 65,326 yards were made in 6 mills in Philadelphia county. A plant for the manufacture of "Nottingham lace" was established at Wilkesbarre in 1886, and operated with considerable success. In 1891 the manufacture was begun in Philadelphia, and in 1895 and 1896 plants were built at Scranton and Columbia. In 1899 there were 9 lace plants in the United States, 7 of which were located in Pennsylvania.[5] The use of cotton for decorative fabrics originated in Philadelphia, where it has been brought to

great perfection, cotton tapestries and chenille curtains being most conspicuous in this line.

In 1870 Pennsylvania ranked second in the manufacture of woolen goods, having 17.7 per cent of the total value of the products for the United States. The state ranked second in 1900 also, with 21.4 per cent of the total. The industry was carried on in 1900 almost entirely in the city of Philadelphia. The manufacture of woolen goods was established in Pennsylvania, on the banks of the Schuylkill River, by English settlers, and was characterized in the early days by the large number of small, independent factories, many of which used hand looms.[1] In 1810, 30,666 yards of woolen cloth were manufactured in the factories of the state, and the industry was carried on also in households in almost every county, 997,346 yards of cloth being thus manufactured. There were 213 fulling mills in operation, which reported 687,383 yards of cloth fulled, and 340 carding mills, which reported 1,940,350 pounds of wool carded. In 1850 Pennsylvania produced more yarn than any other state. This was consumed chiefly by the hand-loom weavers of that and the Western states. In 1860 all-wool and mixed cassimeres, satinets, Kentucky jeans, twills, tweeds, and flannels were manufactured in Philadelphia in large quantities, and were sold largely in the West. With the concentration of the industry in the city of Philadelphia, there has been a gradual subdivision of the manufacture. This has created a large number of independent subordinate industries, carried on in separate establishments. The mills of this city excel in various products, especially in women's dress goods novelties.[2]

The growth of the carpet industry in Pennsylvania has been remarkable. In 1850 the state ranked third, with products valued at 21 per cent of the total for the United States. In 1870 it ranked first, with 44.8 per cent of the total, and in 1900 first, with 48 per cent of the total. The industry was carried on in 1900 almost entirely in the city of Philadelphia. Carpets were seldom seen in the United States before the Revolution. As early as 1791, however, a factory was in operation at Philadelphia, making Turkey and Axminster carpets.[3] In 1810, 9,034 yards of carpets were manufactured in Pennsylvania, 7,501 yards of which were made in Philadelphia. In 1857 there were more than a hundred carpet manufacturers in this city using hand looms, and one manufacturer using power looms. The first successful power loom for weaving ingrain carpets was invented by a New England man, and the New England manufacturers refused for a long time to allow it to be used outside of their mills.[4] It was, therefore, not until 1868, when the Murkland power loom was introduced, that Philadelphia was placed on an equal footing with New England in this industry. Between the years 1880 and 1890 great improvements were made in the weaving and designing of ingrain carpets, due largely to the importation of some remarkably beautiful specimens of these carpetings from England.

Ingrain carpets have always been the most important product of the Philadelphia factories. Desultory attempts were made to manufacture finer fabrics,[5] but as late as 1870 there was not a Brussels loom in operation in the state, although they had been in practical use in the New England states for years. Probably more ingrain carpets are now made in this city than in any other city in the world. The manufacture of Venetian carpeting—a striped fabric for halls and stairs—was for many years an extensive branch of the Philadelphia industry. This has now almost disappeared, due to the decreased cost of tapestry Brussels carpeting, which has taken its place. The first tapestries manufactured in Pennsylvania were made in Philadelphia in 1873, and tapestry weaving has since become a very considerable feature of the Philadelphia industry.[6] The manufacture of Smyrna rugs was introduced from England about 1876, and was soon brought to great perfection in Philadelphia. Since the invention of the power "setting machine," the cost of manufacture has been very much reduced.

In 1870 Pennsylvania ranked second in the manufacture of worsted goods, with 35.7 per cent of the total value of products for the United States; and third in 1900, with 18.4 per cent of the total. The industry was carried on in 1900 almost entirely in the city of Philadelphia. The first power-combing worsted mills in this city were established about 1860, making nothing but yarns. At this time the industry received its greatest stimulus, through the introduction of the Noble comb from England, a machine which made possible the use of short, fine wools for worsted yarns.[7]

Pennsylvania has ranked second in the manufacture of hosiery and knit goods since 1870, having in that year 28.8 per cent of the total value of products for the United States, and 22.9 per cent in 1900. Philadelphia is the leading center of the industry. It differs from the other great center, Cohoes, N. Y., and its neighboring towns, in that the products in Philadelphia are chiefly hosiery, while the New York mills produce mostly underwear. The German Palatines who settled in Germantown about 1698 appear to have introduced the manufacture of hosiery into the United States. At the semiannual fairs established by William Penn in Philadelphia, the German hosiery exhibit was always a striking feature.[8] In 1810, 107,508 pairs of stockings were manufactured in Pennsylvania, 53,981 of which were made in Philadelphia county. In 1858 there were 700 hand-knitting frames in operation in the city of Philadelphia. Some of the most famous and successful knitting machines have been invented in this

city. A peculiarity of the industry in Philadelphia in early days—the carrying on of knitting as a house occupation by hand-frame operatives—has persisted somewhat to the present time. While Pennsylvania has a representation of large mills unequalled by any other state except New York, it has also a large number of establishments located within its borders which employ very few machines, and use knitting merely as an outlet for some other business or manufacturing enterprise.

The dyeing and finishing of textiles in Pennsylvania is centered chiefly in the city of Philadelphia. Calico printing from wooden blocks was carried on in this city as early as 1788, when John Hewson, sr., assisted by a loan of £200 from the state, began operations at Dyottsville, within the present limits of Philadelphia. The cloth was spread out on a table and the stamping done by hand.[1] In 1803 there were 3 print works in Philadelphia, printing annually 300,000 pounds of calico. It was in 1809 that cotton goods were first printed in the United States upon engraved copper rollers. This was done at the printing and bleaching works of Thorp, Siddle & Co., near Philadelphia, the machinery being imported from England. In 1810 there were 40 dyers in Pennsylvania, 8 of whom were in Philadelphia county. In 1822 the engraving of metallic rollers for calico printing was begun in Philadelphia by Mason & Baldwin, who took out patents in 1827 for biting figures on steel cylinders.

A machine for reducing rags to shoddy was patented by a Philadelphia manufacturer about the beginning of the century, and shortly afterwards an attempt was made to make shoddy at this point, but the industry did not assume importance until about the middle of the century.[2]

Reading and the adjoining village of Mohn's Store constitute the chief center in the United States for the manufacture of wool hats.[3] In 1786 it was estimated that 160,000 wool hats were made in the state, and Berks county, which includes the city of Reading, was even at that time the chief center.[4] In 1860, 474,924 wool and mixed hats were manufactured, the state leading all others in this industry. The decline in recent years has been due to the increased use of rabbits' fur instead of wool in the manufacture of hats.

There were 1,260 establishments engaged in 1900 in the manufacture of foundry and machine shop products, the industry third in rank, with 62,828 wage-earners, and products valued at $127,292,440. In 1890 there were 886 establishments, 38,247 wage-earners, and products valued at $67,587,025. The increase in the value of products during the decade was $59,705,415, or 88.3 per cent. Allied to this industry is the manufacture of iron and steel wrought pipe, in which there were 10 establishments engaged in 1900, with 3,675 wage-earners, and products valued at $15,383,693. In 1890 there were 14 establishments, 9,170 wage-earners, and products valued at $30,249,795. The decrease in the value of products during the decade was $14,866,102, or 49.1 per cent. Pennsylvania has always held high rank in the foundry and machine shop industry, and especially so in certain of the products. The state ranked first in the number of steam locomotives built in 1900, producing more than one-half of the total for the United States; second in metal-working machinery; and second in pumping machinery. In 1831, one year after the first locomotive was built in the United States for actual work, locomotive building was begun at Philadelphia, and in 1832 "Old Ironsides" was completed for the Germantown and Norristown Railroad Company. This locomotive had a stiff wooden frame, and its driving wheels had wooden spokes. This pioneer company is still in existence, and has now a capacity of over a thousand locomotives per year. The exportation of locomotives from Pennsylvania to European markets began in 1845, and has continued increasingly up to the present time. In 1865 works were organized in Pittsburg which still exist, and have now a capacity of 300 locomotives per year.[5]

What was probably the first stove made in the United States, a "jamb stove," was manufactured by Christopher Sauer, of Germantown, between 1730 and 1740.[6] In 1742 Franklin invented his stove, the pieces of which were cast in a new furnace near Reading. The name of this furnace, "Warwick," was cast on the front of each stove.[7] The first printing press made in the United States came from the shop of Adam Ramage, in Philadelphia, about 1795.[8] In 1810 there were 2 printing-press factories in this city, reporting products valued at $26,000, and 2 manufactories of hydraulic engines, reporting products valued at $25,000. The cannon balls used by General Jackson at the battle of New Orleans were cast in works built in Fayette county in 1797. Hollow ware, Dutch ovens, stoves, sugar kettles, skillets, pots, grates, irons, and plow castings also were made. A portion of these goods was consumed in the state, and the remainder shipped down the Ohio and Mississippi rivers.[9] In 1836 there were 18 foundries, engine factories, and machine shops in the city of Pittsburg.

Numerous other iron and steel products are made in large quantities in Pennsylvania, the statistics being shown in Table 7 under the classifications, bridges, and ironwork, architectural and ornamental.

There were 254 establishments engaged in the tanning, currying, and finishing of leather in 1900, with 13,396 wage-earners, and products valued at $55,615,009. In

1890 there were 410 establishments, 10,956 wage-earners, and products valued at $49,931,716. The increase in the value of products during the decade was $5,683,293, or 11.4 per cent. In 1880 Pennsylvania ranked second in this industry, having 18.9 per cent of the total value of the products for the United States; and first in 1900, with 27.3 per cent of the total. The industry was carried on in 1900 most extensively at Philadelphia and in Tioga, Elk, Potter, and Clearfield counties. In 1810 there were 715 tanneries in the state, with products valued at $1,599,044. The value of products was large in Philadelphia, York, and Lancaster counties, but the industry was carried on in almost every county in the state. The process of tanning by the use of chemicals was brought to perfection at Philadelphia shortly after 1856, and within five years led to the development of an establishment which, in 1895, was reported to be the largest leather manufactory in the world.[1] Upon the exhaustion of the hemlock bark in the southeastern part of New York state, some years after the Civil War, tanners turned their attention to the vast hemlock forests of central and northern Pennsylvania, and a great development in the leather industry followed.[2] Hemlock bark and chemicals were the leading tanning materials used in the state in 1900.

There were 144 establishments engaged in the car construction and general shop work of steam railroad companies in 1900, with 28,554 wage-earners, and products valued at $43,065,171. In 1890 there were 61 establishments, 22,649 wage-earners, and products valued at $28,769,728. The increase in the value of products during the decade was $14,295,443, or 49.7 per cent. Pennsylvania ranked first in this industry in 1900, the value of its products amounting to 19.7 per cent of the total for the United States.

Allied to this is the manufacture of steam railroad cars other than by railroad companies. There were 11 establishments engaged in this industry in 1900, with 5,840 wage-earners, and products valued at $19,260,910. In 1890 there were 15 establishments, 4,535 wage-earners, and products valued at $10,080,722. The increase in the value of products during the decade was $9,180,188, or 91.1 per cent. Pennsylvania ranked second in this industry in 1900, and the value of its products amounted to 21.3 per cent of the total for the United States.

In these two classes of establishments 167 passenger cars, valued at $200,400, and 23,697 freight cars, valued at $12,968,113, were manufactured during the census year. Establishments operated by steam railroad companies were located at Altoona, Reading, Philadelphia, and other cities, while car construction by other establishments was carried on most extensively at Allegheny, Pittsburg, and Berwick.

There were 2,719 establishments engaged in the manufacture of flouring and grist mill products in 1900, with 2,195 wage-earners, and products valued at $36,639,423. In 1890 there were 2,226 establishments, 3,378 wage-earners, and products valued at $39,478,076. The decrease in the value of products during the decade was $2,838,653, or 7.2 per cent. In 1900 the industry was carried on most extensively in Dauphin, Lancaster, Berks, and York counties. In 1899 Pennsylvania ranked thirteenth in the production of corn and twelfth in the production of wheat.[3] In 1810 flour and grist milling was carried on in almost every county in the state, the value of products of the "wheat mills" being reported at $10,800,290. At that time Northampton produced more flour than any other county.

There were 1,795 establishments engaged in printing and publishing in 1900, with 16,991 wage-earners, and products valued at $36,455,629. In 1890 there were 1,487 establishments, 15,009 wage-earners, and products valued at $34,408,493. The increase in the value of products during the decade was $2,047,136, or 5.9 per cent. Pennsylvania ranked second in the printing and publishing of newspapers and periodicals in 1900, and the value of its products amounted to 10.4 per cent of the total for the United States. The first printing press in Pennsylvania was erected in Philadelphia, in 1686, four years after the first English settlement was made in the colony. The publication of magazines and other periodicals was attempted by Franklin as early as 1741. In 1810 it was estimated that half a million volumes were printed annually in Philadelphia.[4] The first Bible printed in the United States, except those printed in the Indian language, was from the press of Christopher Sauer, at Germantown, in 1743. The descendants of this early printer are still publishers in the city of Philadelphia. For fifty years after the Revolution this city was unquestionably first in the printing industry, the first daily paper in the United States having been established there in 1784. Shortly after the beginning of the century 110 wooden presses were in operation in Philadelphia—a larger number than in any other English-speaking city in the world except London.[5] The growth of book publishing was promoted by annual fairs and auction sales established in 1802 by the American Company of Booksellers, and held for a while alternately in New York and Philadelphia. In 1810, 73 newspapers were published in Pennsylvania, 8 of which were daily papers—a larger number than was published in New York state at that time.[6] In 1817 "The Columbian," a hand press, was invented by George Clymer, of Pennsylvania, and was introduced in the following year into England, where it remained in use until 1860. It was the first press built in the United States capable of printing both sides of a newspaper at once.

There were 7 establishments engaged in the refining of sugar and molasses in 1900, with 1,249 wage-earners, and products valued at $36,163,817. In 1890 there were 10 establishments, 1,459 wage-earners, and products valued at $46,599,754. The decrease during the decade was

$10,435,937, or 22.4 per cent. This industry has always been confined very largely to Philadelphia, because the raw sugar used is brought chiefly from foreign markets. In 1810, 10 sugar refineries were in operation in this city, with products valued at $605,600. In 1840 there were 3 small refineries, located in alleys and side streets and operated by rude and unscientific methods.[1] In 1866 the first sugar refinery was built on the Delaware River front. This marked a new era in the industry, with better transportation facilities, improved machines, and scientific methods of operation. In 1890 the largest of the refineries in Philadelphia had a capacity of 7,000 barrels per day, and used more raw sugar each year than was produced in the United States. The raw cane sugar was brought chiefly from the West Indies, Brazil, Demerara, and the East Indies, and large cargoes of raw beet sugar were brought from Germany and other countries.

There were 2,338 establishments engaged in the manufacture of lumber and timber products in 1900, with 13,510 wage-earners, and products valued at $35,749,965. In 1890 there were 1,948 establishments, 19,598 wage-earners, and products valued at $29,087,970. The increase in the value of products during the decade was $6,661,995, or 22.9 per cent.

Although the production of lumber has increased since 1870, the state has fallen in rank. In that year it stood second, having 13.8 per cent of the total value of products for the United States, while in 1900 it stood fourth, with but 6.3 per cent of the total. Hemlock, the principal variety of lumber cut in 1900, constituted 73 per cent of the total amount produced in the state. This wood, despised twenty years ago except for tanbark, is being rapidly exhausted, though it is still found in considerable quantities in northern Pennsylvania.[2] Oak, white pine, poplar, and spruce ranked next to hemlock in importance, in the order named. The lumber industry is carried on most extensively in Lycoming, Potter, Elk, McKean, Jefferson, and Forest counties—Williamsport, Bradford, and South Williamsport being important centers. Of the 4 plants in the United States which produced more than 100,000,000 feet of lumber, board measure, during the census year, 1 was located in Pennsylvania.

In 1810, 73,847,640 feet of lumber were sawed in the state, chiefly in Northumberland, Luzerne, Chester, Warren, and Philadelphia counties. In addition to this, 700,000 feet of mahogany were sawed in 21 sawmills in the state. As early as 1804 large amounts of lumber were handled at Pittsburg, and about 1819, in a St. Louis price list, mention is made of pine boards brought from Pittsburg in flatboats, selling at $8 per 100 feet. In 1838 the first large mills were erected at Williamsport, but the boom which afterwards supplied forty or fifty mills was not built until 1850. Lumber was sent down the Ohio River in large quantities until about 1876, by which time the pine of northern Pennsylvania had become nearly exhausted.[3] Between 1860 and 1874 there was a marked development in the industry. Timber was cut extravagantly and for a time it was feared the state's timber supply would be entirely exhausted. The panic of 1873 completely paralyzed the industry and checked this waste.[4] Since that time there has been a gradual rise in the price of lumber, due to the decreasing supplies, and the forests have been cleared with more discretion.

There were 38 establishments engaged in the refining of petroleum in 1900, with 3,299 wage-earners, and products valued at $34,977,706. In 1890 there were 55 establishments, 3,284 wage-earners, and products valued at $18,498,777. The increase in the value of products during the decade was $16,478,929, or 89.1 per cent. Pennsylvania ranked first in this industry both in 1870 and in 1900, the value of its products constituting 56.6 per cent of the total for the United States in the former year, and 28.2 per cent in the latter. In 1900 the industry was carried on most extensively at Philadelphia and in Venango county. Petroleum has been known in Pennsylvania from very early times, and in the census of 1810, 550 gallons of "spring oil" were reported for Venango county. Until Drake's invention, in 1858, at Titusville, by which oil was obtained from driven wells, all supplies had been gotten from springs and surface wells.[5] In 1899 the production of crude petroleum in the state amounted to 13,053,603 barrels, or 22.9 per cent of the total for the United States.[6] This amount was somewhat less, however, than the amount of crude petroleum used in the refineries of the state during the census year, considerable quantities of crude oil being received from neighboring states. In the days of railroad transportation of petroleum, freight charges were so heavy that it was economical to carry on refining near the wells, and the region about Pittsburg and Oil City was filled with numerous small works, the first refinery at the former city having been established in 1855. After the introduction of pipe lines, in 1875, the cost of transportation was so much reduced that it became advantageous to ship the crude oil to large refineries on the seaboard, near New York, Philadelphia, and Baltimore, and on the shores of Lake Erie, near Buffalo and Cleveland.[7]

There were 281 establishments engaged in the manufacture of liquors in 1900, with 4,976 wage-earners, and products valued at $34,520,358. In 1890 there were 203 establishments, 3,548 wage-earners, and products valued at $22,698,423. The increase in the value of products during the decade was $11,821,935, or 52.1 per cent. The production of malt liquors has come to be by far the most important branch of the liquor industry, although in the

[7] One Hundred Years of American Commerce, Vol. I, page 209.

early years of the century the production of distilled liquors was more important. In 1900 Pennsylvania ranked second in the malt liquor industry, having 12.3 per cent of the total value of the products for the United States. The industry was carried on in 1900 most extensively at Philadelphia, Pittsburg, Allegheny, and Scranton. The state ranked fifth in distilled liquor production in 1900, its value of products amounting to 5.5 per cent of the total for the United States. The industry was carried on in 1900 most extensively in Westmoreland, Allegheny, and Fayette counties.

Distilling was carried on to a considerable extent about the middle of the last century. The attempt of the United States Government to collect the first internal-revenue tax upon distilled spirits resulted, in 1794, in the uprising in the western part of Pennsylvania, known as the "Whiskey Rebellion." In 1810, 6,552,284 gallons of whiskey were reported for the state, the largest production being in Lancaster and Philadelphia counties, although the industry was carried on in almost every county in the state.

There were 2,712 establishments engaged in the manufacture of tobacco in 1900, with 25,483 wage-earners, and products valued at $33,355,932. In 1890 there were 2,025 establishments, 18,550 wage-earners, and products valued at $23,387,910. The increase in the value of products during the decade was $9,968,022, or 42.6 per cent. In 1899 Pennsylvania produced tobacco leaf to the value of $2,959,304, ranking sixth in the United States. The manufacture was extensive as early as 1810, during which year 29,061,000 "American cigars" were manufactured in Pennsylvania, nearly the entire quantity being made in Philadelphia. In addition to these, more than three million "Spanish cigars" were manufactured.

There were 111 establishments engaged in the slaughtering industry in 1900, with 1,669 wage-earners, and products valued at $25,238,772. In 1890 there were 242 establishments, 1,582 wage-earners, and products valued at $21,991,604. The increase in the value of products during the decade was $3,247,168, or 14.8 per cent. The branch of the industry which includes meat packing is by far the more important of the two, and was carried on during the census year chiefly at Philadelphia, Allegheny, and Pittsburg.

There were 481 establishments engaged in the factory manufacture of men's clothing in 1900, with 10,497 wage-earners, and products valued at $23,389,043. In 1890 there were 337 establishments, 7,675 wage-earners, and products valued at $26,732,348. The decrease in the value of products during the decade was $3,343,305, or 12.5 per cent. Allied to this industry is the factory manufacture of women's clothing, in which there were 230 establishments engaged in 1900, with 8,311 wage-earners, and products valued at $11,694,580. In 1890 there were 80 establishments, 2,989 wage-earners, and products valued at $3,903,596. The increase in the value of products during the decade was $7,790,984, or 199.6 per cent. The manufacture of men's clothing was carried on in the state as a hand trade early in the Eighteenth century. In 1718 the tailors of Philadelphia applied to the state for an act of incorporation.[1] In the early years of the industry in this city, clothing was sent out into the country to be sewed by the wives and daughters of farmers during the winter.[2] The factory industry began in the United States about 1820, and shortly after that date several establishments were in operation in Philadelphia, shipping their products to the Southern states. In 1860 the value of men's clothing manufactured in Pennsylvania exceeded that of all New England, Philadelphia contributing three-fourths of the entire product. The manufacture of women's clothing assumed importance in the United States about the year 1845, and in 1860 there were 4 establishments in the city of Philadelphia, with products valued at $345,000.

There were 89 establishments engaged in the manufacture of coke in 1900, with 9,283 wage-earners, and products valued at $22,282,358. In 1890 there were 98 establishments, 5,855 wage-earners, and products valued at $10,415,628. The increase in the value of products during the decade was $11,866,730, or 113.9 per cent. Pennsylvania has long ranked first in this industry, the production in 1880 amounting to 84.2 per cent of the total for the United States, and in 1900 to 62.6 per cent of the total. For twenty years the Connellsville district, famous for both the quantity and the quality of its coke, has contributed each year, with one exception, over 50 per cent of the entire production of the United States.[3] The yield of coal in coke rose from 65.5 per cent in 1880 to 69.4 per cent in 1899, while the value fell from $1.79 per ton in 1880 to $1.64 in 1899. An average of 1,676 carloads of coke leave this district each day. The quality of the coal used is such that it needs little or no preparation before being charged into the ovens.

There were 119 establishments engaged in the manufacture of glass in 1900, with 19,420 wage-earners, and products valued at $22,011,130. In 1890 there were 99 establishments, 18,510 wage-earners, and products valued at $17,179,137. The increase in the value of products during the decade was $4,831,993, or 28.1 per cent. Pennsylvania has long led all other states in this manufacture, having 51.8 per cent of the total value of the products for the United States in 1870, and 38.9 per cent in 1900. The industry was carried on in 1900 most extensively in Allegheny, Westmoreland, Washington, and Armstrong counties, in the western part of the state. Glass making has been stimulated in this section by abundant supplies of bituminous coal and natural gas, and by deposits of glass sand in Juniata and Fayette counties, equal in quality to that found anywhere else in the world, and by the abundance of fire clay suitable for furnaces, found in western Pennsylvania and eastern Ohio.[4]

Mention was made by William Penn, in 1683, of a glass-house in Pennsylvania, but its location was not stated.

[4] Tenth Census of the United States, Manufactures, folios 1066, 1074, and 1075.

The first glass works west of the Allegheny Mountains was built by Albert Gallatin at New Geneva, on the Monongahela River, probably in 1797. About the same time a glasshouse was established at Pittsburg, and was the first works to use coal as a fuel.[1] In 1810 there were 8 glass factories in Pennsylvania, with products valued at $144,800, the greatest production being shown for Allegheny county.

The most important event in the glass industry in recent years was the introduction of natural gas as fuel. The first successful use of this fuel in the manufacture of glass was at a large plate glass establishment at Creighton, near Pittsburg, in 1883.[2] Many small towns where natural gas was discovered offered land and bonuses to induce the establishment of glass works within their limits, and the building of glasshouses progressed rapidly.[3] During the census year the cost of natural gas constituted 71.5 per cent of the total cost of fuel used in the glass industry. During the same year glass of various kinds, valued at $107,958, was exported from establishments in Pennsylvania to England, South America, Canada, Australia, and New Zealand. These figures include only glass sold directly from the factory to foreign consumers.

There were 63 establishments engaged in the manufacture of electrical apparatus and supplies in 1900, with 7,817 wage-earners, and products valued at $19,112,665. In 1890 there were 10 establishments, 209 wage-earners, and products valued at $674,565. The increase in the value of products during the decade was $18,438,100, or 2,733.3 per cent.

There were 542 establishments engaged in the manufacture of planing mill products in 1900, with 7,472 wage-earners, and products valued at $16,736,839. In 1890 there were 467 establishments, 7,888 wage-earners, and products valued at $18,398,688. The decrease in the value of products during the decade was $1,661,849, or 9 per cent.

There were 146 establishments engaged in the factory manufacture of boots and shoes in 1900, with 9,144 wage-earners, and products valued at $13,235,933. In 1890 there were 158 establishments, 7,616 wage-earners, and products valued at $10,354,850. The increase in the value of products during the decade was $2,881,083, or 27.8 per cent. Pennsylvania ranked fourth in this industry in 1890, having 4.7 per cent of the total value of products for the United States; and fifth in 1900, with 5.1 per cent of the total. In 1900 the industry was centered at Philadelphia, Carlisle, and Allentown. The manufacture was carried on in the state as early as 1698, the workers being known as cordwainers.[4] In 1810, 1,327,776 pairs of boots, shoes, and slippers were manufactured in the state, 709,833 pairs of which were made in Philadelphia county. In 1851 an ingenious machine for pegging boots and shoes was patented and put into operation at Pittsburg. In 1860 fine shoes were manufactured in Philadelphia, where the industry was stimulated by the large manufacture of fine calf and morocco leather.

There were 100 establishments engaged in the manufacture of chemicals in 1900, with 4,278 wage-earners, and products valued at $13,034,384. In 1890 there were 71 establishments, 3,284 wage-earners, and products valued at $13,144,210. The decrease in the value of products during the decade was $109,826, or eight-tenths of 1 per cent. The industry was carried on in 1900 most extensively at Philadelphia and in Allegheny county. Oil of vitriol was manufactured in Philadelphia as early as 1793. By 1830 this city was the chief center of the chemical industry in the United States,[5] and in 1880 Pennsylvania led all other states in the manufacture of sulphuric acid, sulphate of ammonia, and white lead, contributing more than one-fourth of the production of sulphuric acid in the United States.[6]

There were 73 establishments engaged in the manufacture of paper and wood pulp in 1900, with 4,840 wage-earners, and products valued at $12,267,900. In 1890 there were 72 establishments, 2,951 wage-earners, and products valued at $7,838,299. The increase in the value of products during the decade was $4,429,601, or 56.5 per cent. Pennsylvania ranked third in this industry in 1880, having 10.1 per cent of the total value of products for the United States; and fourth in 1900, with 9.6 per cent of the total. In 1900 the industry was carried on most extensively in Philadelphia, York, Erie, Blair, and Elk counties. The first paper mill in the United States was established near Germantown in 1693. Printing, writing, and wrapping paper were manufactured.[7] About 1728 a mill was erected on Chester Creek, Delaware county. This mill supplied the press of Benjamin Franklin, and made the bank-note paper used for Continental currency. The paper manufacture in Philadelphia and vicinity was greatly promoted by the enterprise of the printers and booksellers, especially by Benjamin Franklin, who stated in 1787 that he had been interested in the establishment of 18 paper mills, and that there were 48 such mills then in operation in the state. In 1816 the first steam paper mill in the United States began operations in Pittsburg, with an engine of 16 horsepower, and 40 employees.

The increasing demand for paper made it necessary to develop some new material for the production of fiber, and in this Pennsylvania has had an important part. In 1830 Wooster and Holmes, of Meadville, Pa., took out patents for making paper from whitewood and hemlock. The process of producing white paper from straw was developed at Flat Rock Mills in 1854. In 1857 J. A. Roth, of Philadelphia, patented the process of treating wood fibers with a combination of sulphuric acid and chlorine bleaching agents. In 1863 M. L. Keen, of Royersford, Pa.,

patented a boiler for making pulp from wood, and in the following year Richard Magee, of Philadelphia, patented a method of coating writing paper.[1] In the early part of the century the paper mills of Pennsylvania produced all the paper required by the newspapers of the state.[2] At present nearly all the paper so used is produced in other states. This change has been due chiefly to the comparatively limited waterpower of Pennsylvania, and to a lack of spruce, the wood best adapted to news paper manufacturing. Most of the mills in Pennsylvania are producing book paper by the chemical treatment of wood, the power required not being an important factor.

There were 749 establishments engaged in the factory manufacture of cheese, butter, and condensed milk in 1900, with 976 wage-earners, and products valued at $10,290,006. In 1890 there were 300 establishments, 766 wage-earners, and products valued at $5,319,434. The increase in the value of products during the decade was $4,970,572, or 93.4 per cent. In 1900 Pennsylvania ranked fifth in this industry, having 7.9 per cent of the total value of products for the United States. The chief centers were Chester, Lancaster, Montgomery, Bucks, and Berks counties. There were 943,773 dairy cows reported during the census year, the state ranking fifth in the United States.

In addition to the industries included in Table 3, attention is directed to an important industry—iron and steel shipbuilding—the statistics for which appear only in Table 7, since comparable statistics for 1890 are not available. There were 3 establishments engaged in this industry in 1900, with 6,820 wage-earners, and products valued at $14,085,395. Pennsylvania ranked first in the industry in 1900, having 28 per cent of the total value of products for the United States. The industry is practically confined to the Delaware River in and near Philadelphia, and its great development is due to the proximity of this section to the great iron manufacturing establishments of the state; to the depth of the river close up to the shipyards; to the fresh water of the river giving comparative immunity from rust; and to the mild winters, which allow outside work on vessels. The beginning of shipbuilding in Philadelphia was almost coincident with the settlements made under William Penn.[3] In 1775 Philadelphia was the leading center for the building of ships, its preeminence being due to the immense shipping trade carried on between that city and the West Indies. In 1793 twice as many ships were built in Philadelphia as in any other locality in the United States.[4] The first steamboat in this country was launched on the Delaware River in 1786, and in 1809 steam navigation began its continuous existence at this point. In 1869 the Reading Railroad Company built 14 iron steamboats to be used in their coast coal trade. From that date wooden shipbuilding in Pennsylvania declined, and in 1900 it was an insignificant part of the whole industry. Next to the Clyde River, in Scotland, the Delaware River is now the greatest shipbuilding stream in the world. Builders on this river have been prominent in the construction of war vessels for the Government. The first six ships of the Navy were designed by a Philadelphia shipbuilder, Joshua Humphreys, and of the steel ships recently built for the Navy, more have been constructed at Philadelphia than at any other point.

URBAN MANUFACTURES.

Table 4 shows the totals for the manufacturing and mechanical industries of the cities of Allegheny, Allentown, Altoona, Chester, Erie, Harrisburg, Johnstown, Lancaster, McKeesport, Philadelphia, Pittsburg, Reading, Scranton, Wilkesbarre, Williamsport, and York as returned at the censuses of 1890 and 1900, with the percentages of increase.

[1] Decrease.

It appears from Table 4 that there has been a considerable increase during the past decade in the combined manufactures of these 16 cities. The number of establishments increased from 24,127 to 24,861, or 3 per cent; the average number of wage-earners from 383,588 to 452,407, or 17.9 per cent; and the value of products from $902,751,563 to $1,118,075,536, or 23.9 per cent. The percentage of increase in each of these particulars was smaller in these 16 cities than in the state as a whole. The city of McKeesport shows the most rapid growth, the value of products having increased from $17,432,721 to $37,074,136, or 112.7 per cent. In Philadelphia, the leading manufacturing city, the number of establishments decreased from 18,166 to 15,887, or 12.5 per cent. The average number of wage-earners increased, however, from 234,647 to 246,445, or 5 per cent; and the value of products from $577,234,446 to $603,466,526, or 4.5 per cent. The number of establishments, number of wage-earners, and value of products in this city constituted 30.4, 33.6, and 32.9 per cent, respectively, of the totals for the state.

In Philadelphia the leading manufacturing industries were foundry and machine shop products; sugar and molasses, refining; carpets and rugs, other than rag; petroleum, refining; and clothing, men's, factory product.

In Pittsburg, the city second in rank, the leading manufacturing industries were iron and steel; foundry and machine shop products; electrical apparatus and supplies; ironwork, architectural and ornamental; and iron and steel, pipe, wrought.

In Allegheny, the city third in rank, the leading manufacturing industries were cars, steam railroad, not including operations of railroad companies; iron and steel; foundry and machine shop products; pickles, preserves, and sauces; and slaughtering and meat packing, wholesale.

In McKeesport, the city fourth in rank, the leading manufacturing industries were iron and steel; tin and terne plate; iron and steel, pipe, wrought; bottling; and lumber, planing mill products, including sash, doors, and blinds.

In Reading, the city fifth in rank, the leading industries were iron and steel; cars and general shop construction and repairs by steam railroad companies; foundry and machine shop products; tobacco, cigars and cigarettes; and hardware.

In Scranton, the city sixth in rank, the leading manufacturing industries were iron and steel; silk and silk goods; foundry and machine shop products; liquors, malt; and cars and general shop construction and repairs by steam railroad companies.

In Johnstown, the city seventh in rank, the leading manufacturing industries were iron and steel; foundry and machine shop products; pottery, terra cotta, and fire-clay products; liquors, malt; and tin and terne plate.

In Erie, the city eighth in rank in Table 4, but tenth in rank in the state, the leading manufacturing industries were foundry and machine shop products; paper and wood pulp; lumber, planing mill products, including sash, doors, and blinds; flouring and grist mill products; and liquors, malt.

In Allentown, the city ninth in rank in Table 4, but eleventh in rank in the state, the leading manufacturing industries were iron and steel; silk and silk goods; foundry and machine shop products; boots and shoes, factory product; and slaughtering and meat packing, wholesale.

In Chester, the city tenth in rank in Table 4, but twelfth in rank in the state, the leading manufacturing industries were iron and steel; cotton goods; iron and steel, pipe, wrought; shipbuilding, iron and steel; and worsted goods.

In Lancaster, the city eleventh in rank in Table 4, but thirteenth in rank in the state, the leading manufacturing industries were umbrellas and canes; tobacco, cigars and cigarettes; confectionery; cotton goods; and iron and steel.

In Harrisburg, the city twelfth in rank in Table 4, but fourteenth in rank in the state, the leading manufacturing industries were iron and steel; cars and general shop construction and repairs by steam railroad companies; foundry and machine shop products; boots and shoes, factory product; and slaughtering and meat packing, wholesale.

In Altoona, the city thirteenth in rank in Table 4, but fifteenth in rank in the state, the leading manufacturing industries were cars and general shop construction and repairs by steam railroad companies; foundry and machine shop products; lumber, planing mill products, including sash, doors, and blinds; printing and publishing, newspapers and periodicals.

In York, the city fourteenth in rank in Table 4, but seventeenth in rank in the state, the leading manufacturing industries were foundry and machine shop products; tobacco, cigars and cigarettes; paper hangings; iron and steel, nails and spikes, cut and wrought, including wire nails; and carriages and wagons.

In Williamsport, the city fifteenth in rank in Table 4, but eighteenth in rank in the state, the leading manufacturing industries were lumber and timber products; boots and shoes, rubber; silk and silk goods; clothing, men's, factory product; and leather, tanned, curried, and finished.

In Wilkesbarre, the city sixteenth in rank in Table 4, but twentieth in rank in the state, the leading manufacturing industries were silk and silk goods; cotton goods; foundry and machine shop products; liquors, malt; and wirework, including wire rope and cable.

Table 5 presents the totals for the manufacturing industries of the 133 cities and boroughs withdrawn from the enumerators, places them in comparison with the totals for the entire state and the state exclusive of these cities and boroughs, and shows their rank in population and in value of products.

TABLE 5.—URBAN MANUFACTURES.

	Number of establishments.	Capital.	Proprietors and firm members.	Wage-earners. Average number.	Wage-earners. Total wages.	Miscellaneous expenses.	Cost of materials used.	Products. Value.	Products. Rank.	Products. Per cent of total.	Population. Total.	Population. Rank	Population. Per cent of total.

Per cent of urban manufactures to total for state	64.1	75.4	64.5	79.6	80.1	84.4	77.1	78.4	-------	-------	50.8	-------	-------

[1] Less than one-tenth of 1 per cent.

Of the 52,185 establishments in the state, 33,449, or 64.1 per cent, were located in these 133 cities and boroughs. They furnished employment to 583,923 wage-earners, or 79.6 per cent of the total number; and the value of their products, $1,437,923,545, formed 78.4 per cent of the total for the state.

Table 6 shows the totals for the state by counties.

Table 7 shows the totals for the state by specified industries.

Table 8 shows the totals for the cities and boroughs of Allegheny, Allentown, Altoona, Chester, Easton, Erie, Harrisburg, Johnstown, Lancaster, McKeesport, Newcastle, Norristown, Philadelphia, Pittsburg, Reading, Scranton, Shenandoah, Wilkesbarre, Williamsport, and York by specified industries.

Table 9 shows the totals for all industries in the cities and boroughs withdrawn from the enumerators, exclusive of those shown in Table 8.

TABLE 6.—MANUFACTURES

	COUNTIES AND MANUFACTURING AND MECHANICAL INDUSTRIES.	Number of establishments.	CAPITAL. Total.	Land.	Buildings.	Machinery, tools, and implements.	Cash and sundries.	Proprietors and firm members.	SALARIED OFFICIALS, CLERKS, ETC. Number.	Salaries.	AVERAGE NUMBER OF WAGE-EARNERS AND TOTAL WAGES. Total. Average number.	Wages.

RHODE ISLAND.

Table 1 shows the manufacturing and mechanical industries of the state of Rhode Island as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.						PER CENT OF INCREASE.				
	1900	1890	1880	1870	1860	1850	1890 to 1900	1880 to 1890	1870 to 1880	1860 to 1870	1850 to 1860
Number of establishments	4,189	3,377	2,205	1,850	1,191	864	24.0	53.2	19.2	55.3	37.8
Capital	$183,784,587	$126,483,401	$75,575,943	$66,557,322	$24,278,295	$12,935,676	45.3	67.4	13.6	174.1	87.7
Salaried officials, clerks, etc., number	4,433	[1] 4,865	(2)	(2)	(2)	(2)	[3] 8.9				
Salaries	$5,552,189	[1] $4,688,608					18.4				
Wage-earners, average number	98,813	81,111	62,878	49,417	32,490	20,967	21.8	29.0	27.2	52.1	55.0

Assessed value of real estate	[5] $320,318,384	$243,081,296	$188,224,459	$132,876,581	$83,778,204	$54,358,231	31.8	29.1	41.7	58.6	54.1
Value of land and buildings invested in manufactures [6]	$44,180,729	$28,274,887	(2)	(2)	(2)	(2)	56.8				
Per cent of assessed value	13.8	11.6									

[1] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 7.)
[2] Not reported separately.
[3] Decrease.
[4] Not reported.
[5] As given in Rhode Island Manual for 1900, page 288.
[6] Does not include value of rented property.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for governmental establishments and establishments with a product of less than $500, neither of which were reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS.		Miscellaneous expenses.	COST OF MATERIALS USED.				Value of products, including custom work and repairing.
				Average number.	Total wages.		Total.	Purchased in raw state.	Purchased in partially manufactured form.	Fuel, freight, etc.	
Total	4,558	$183,972,883	4,924	98,881	$41,139,729	$12,214,589	$96,447,570	$27,442,804	$65,281,796	$3,722,970	$184,223,066
Hand trades [1]	2,103	5,351,529	2,316	9,457	4,545,446	968,842	7,201,373	48,867	7,026,053	126,453	15,921,113
Governmental establishment	1	36,764		29	16,963	800	28,353		20,560	2,793	46,741
Establishments with a product of less than $500	368	151,532	388	39	8,682	14,506	31,556	2,897	26,749	1,910	101,947
All other establishments	2,086	178,433,058	2,220	89,356	36,568,638	11,230,441	89,191,288	27,391,040	58,208,434	3,591,814	168,153,265

[1] Includes bicycle and tricycle repairing, 84; blacksmithing and wheelwrighting, 302; boots and shoes, custom work and repairing, 264; carpentering, 238; clothing, men's, custom work and repairing, 189; clothing, women's, dressmaking, 223; dyeing and cleaning, 15; furniture, cabinetmaking, repairing, and upholstering, 62; lock and gun smithing, 21; masonry, brick and stone, 84; millinery, custom work, 148; painting, house, sign, etc., 214; paper hanging, 10; plastering and stuccowork, 6; plumbing, and gas and steam fitting, 144; sewing machine repairing, 1; taxidermy, 2; typewriter repairing, 2; watch, clock, and jewelry repairing, 94.

In addition to the 4,558 active establishments in the state during the census year, with a capital of $183,972,883, shown in Table 2, there were 13 idle establishments, with a capital of $605,565. Of the 4,558 establishments of all classes, 2,471, or 54.2 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments consists principally of the sums received for custom work and repairing, and amounted to $16,023,060, or only 8.7 per cent of the total value of the products for the state.

Comparative statistics for the 9 leading industries in Rhode Island are presented in Table 3.

TABLE 3.—COMPARATIVE SUMMARY OF NINE LEADING INDUSTRIES.

INDUSTRIES.	Year.	Number of establishments.	Capital.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.

Table 1 reveals the steady growth of the manufacturing industries of Rhode Island during the half century and demonstrates the preeminent position of the state as a center of productive industry. The percentage of increase in the number of manufacturing establishments has been double the percentage of increase in population. Equally striking has been the increase in the amount of capital invested, in the value of manufactured products, in the average number of wage-earners, and in the amount of wages paid.

The total population of the state in 1850 was 147,545, and in 1900, 428,556, an increase in the fifty years of 281,011, or 190.5 per cent. The average number of wage-earners employed in manufacturing establishments has increased from 20,967 in 1850 to 98,813 in 1900, an increase of 371.3 per cent in the fifty years, and embraced, in the latter year, 23.1 per cent of the entire population.

The greatest number of persons so employed at any one time during the year was 116,169, or 27.1 per cent of the total population, and this percentage is a more accurate indication of the proportion so employed. It is doubtful whether so large a share of the material wealth and resources of any other commonwealth can be attributed to the enterprise and skill of its citizens in the enlargement and extension of old established industries and the development of new forms of productive industry.

The period of greatest increase during the half century covered by Table 1 was that between 1860 and 1870. The increase between 1890 and 1900 has not been as marked as in some previous decades, but it has been sufficiently notable to demonstrate that Rhode Island is advancing under the modern methods of manufacture quite as rapidly as other states.

The factors that have contributed to this growth are

limited; it must be attributed to the early and successful establishment of the factory system, particularly in the cotton manufacture; to the natural tendency of one industry to stimulate the introduction of other industries; to the abundance of capital; and to the enterprise and skill of the citizens. Rhode Island possesses no natural resources which have materially aided in its development. There is but one railway system of any importance connecting the manufacturing centers of the state with the outside world, thus eliminating the advantages of competition in railroad freight rates. The state has a natural outlet by water in Providence River and Narragansett Bay, making one of the finest harbors on the New England coast, but the lack of proper dockage in Providence Harbor, the natural port for the outlet of the state's products, combined with a too shallow depth of water for ocean traffic, has deprived the manufacturers of any great benefit from geographical location. The coal and raw materials for the factories are transported long distances, and this fact renders more notable the preeminence of the state in certain of the finer products of iron and steel, such as textile and other mill machinery, machine tools, screws, etc.

While the manufactures of Rhode Island are widely diversified, there are particular branches in which the state has won a world-wide reputation. The fineness of its textiles, the wealth and beauty of its manufactures of gold and silver, the products of foundries and machine shops, the accuracy of its fine tools, in use in every quarter of the globe, the reputation its steam engines have acquired in manufacturing circles, and its enormous output of rubber boots and shoes, all combine to preserve and extend this reputation.

The history of the factory system in Rhode Island began in April, 1790, when a copartnership was established in Pawtucket for carrying on the spinning of cotton.[1] Samuel Slater, one of the partners, constructed a complete series of machines on which was made the first cotton thread spun by water power in the United States. Cotton spinning mills increased rapidly during the next twenty-five years, until in 1815 there were 140,000 spindles in use within a radius of 30 miles of Providence. The first calico printed in the United States was produced about 1794 in East Greenwich, and a large variety of the finer fabrics of cotton are now manufactured in the state. During the last decade, however, the number of cotton spindles in the state has slightly decreased. In 1890 there were 1,924,486 spindles as against 1,920,522 in 1900, a decrease of 3,964. Ranked according to the number of spindles employed, Rhode Island has held the second place in the cotton manufacture from the beginning of the industry in this country, Massachusetts standing first.[2] As shown in Table 3, the products of the cotton mills of the state amounted to $26,435,675 in 1900, as against a value of $27,310,499 in 1890. A large proportion of the cotton goods produced in Rhode Island is finished in dyeing and finishing mills, the product of which, being the value added to the goods by the final processes, has increased from $4,743,561 in 1890 to $8,484,878 in 1900, or nearly 78.9 per cent. The production of print cloths in the state increased from 76,634,732 yards, valued at $3,588,671 in 1890 to 99,272,574 yards, valued at $4,354,811 in 1900, and of fancy woven fabrics from 20,363,202 yards, valued at $2,004,668 to 21,554,243 yards, valued at $1,997,352. The manufacture of ginghams, of which 4,666,144 yards, valued at $418,789, were made in 1890, has been discontinued in the state, and the production of twills and sateens has remained about stationary. Corduroy, cotton velvets, plushes, and mosquito nettings, none of which were made in 1890, have now reached a production valued at nearly a million dollars.

The first attempt in Rhode Island to manufacture woolen goods by the factory system was made in 1804 at Peacedale, South Kingstown. In 1810 the number of mills was 12.[3] The first power loom to be employed in the United States in the production of woolen goods was installed at Peacedale in 1814.[4] The industry has steadily developed. For many decades Rhode Island ranked fifth among wool manufacturing states, advancing to third place in 1890, a position still retained. Several of the largest and most perfectly equipped worsted mills in the country are located within its borders.

The statistics of the industry indicate the continued rapid decrease of the production of woolen goods as distinguished from worsted goods, and an enormous increase in the production of the latter variety of wool fabrics. While the number of sets of woolen cards in the state has decreased from 572 in 1890 to 551 in 1900, the number of worsted combing machines in operation has increased from 195 to 290, and the number of worsted spindles from 144,271 to 316,820. The production of woolen, worsted, and cotton warp fabrics has increased from 37,409,898 square yards in 1890, valued at $25,827,738 to 50,168,111 square yards in 1900, valued at $28,146,346.

Table 3 shows that the textile industries are by far the most important in the state. The 218 establishments reported for these industries gave employment to 49,760 persons, or 50.4 per cent of the wage-earners in the entire state, and the value of the product was $78,133,258, or 42.4 per cent of the total value of all the products of the state. During the decade there was a net increase of 5 in the number of establishments engaged in the textile industries, while the capital increased $26,489,945, or 37.4 per cent. The number of wage-earners increased 2,203, or 4.6 per cent, and the wages paid increased $1,775,547, or 11.1 per cent, while the increase in product was $9,778,051, or 14.3 per cent. Under the head of textiles, worsted goods stand first in value of products, amounting to $33,341,329 for the year 1900; the value of cotton goods produced in

1900 being $26,435,675, while the remainder of textile products, amounting to $18,356,254, consisted of woolen goods, hosiery, knit goods, etc.

Rhode Island, and especially the city of Providence, has long been prominent in the manufacture of jewelry,[1] which, next to the textiles, is the most important industry in the state. All varieties and grades of jewelry are produced. The industry dates back to the Revolution, but it was the ingenuity of a Providence goldsmith in 1794 which firmly established it in that city. While manufacturers in Newark and New York city were turning out products of pure gold and silver, wrought by hand, Nehemiah Dodge invented a process for "filling" the gold with cheaper materials, and at about the same time applied machinery to the manufacture. The process by which this much cheaper product was obtained soon became known to other manufacturers in the city and was carried across the state line to Attleboro, Mass., a town which now rivals Providence in this industry. The reputation of Providence in this branch of manufactures attracted a skilled workman in the precious metals from Birmingham, England, in 1846, one Thomas H. Lowe, who improved the filling process, thus further reducing the cost of manufacture. In the year 1812 the jewelry manufactures of the city of Providence were valued at $100,000. In 1856 the product amounted to $2,696,000, while in the present census there are 214 establishments engaged in this industry, with a capital of $8,899,702 and giving employment to 7,162 wage-earners, having a product valued at $13,320,620. During the decade from 1890 to 1900 the capital employed in the industry increased from $6,095,971 to $8,899,702, or 46 per cent; the product from $8,011,067 to $13,320,620, or 66.3 per cent; and wages from $2,110,529 to $3,170,932, or 50.2 per cent. In the census of 1890 it appears that one-fifth of the product of the jewelry industry of the country was manufactured in the city of Providence. The cities next in importance were New York, Newark, and Philadelphia, but nearly as many employees were reported for Providence as for those three cities combined.

Allied to the jewelry manufacture is the manufacture of silverware. It was an apprentice of the founder of the jewelry industry who began the manufacture of silverware in Providence and founded what is now one of the largest establishments in this line of manufacture in the world. The census of 1890 shows that at that time nearly one-half of the silverware manufacturing of the United States was carried on in Rhode Island. There were 8 establishments in the state engaged in this industry in 1900, all located in Providence, with a capital of $5,127,714, an increase over 1890 of $2,125,482, or 70.8 per cent. These establishments give employment to 1,540 wage-earners, to whom $978,198 was paid in wages, and their product was valued at $3,834,498, an increase of $1,324,539 since 1890, or 52.8 per cent.

The refining of gold and silver sweepings is closely dependent upon the two industries just described. Until 1850 the material used in this industry was allowed to go to waste. There are 10 establishments in the state engaged in this industry, all located in Providence, with an invested capital of $505,957, and a product valued at $3,484,454.

The demand for machinery in the textile and jewelry factories of Rhode Island early stimulated the manufacture of machinery, an industry third in importance in the state. During the decade from 1890 to 1900 the capital invested in the foundries and machine shops increased from $11,377,475 to $16,403,935, or 44.2 per cent; the number of wage-earners, from 6,876 to 8,799, or 28 per cent; the total amount of wages, from $3,813,290 to $4,638,507, or 21.6 per cent; and the value of products, from $10,170,286 to $13,269,086, or 30.5 per cent. Included in this classification is the manufacture of engines and boilers, a specialty for which Providence has a world-wide reputation and in which its preeminence is partly due to the early application of steam to manufacturing in this state. In 1812 and 1814 several factories were equipped with engines brought from Philadelphia, but the great expense of transportation and the increasing demand induced local mechanics to embark in this manufacture, with the result that the first engine shop in the state was erected in 1826.[2]

In 1839 the manufacture of files was begun in Providence, but it was to the invention by a local mechanic in 1864 of machinery for this manufacture that the present importance of this industry in the city is due.[3] The product of the industry in 1900 amounted to $1,033,838.

The manufacture of rubber and elastic goods has also attained great importance, showing increases during the last decade as follows: Capital, from $358,764 to $1,631,869, or 354.9 per cent; average number of wage-earners, from 438 to 1,039, or 137.2 per cent; wages from $161,566 to $359,244, or 122.4 per cent; and products, from $629,000 to $2,518,268, or 300.4 per cent.

There were 6 establishments engaged in wholesale slaughtering and meat packing in 1900, with 199 wage-earners, and products valued at $2,410,466. In 1890 there were 10 establishments, 242 wage-earners, and products valued at $4,627,366. The decrease in the value of products during the decade was $2,216,900, or 47.9 per cent.

There were 47 establishments engaged in flour and grist milling in 1900, with 80 wage-earners, and products valued at $1,895,921. In 1890 there were 31 establishments, 98 wage-earners, and products valued at $1,349,843. The increase in the value of products during the decade was $546,078, or 40.5 per cent.

The manufacture of malt liquors, which is the last in

[1] The Providence Plantations for 250 Years, pages 331 and 334. The New England States, Vol. IV, page 2513. One Hundred Years of American Commerce, pages 590 and 592. Industrial History of the United States, A. S. Bolles, page 328.

[2] The Providence Plantations for 250 Years, page 244.

[3] The New England States, Vol. IV, page 2538. The Providence Plantations for 250 Years, page 244.

importance of the leading industries given in Table 3, shows the following increases during the ten years ending with 1900: Capital, from $287,500 to $3,338,276, or 1,061.1 per cent; average number of wage-earners, from 82 to 296, or 261 per cent; wages, from $50,900 to $223,712, or 339.5 per cent; and the value of products, from $436,846 to $1,880,171, or 330.4 per cent.

In addition to the industries enumerated in Table 3, for which comparative figures are available, special attention should be called to the manufacture of rubber boots and shoes and of electrical apparatus and supplies. There were one and two establishments, respectively, engaged in these industries in 1890 and their statistics, therefore, were included in the group of "All other industries" and can not be used for the purpose of comparison with the totals for 1900.

Six establishments were reported for the manufacture of rubber boots and shoes at the Twelfth Census, with a product valued at $8,034,417, and the industry ranked fourth in importance according to the value of its products.

The manufacture of electrical apparatus and supplies has increased very rapidly during the last decade. In 1900 there were 13 establishments reported, with a product valued at $5,113,292, giving the industry fifth rank according to the value of products.

URBAN MANUFACTURES.

There were 24 cities and towns in Rhode Island in which the manufacturing and mechanical industries were considered of sufficient importance to justify their withdrawal from the enumerators, and the appointment of special agents to collect the statistics. The manufacturing establishments located within the corporate limits of such places are considered "urban manufactures."

The presentation of statistics in detail for cities is confined to those having a population of 20,000 or over. There were 3 cities, namely, Pawtucket, Providence, and Woonsocket, and the town of Warwick, falling within this requirement and their statistics are presented in Table 8. While Newport has a population of 22,034, it is a residential city and its manufactures are comparatively insignificant.

The statistics for Pawtucket, Providence, and Woonsocket were published separately at the census of 1890, and Table 4 is a comparative summary, presenting the totals for each of the 3 cities, together with the per cent of increase during the decade, and also the per cent that the totals for these 3 cities formed of the total for the entire state at the two censuses.

TABLE 4.—COMPARATIVE SUMMARY, PAWTUCKET, PROVIDENCE, AND WOONSOCKET, 1890 AND 1900, WITH PER CENT OF INCREASE.

	Year.	Number of establishments.	Capital.	Wage-earners.		Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.

[1] Decrease.

As shown in Table 4 there has been a satisfactory increase during the last decade in the manufacturing industries of the 3 principal cities of the state. In Providence, the leading city, there were in 1900, 1,933 establishments, or 46.1 per cent of the entire number located within the state. These establishments had a combined capital amounting to $83,513,679, or 45.4 per cent of all the capital employed in the state. Of the wage-earners, 44,978, or 45.5 per cent of all in the state were employed in Providence. These wage-earners formed 25.6 per cent of the entire population of the city and 10.5 per cent of the population of the state. In 1900 the total amount of wages paid in Providence amounted to $19,998,362, or 48.6 per cent of all wages paid in the state. The value of products, including custom work and repairing, for the city during 1900 was $88,168,897, or 47.9 per cent of the total products of the state, while the combined value of the products of Pawtucket, Providence, and Woonsocket amounted to $127,876,764, or 69.5 per cent of the total products of the state. The proportion which the totals for these cities form of the total for the entire state has decreased, showing the rapid development of manufacturing in the outlying towns. In 1890 the number of establishments located in these 3 cities formed 74.2 per cent of

the total number in the state and in 1900, 64.7 per cent, while their wage-earners formed 66.7 per cent, wages 70.3 per cent, and the value of their products 72.6 per cent of the totals for 1890, the percentages having decreased to 67.8, 68.9, and 69.5 per cent, respectively, in 1900.

In order to show the extent of the concentration of the manufactures in the cities and the present totals for the urban industries, the totals for the 24 cities and towns withdrawn from the enumerators are given in Table 5. This table also places the totals for the cities and towns in comparison with the totals for the state and the state exclusive of these cities and towns, and shows their rank in population and in value of products.

TABLE 5.—URBAN MANUFACTURES.

Total for state exclusive of urban manufactures	151	12,450,820	151	5,050	1,998,705	825,193	3,850,043	8,376,102	-------	4.6	19,803	-------	4.6
Per cent of urban manufactures to total for state	96.4	93.2	96.7	94.9	95.1	93.2	96.0	95.4	-------	-------	95.4	-------	-------

It appears from Table 5 that practically all of the manufacturing establishments of the state are located within the corporate limits of the 24 cities and towns which were withdrawn from the enumerators and assigned to special agents. The urban manufactures constitute 96.4 per cent of the establishments in the state, 93.2 per cent of the capital, 94.9 per cent of the wage-earners, 95.1 per cent of the wages, and 95.4 per cent of the total value of products.

Of the towns, Warwick ranks first in value of products; the returns for 1900 showing a total of $6,197,506, a large percentage of this amount consisting of cotton goods.

East Providence ranks second with a production of $5,487,101, a large part of which consists of chemical products and electrical apparatus and supplies.

Burrillville with a product valued at $4,089,160, Central Falls with a product valued at $3,749,783, and Lincoln with a product valued at $3,743,875, rank next in importance in value of products. The chief industry in each of these 3 towns is the manufacture of cotton goods.

The products for the town of Bristol for 1900 amounted to $3,670,251. The town is famous for its yacht construction. The principal industries are shipbuilding and the manufacture of rubber goods.

The statistics of the 5 counties in Rhode Island are shown in Table 6. Providence county shows 3,182 establishments, or 76 per cent, with products valued at $159,317,811, or 86.6 per cent of the totals in the state. This great proportion is explained by the fact that the 3 large cities, namely, Pawtucket, Providence, and Woonsocket, are located in Providence county.

Kent county is second in importance, producing goods valued at $9,093,997 during the year ending May 31, 1900. The principal industries located in this county come under the head of textiles, and the greater part of the manufactured products are cotton goods.

The detailed statistics of the census of 1900 are presented in the 4 tables which follow.

Table 6 shows the totals for the state by counties.

Table 7 shows the totals for the state by specified industries.

Table 8 shows the totals for the cities of Pawtucket, Providence, and Woonsocket, and the town of Warwick by specified industries.

Table 9 shows the totals for all industries in the cities and towns withdrawn from the enumerators, exclusive of those shown in Table 8.

SOUTH CAROLINA.

Table 1 shows the manufacturing and mechanical industries of the state of South Carolina as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by the manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.						PER CENT OF INCREASE.				
	1900	1890	1880	1870	1860	1850	1890 to 1900	1880 to 1890	1870 to 1880	1860 to 1870	1850 to 1860
Number of establishments	3,762	2,382	2,078	1,584	1,230	1,430	57.9	14.6	31.2	28.8	[1]14.0
Capital	$67,356,465	$29,276,261	$11,205,894	$5,400,418	$6,931,756	$6,053,265	130.1	161.3	107.5	[1]22.1	14.5

[1] Decrease.
[2] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 7.)
[3] Not reported separately.
[4] Not reported.
[5] As given in the Report of the Comptroller-General of the State of South Carolina, for the year 1900, page 145.
[6] Does not include value of rented property.

Although South Carolina is an agricultural state, Table 1 shows that there has been a considerable growth in its manufacturing and mechanical industries during the half century. The population during these years increased from 668,507 to 1,340,316, or 100.5 per cent, while the average number of wage-earners employed in manufacturing establishments increased from 7,066 to 48,135, or 581.2 per cent, embracing, in 1900, 3.6 per cent of the entire population, compared with 1.1 per cent in 1850. Probably the best indication of the importance of the wage-earning class is afforded by the greatest number employed at any one time during the year. In 1900 this was 62,908, or 4.7 per cent of the total population of the state. Measured by the value of products, the greatest percentage of increase, 90.7, was during the decade ending with 1890, although the greatest absolute increase was between the years 1890 and 1900.

South Carolina produces the raw material needed for several industries, and possesses excellent facilities for marketing products. Sailing and steam vessels, with a total tonnage of 86,757, engaged in foreign trade, cleared from the harbors of Charleston and Beaufort during the census year.[1] The Savannah River is navigable for 158 miles; the Santee, for its entire length; the Pedee, for 120 miles; the Congaree, nearly to the city of Columbia; and the Wateree, to Camden. The value placed upon water communication is indicated by the expenditure by the state, between the years 1816 and 1826, of $1,712,626 upon internal improvements, a large part of which amount was appropriated for building canals around the rapids of 5 of its rivers.[2] Since 1878, $6,063,692 has been expended by the United States Government upon 7 rivers and 3 harbors, and further improvements are contemplated.[3] The abundant waterpower, chiefly in the Piedmont region, in 1880 estimated to exceed 300,000 horsepower,[4] was neglected for years, but has been greatly developed during the past decade. In three instances electricity generated by waterpower is successfully transmitted to points where it has been found advantageous to locate mills. The first extensive use of electrically transmitted power in cotton manufacturing in the United States was made, it is claimed, at Columbia, where 1,340 horsepower is now developed, and the second, with 3,000 horsepower, at

Pelzer.[1] Coal is not mined in South Carolina, but the development of the Alabama fields in recent years[2] has benefited manufacturers dependent upon steam for power.

Table 1 shows that the number of children employed in manufacturing increased 270.7 per cent during the last decade, while the number of men increased only 79 per cent. There is no statute fixing the minimum age at which children may work in the mills, and, in some instances, such employees are under 12 years of age.[3] Many of the mills, however, have reading rooms and libraries for the use of their employees,[4] and nearly all contribute regularly to the support of the local schools. Answers from 65 cotton mills in 1901 show that they had invested $86,164 in school buildings and equipment, for the support of which they paid $44,802 in taxes annually, and $27,512 in special contributions, and the average school term in these localities was 8.86 months, or twice that in the other portions of the state.[5] The importance of technical education is much appreciated, and an agricultural and industrial college for boys and an industrial school for girls have been established during the last decade.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for governmental establishments, educational and eleemosynary institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS.		Miscellaneous expenses.	COST OF MATERIALS USED.				Value of products, including custom work and repairing.
				Average number.	Total wages.		Total.	Purchased in raw state.	Purchased in partially manufactured form.	Fuel, freight, etc.	
Total	7,930	$70,056,299	8,625	55,117	$9,633,651	$3,151,237	$34,284,482	$21,891,507	$10,763,983	$1,628,992	$59,682,110
Hand trades[1]	785	840,607	877	1,597	465,604	104,886	1,081,801	172	1,049,738	31,891	2,323,574
Governmental establishments	2	901,603	--------	107	48,467	----------	27,867	600	24,198	3,069	89,311
Educational and eleemosynary institutions	3	13,800	1	7	3,140	381	15,598	1,490	12,189	1,919	23,627
Establishments with a product of less than $500	4,163	1,784,431	4,536	6,868	126,144	39,269	213,222	57,538	154,230	1,454	820,441
All other establishments	2,977	66,515,858	3,211	46,538	8,990,296	3,006,701	32,945,994	21,831,707	9,523,628	1,590,659	56,425,157

[1] Includes bicycle and tricycle repairing, 43; blacksmithing and wheelwrighting, 316; boots and shoes, custom work and repairing, 81; carpentering, 40; clothing, men's, custom work and repairing, 43; clothing, women's, dressmaking, 36; dyeing and cleaning, 6; furniture, cabinetmaking, repairing, and upholstering, 25; lock and gun smithing, 13; masonry, brick and stone, 2; millinery, custom work, 79; painting, house, sign, etc., 17; plumbing, and gas and steam fitting, 16; sewing machine repairing, 2; watch, clock, and jewelry repairing, 66.

Of the 7,930 establishments of all classes shown in this table, 4,948, or 62.4 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $3,144,015, or only 5.3 per cent of the total value of the products of the state.

In addition to the 7,930 active establishments in the state during the census year, with a capital of $70,056,299, shown in Table 2, there were 58 idle establishments, with a capital of $115,115, divided as follows:

INDUSTRIES.	Number of idle establishments.	Capital.	INDUSTRIES.	Number of idle establishments.	Capital.
Brick and tile	3	$9,220	Lumber and timber products	7	$19,485
Chemicals	1	41,500	Lumber, planing mill products, including sash, doors, and blinds	2	5,750
Cotton, ginning	34	18,478	All other industries	5	5,592
Flouring and grist mill products	5	10,090			
Hosiery and knit goods	1	5,000			

The 8 leading industries of the state in 1900, as shown by Table 3, embraced 1,640 establishments, or 43.6 per cent of the total number in the state; used a capital of $58,538,373, or 86.9 per cent of the total; gave employment to 39,066 wage-earners, or 81.2 per cent of the total number; and paid $6,965,935, or 73.7 per cent of the total wages. The value of their products was $48,041,940, or 81.8 per cent of the total. In the discussion of Table 3 these industries are ranked with reference to the value of their products.

TABLE 3.—COMPARATIVE SUMMARY OF EIGHT LEADING INDUSTRIES.

INDUSTRIES.	Year.	Number of establishments.	Capital.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.
Total for selected industries for state	1900	1,640	$58,538,373	39,066	$6,965,935	$2,472,263	$29,272,774	$48,041,940
	1890	1,169	21,771,113	15,565	3,008,722	1,278,679	14,301,942	21,927,098
Increase, 1890 to 1900	--------	471	36,767,260	23,501	3,957,213	1,193,584	14,970,832	26,114,842
Per cent of increase	--------	40.3	168.9	151.0	131.5	93.3	104.7	119.1
Per cent of total of all industries in state	1900	43.6	86.9	81.2	73.7	79.5	86.0	81.8
	1890	49.1	74.4	68.4	55.0	71.3	75.8	68.7
Cotton goods	1900	80	39,258,946	30,201	5,066,840	1,507,824	17,263,882	29,723,919
	1890	34	11,141,833	8,071	1,510,494	528,208	6,819,320	9,800,798
Fertilizers	1900	22	10,505,043	1,772	479,449	675,589	3,107,710	4,882,506
	1890	20	5,920,218	1,102	386,385	490,335	2,754,407	4,417,658
Flouring and grist mill products	1900	556	652,553	281	70,458	15,742	1,958,658	2,347,790
	1890	512	984,791	630	86,416	31,854	1,726,896	2,083,126
Lumber and timber products	1900	729	5,187,727	4,585	897,899	107,445	2,629,805	5,207,184
	1890	352	1,848,155	2,590	420,588	93,717	996,289	2,146,750
Lumber, planing mill products, including sash, doors, and blinds	1900	53	412,128	495	146,539	20,042	621,831	1,016,328
	1890	27	350,471	370	132,017	16,606	396,242	711,838
Oil, cottonseed and cake	1900	50	1,959,872	734	143,932	127,462	2,362,837	3,103,425
	1890	17	565,372	416	56,354	59,136	740,605	927,772
Rice, cleaning and polishing	1900	18	293,385	112	25,243	9,862	856,790	973,132
	1890	6	354,400	143	37,700	26,767	190,800	315,056
Turpentine and rosin	1900	132	268,719	886	135,575	8,297	471,261	787,656
	1890	201	605,873	2,243	378,768	32,056	677,383	1,524,100

Table 3 shows that the manufacture of cotton goods is the most important industry in the state. The 80 establishments reported in 1900 gave employment to 30,201 wage-earners, or 62.7 per cent of the wage-earners employed in the state, and the products were valued at $29,723,919, or 50.6 per cent of the total value of the products of the state. In 1890 there were 34 establishments, 8,071 wage-earners, and products valued at $9,800,798. The increase in the value of products during the decade was $19,923,121, or 203.3 per cent.

Cotton manufacturing in South Carolina dates back nearly to the colonial period, but it is only during the last two decades that the remarkable advantages of the state for this industry have been demonstrated. A factory for weaving cotton homespun was established at Murray's Ferry, in Williamsburg county, by Scotch-Irish settlers, some years previous to 1790.[1] In 1860 there were 17 mills in the state, with products valued at $713,050; in 1870 there were 12 mills, with products valued at $1,529,937; and in 1880 the number of mills had increased to 14 and the value of products to $2,895,769. In the value of its cotton-mill products South Carolina, in 1870, 1880, and 1890, ranked second among the Southern states, Georgia ranking first, and among all the states in 1900 became second only to Massachusetts. During the decade from 1890 to 1900, the absolute increase in the value of its cotton-mill products was greater than that of any other state. As a rule, only the coarser grades of cotton goods are manufactured, and large quantities have been exported to China in recent years. A beginning has been made in the construction of mills which will gin the cotton, crush the seed, extract the oil, and manufacture the fiber into cloth. A plant of this kind, having a spinning capacity of 3,000 bales of cotton a year, has been erected at Edgefield. Three causes have contributed to the remarkable growth in the manufacture of cotton goods in South Carolina: abundant waterpower, low cost of living, and accessibility to the raw material. The superiority, in each of these particulars, of the Piedmont region, in the central and western parts of the state, has led to the construction in that section of the largest number of mills—Columbia, Union, Pelzer, Anderson, and Clifton being important centers. There were 876,545 commercial bales of cotton grown in South Carolina during the year 1899,[2] while the consumption of the local mills during the census year 1899–1900 was 485,024 bales. In spite of this large surplus in excess of local consumption, 119,100 bales of cotton were brought into the state during the census year, for the use of its mills, from North Carolina, Georgia, Alabama, and Mississippi.[3]

The manufacture of lumber and timber products ranks second among the industries of the state, with 729 establishments, 4,585 wage-earners, and products valued at $5,207,184. In 1890 there were 352 establishments, 2,590 wage-earners, and products valued at $2,146,750. The increase in the value of products during the decade was $3,060,434, or 142.6 per cent. Lumbering has always been an important industry in South Carolina. The state includes a part of the great longleaf pine forest of the South. Cypress, which ranks second in importance, is found chiefly in marshes and waste places, where it attains

[2] See special report on Cotton Ginning, 1899.

[3] Department of Agriculture: The Cotton Crop of 1899–1900 page 19.

great size. Staves were for years the leading export.[1] During the census year the lumber industry was carried on largely in Berkeley, Lexington, Darlington, and Williamsburg counties, in the eastern and central parts of the state.

There were 22 establishments engaged in the manufacture of fertilizers in 1900, the industry third in rank, with 1,772 wage-earners, and products valued at $4,882,506. In 1890 there were 20 establishments, 1,102 wage-earners, and products valued at $4,417,658. The increase in the value of products during the decade was $464,848, or 10.5 per cent. The phosphate rock of South Carolina has long been famous; it was discovered in 1837 by Prof. Francis S. Holmes, who, however, was not able to demonstrate its value until 1867.[2] The first phosphate mining and manufacturing company was formed in that year, and for over twenty years the state was the chief source of the world's supply. In 1888 phosphate rock was discovered in Florida,[3] and the production there in 1899 was more than double that of South Carolina.[4] But South Carolina's large production of cottonseed meal, which is often combined with ground phosphate rock, and the large local demand for fertilizers in the growing of cotton, have enabled its fertilizer industry to hold its own.

There were 50 establishments engaged in the manufacture of cottonseed oil and cake in 1900, with 734 wage-earners, and products valued at $3,103,425. In 1890 there were 17 establishments, 416 wage-earners, and products valued at $927,772. The increase in the value of products during the decade was $2,175,653, or 234.5 per cent. This industry appeared in 1890 for the first time in the manufacturing statistics of South Carolina. In 1880 cottonseed was used almost exclusively as a fertilizer, but by 1883, 3 mills for the extraction of oil from the seed had been built, and the price of the seed rose from 10 or 12 cents per bushel to 18 cents.[5] The industry has developed extensively, although, of the 418,553 tons of seed grown in the state during the census year, 156,642 tons, or only 37.4 per cent, were crushed for oil extraction. Much of the seed which does not reach the oil mill is still used as a fertilizer.

There were 556 establishments engaged in the manufacture of flouring and grist mill products in 1900, with 281 wage-earners, and products valued at $2,347,790. In 1890 there were 512 establishments, 630 wage-earners, and products valued at $2,083,126. The increase in the value of products during the decade was $264,664, or 12.7 per cent. There were 3 merchant mills in South Carolina before the year 1800, located on Pinetree Creek. One of these had a daily capacity of 50 barrels of flour.[6] In 1870 and 1880 flour and grist milling was the leading industry in the state, using, in the latter year, nearly one-half of the waterpower developed for manufacturing purposes, and reporting products valued at $3,779,470. The industry has declined, and the production is no longer sufficient for local needs, Charleston being principally dependent upon the West for its supply of flour.[7]

There were 53 establishments engaged in the manufacture of planing mill products in 1900, with 495 wage-earners, and products valued at $1,016,328. In 1890 there were 27 establishments, 370 wage-earners, and products valued at $711,838. The increase in the value of products during the decade was $304,490, or 42.8 per cent.

There were 18 establishments engaged in the cleaning and polishing of rice in 1900, with 112 wage-earners, and products valued at $973,132. In 1890 there were 6 establishments, 143 wage-earners, and products valued at $315,056. The increase in the value of products during the decade was $658,076, or 208.9 per cent. More rice is grown on the extensive tidal marshes of South Carolina than in any other state, Louisiana excepted.[8] Rice culture began in South Carolina in 1694, the seed having been brought from Madagascar.[9] Rice, when gathered, is covered with a thick hull. This is broken off by pounding, and the fine powder which remains attached to the grains is removed by means of rotary brushes.[10] The power machines invented for this purpose in South Carolina have served as models, it is said, for the machines now used in this industry the world over.[11]

There were 132 establishments engaged in the manufacture of turpentine and rosin in 1900, with 886 wage-earners, and products valued at $787,656. In 1890 there were 201 establishments, 2,243 wage-earners, and products valued at $1,524,100. The decrease in the value of products during the decade was $736,444, or 48.3 per cent. This decrease is due to the partial exhaustion of the forests. The value of products reported in 1900 is only slightly greater than that shown for 1870.

Table 4 shows the totals for the manufacturing and mechanical industries of the city of Charleston, as returned at the censuses of 1880, 1890, and 1900, with the percentages of increase.

TABLE 4.—COMPARATIVE SUMMARY, CHARLESTON, 1880, 1890, AND 1900, WITH PER CENT OF INCREASE.

	DATE OF CENSUS.			PER CENT OF INCREASE.	
	1900	1890	1880	1890 to 1900	1880 to 1890
Number of establishments	364	566	194	[1]35.7	191.8
Capital	$12,473,187	$7,345,459	$1,718,300	69.8	327.5
Wage-earners, average number	5,027	4,684	2,146	7.3	118.3
Total wages	$1,489,966	$1,779,789	$639,030	[1]16.3	178.5
Miscellaneous expenses	$796,573	$464,172	([2])	71.6	-------
Cost of materials used	$5,633,578	$4,753,396	$1,468,375	18.5	223.7
Value of products, including custom work and repairing	$9,562,387	$9,005,421	$2,732,590	6.2	229.6

[1] Decrease. [2] Not reported.

It appears from Table 4 that the number of establishments in the city of Charleston decreased during the decade ending with 1900 from 566 to 364, or 35.7 per cent, while the average number of wage-earners increased from 4,684 to 5,027, or 7.3 per cent, and the value of products increased from $9,005,421 to $9,562,387, or 6.2 per cent. The number of establishments, number of wage-earners, and value of products, in this city in 1900, constituted 9.7, 10.4, and 16.3 per cent, respectively, of the totals for the state.

Table 5 presents the totals for the manufacturing industries of the 12 cities and towns withdrawn from the enumerators, places them in comparison with the totals for the entire state and the state exclusive of these cities and towns, and shows their rank in population and in value of products.

Of the 3,762 establishments in the state, 836, or 22.2 per cent, were located in these 12 cities and towns. The capital reported for these establishments was $27,770,884, or 41.2 per cent of that for the entire state. They furnished employment to 16,231 wage-earners, or 33.7 per cent of the total number, and the value of their products, $23,014,527, formed 39.2 per cent of the total for the state.

Table 6 shows the totals for the state by counties.

Table 7 shows the totals for the state by specified industries.

Table 8 shows the totals for the cities of Charleston and Columbia by specified industries.

Table 9 shows the totals for all industries in the cities and towns withdrawn from the enumerators, exclusive of those shown in Table 8.

SOUTH DAKOTA.

Prior to November 2, 1889, South Dakota was a part of the territory of Dakota; therefore, the Eleventh Census (1890) was the first in which the statistics for the state were published separately.

Table 1 shows the manufacturing and mechanical industries of the state as returned at the censuses of 1890 and 1900, inclusive, with the percentages of increase for the decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1890 AND 1900, WITH PER CENT OF INCREASE FOR THE DECADE.

	1900	1890	Per cent of increase.		1900	1890	Per cent of increase.
Number of establishments	1,639	499	228.5	Miscellaneous expenses	$471,528	$268,214	75.8
Capital	$7,578,895	$3,207,796	136.3	Cost of materials used	$7,827,110	$3,523,840	122.1
Salaried officials, clerks, etc., number	311	[1] 411	[2] 24.3	Value of products, including custom work and repairing	$12,231,239	$5,682,748	115.2
Salaries	$184,233	[1] $265,725	[2] 30.7				
Wage-earners, average number	3,121	2,011	55.2				
Total wages	$1,544,409	$832,693	85.5	Total population	[3] 383,887	328,808	16.8
Men, 16 years and over	2,776	1,846	50.4	Wage-earners engaged in manufactures	3,121	2,011	55.2
Wages	$1,471,626	$795,676	85.0	Per cent of total population	0.8	0.6	
Women, 16 years and over	231	129	79.1	Assessed value of real estate	[4] $132,562,815	$101,878,719	30.8
Wages	$55,263	$33,344	65.7	Value of land and buildings invested in manufactures [5]	$2,180,472	$834,997	161.1
Children, under 16 years	114	36	216.7	Per cent of assessed value	1.6	0.8	
Wages	$17,520	$3,673	377.0				

[1] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 5.)
[2] Decrease.
[3] Exclusive of 17,683 Indians and other persons on Indian reservations, which classes were not included at previous censuses.
[4] As given in the report of the auditor of South Dakota for 1900.
[5] Does not include the value of rented property.

While Table 1 shows a large increase in the manufacturing and mechanical industries of the state, agriculture and mining are the principal pursuits. Manufacturing is limited almost entirely to the so-called neighborhood industries, and practically the entire product is consumed at or near the point of production.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for a governmental establishment and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	COST OF MATERIALS USED. Total.	COST OF MATERIALS USED. Purchased in raw state.	COST OF MATERIALS USED. Purchased in partially manufactured form.	COST OF MATERIALS USED. Fuel, freight, etc.	Value of products, including custom work and repairing.
Total	1,926	$7,700,890	2,038	3,138	$1,548,068	$477,334	$7,858,261	$5,125,591	$2,079,092	$653,578	$12,309,233
Hand trades[1]	718	834,180	821	835	379,619	82,373	812,206	22,102	739,125	50,979	1,877,086
Governmental establishment	1	7,400	-------	2	1,140	-------	4,945	4,260	25	660	5,960
Establishments with a product of less than $500	286	114,595	306	10	2,519	5,806	26,206	1,462	24,744	-------	72,034
All other establishments	921	6,744,715	911	2,286	1,164,790	389,155	7,014,904	5,097,767	1,315,198	601,939	10,354,153

[1] Includes bicycle and tricycle repairing, 17; blacksmithing and wheelwrighting, 281; boots and shoes, custom work and repairing, 49; carpentering, 64; clothing, men's, custom work and repairing, 57; clothing, women's, dressmaking, 22; dyeing and cleaning, 3; furniture, cabinetmaking, repairing, and upholstering, 10; lock and gun smithing, 4; masonry, brick and stone, 17; millinery, custom work, 82; painting, house, sign, etc., 24; paper hanging, 3; plastering and stuccowork, 9; plumbing, and gas and steam fitting, 17; watch, clock, and jewelry repairing, 59.

Of the 1,926 establishments of all classes shown in this table, 1,004, or 52.1 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $1,949,120, or only 15.8 per cent of the total value of the products of the state.

In addition to the 1,926 active establishments in the state during the census year, with a capital of $7,700,890, shown in Table 2, there were 12 idle establishments, with a capital of $105,645.

Table 3 presents the totals for the manufacturing industries of the 2 cities withdrawn from the enumerators and places them in comparison with the totals for the entire state and the state exclusive of these cities.

TABLE 3.—URBAN MANUFACTURES.

	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.
Total for state	1,639	$7,578,895	1,732	3,121	$1,544,409	$471,528	$7,827,110	$12,231,239
Total for urban manufactures	216	1,265,710	251	725	351,935	193,262	730,351	1,762,147
Sioux Falls	148	1,047,899	170	586	288,919	159,694	563,376	1,411,411
Yankton	68	217,811	81	139	63,016	33,568	166,975	350,736
Total for state exclusive of urban manufactures	1,423	6,313,185	1,481	2,396	1,192,474	278,266	7,096,759	10,469,092
Per cent of urban manufactures to total for state	13.2	16.7	14.5	23.2	22.8	41.0	9.3	14.4

Of the 1,639 establishments in the state, 216, or 13.2 per cent, were located in these 2 cities. They furnished employment to 725 wage-earners, or 23.2 per cent of the total number, and the value of their products, $1,762,147, formed 14.4 per cent of the total for the state.

Table 4 shows the totals for the state by counties.

Table 5 shows the totals for the state by specified industries.

Table 6 shows the totals for the cities withdrawn from the enumerators.

TABLE 4.—MANUFACTURES

[No manufactures reported from the following counties: Armstrong, Boreman,

	COUNTIES.	Number of establishments.	CAPITAL. Total.	Land.	Buildings.	Machinery, tools, and implements.	Cash and sundries.	Proprietors and firm members.	SALARIED OFFICIALS, CLERKS, ETC. Number.	Salaries.	AVERAGE NUMBER OF WAGE-EARNERS AND TOTAL WAGES. Total. Average number.	Wages.

TENNESSEE.

Table 1 shows the manufacturing and mechanical industries of the state of Tennessee as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.						PER CENT OF INCREASE.				
	1900	1890	1880	1870	1860	1850	1890 to 1900	1880 to 1890	1870 to 1880	1860 to 1870	1850 to 1860

Per cent of assessed value	7.0	4.7									

[1] Decrease.
[2] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 7.)
[3] Not reported separately.
[4] Not reported.
[5] As given in the Biennial Report of the Comptroller of the Treasury of the State of Tennessee, 1899–1900.
[6] Does not include value of rented property.

Table 1 shows that there has been a large growth in the manufacturing and mechanical industries of Tennessee during the half century. The population during these years increased from 1,002,717 to 2,020,616, or 101.5 per cent, while the average number of wage-earners employed in manufacturing establishments increased from 12,039 to 50,504, or 319.5 per cent, embracing, in 1900, 2.5 per cent of the entire population, compared with 1.2 per cent in 1850. Probably the best indication of the importance of the wage-earning class is afforded by the greatest number employed at any one time during the year. In 1900 this was 73,364, or 3.6 per cent of the total population of the state. Although the greatest percentage of increase in the value of products, 95.2, is shown for the decade ending with 1890, the greatest absolute increase, $35,789,279, occurred during the decade ending with 1900.

The manufactures of Tennessee are based largely upon natural resources. Since 1880 the increase in the more important manufactures has been marked. Mineral deposits—including iron and copper ores and coal—largely neglected until within the last twenty-five years, are the chief causes of this growth. Fields of coal of excellent coking quality underlie 5,100 square miles of the state, and the production in 1899 amounted to 3,330,659 short tons,[1] or nearly twice the production of 1889. In 1899 Tennessee ranked thirteenth among the states in coal production.

Tennessee is traversed by several trunk railways. In 1900 its mileage aggregated 3,137 miles, or 7.51 miles per 100 square miles of territory, as compared with an average of 6.51 miles for the United States.[2] The state has also several navigable rivers. The Mississippi River, its western boundary, furnishes communication with the entire Mississippi Valley. Manufactures are fairly well distributed and diversified, those based upon grain and lumber predominating in the central and western sections, and those based upon minerals in the eastern part.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for eleemosynary and penal institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS.		Miscellaneous expenses.	COST OF MATERIALS USED.				Value of products, including custom work and repairing.
				Average number.	Total wages.		Total.	Purchased in raw state.	Purchased in partially manufactured form.	Fuel, freight, etc.	
Total	12,892	$73,058,723	15,242	52,552	$16,702,326	$6,278,929	$64,214,331	$29,690,075	$30,447,252	$4,077,004	$109,315,485
Hand trades[1]	2,308	2,857,500	2,758	4,755	1,947,721	600,579	3,371,809	41,114	3,222,519	108,176	8,280,691
Eleemosynary and penal institutions	5	69,700	-------	3	1,140	502	39,517	28,847	10,390	280	96,736
Establishments with a product of less than $500	4,871	1,174,985	5,424	2,045	53,548	42,870	317,303	95,488	220,544	1,271	1,074,184
All other establishments	5,708	68,956,538	7,060	45,749	14,699,917	5,634,978	60,485,702	29,524,626	26,993,799	3,967,277	99,863,874

[1] Includes bicycle and tricycle repairing, 35; blacksmithing and wheelwrighting, 1,007; boots and shoes, custom work and repairing, 196; carpentering, 183; clothing, men's, custom work and repairing, 141; clothing, women's, dressmaking, 77; dyeing and cleaning, 39; furniture, cabinetmaking, repairing, and upholstering, 80; lock and gun smithing, 26; masonry, brick and stone, 29; millinery, custom work, 193; painting, house, sign, etc., 72; paper hanging, 10; plastering and stuccowork, 9; plumbing, and gas and steam fitting, 66; sewing machine repairing, 4; watch, clock, and jewelry repairing, 141.

Of the 12,892 establishments of all classes shown in this table, 7,179, or 55.7 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $9,354,875, or only 8.6 per cent of the total value of the products of the state.

In addition to the 12,892 active establishments in the state during the census year, with a capital of $73,058,723, shown in Table 2, there were 128 idle establishments, with a capital of $1,469,568, divided as follows:

INDUSTRIES.	Number of idle establishments.	Capital.	INDUSTRIES.	Number of idle establishments.	Capital.
Brick and tile	15	$220,866	Leather, tanned, curried, and finished	5	$39,673
Cars, steam railroad, not including operations of railroad companies	1	556,426	Lumber and timber products	24	74,813
Cotton, ginning	20	22,592	Marble and stone work	1	13,000
Flouring and grist mill products	14	20,753	Pottery, terra cotta, and fire-clay products	2	4,600
Foundry and machine shop products	1	14,500	Tobacco, stemming and rehandling	1	10,750
Ice, manufactured	3	31,575	Woolen goods	3	3,725
Iron and steel	3	450,650	All other industries	35	5,645

TABLE 3.—COMPARATIVE SUMMARY OF TEN LEADING INDUSTRIES.

	1890	5	8,225	30	3,432	1,238	31,837	39,032

The 10 leading industries of the state in 1900, as shown in Table 3, embraced 3,792 establishments, or 47.3 per cent of the total number in the state; used a capital of $44,322,064, or 61.7 per cent of the total; gave employment to 28,636 wage-earners, or 56.7 per cent of the total number; and paid $9,150,779, or 55 per cent of the total wages. The value of their products was $67,623,165, or 62.5 per cent of the total. In the discussion of Table 3, which follows, these industries are ranked with reference to the value of their products.

Table 3 shows that the manufacture of flouring and grist mill products is the most important industry in the state. The 1,618 establishments reported in 1900 gave employment to 1,154 wage-earners, or 2.3 per cent of the wage-earners employed in the state, and the products were valued at $21,798,929, or 20.3 per cent of the total value of the products of the state. In 1890 there were 918 establishments, 1,417 wage-earners, and products valued at $12,474,284. The increase in the value of products during the decade was $9,324,645, or 74.8 per cent. Tennessee has good waterpower and excellent distributing facilities. Flour and grist mills are found in all parts of the state, though Nashville is the chief center of the industry. Knoxville is the milling center of the eastern section of the state, and the industry is rising into importance at Memphis.

The manufacture of lumber and timber products ranks second among the industries of the state, with 1,732 establishments, 11,192 wage-earners, and products valued at $18,127,784. In 1890 there were 820 establishments, 7,424 wage-earners, and products valued at $9,073,686. The increase in the value of products during the decade was $9,054,098, or 99.8 per cent. The forests of Tennessee contain many species of trees, and are among the best in the United States. The most valuable timbers in the eastern part of the state include oak, ash, hickory, maple, poplar, and chestnut. The Tennessee River and its tributaries bring the logs from the mountains down to Chattanooga and Bristol, which are leading manufacturing points. Nashville is the principal lumber manufacturing city in the central part of the state. Poplar, the timber most used there, is found in comparative abundance in the northern and central counties of eastern and central Tennessee, and in the river counties of western Tennessee. It is adapted to all purposes of house building, both for construction and outside and inside finish. Oak ranks next in importance. Ash is used for the inside finish of houses and for the manufacture of agricultural implements. For the latter purpose it ranks next to hickory, which is used almost exclusively for wagons, carriages, and handles. The scarcity of walnut and cherry has led to the increasing use of oak, maple, birch, sycamore, and poplar in the manufacture of furniture. Quantities of these timbers are shipped to other states of the Union, to Canada and Mexico, and to Great Britain and other European countries. Memphis is the headquarters of the lumber manufacture in western Tennessee. The chief varieties cut in this section are poplar, white oak, ash, hickory, sycamore, and cypress. Much of it is shipped to the North in the form of planks and staves.

There were 16 establishments engaged in 1900 in the manufacture of iron and steel, the industry third in rank, with 1,979 wage-earners, and products valued at $5,080,624. In 1890 there were 15 establishments, 1,472 wage-earners, and products valued at $4,247,868. The increase in the value of products during the decade was $832,756, or 19.6 per cent. This industry has been stimulated by abundant deposits of fuel and ore. Coking coal of excellent quality is found in the Cumberland region, the state in 1899 being sixth in rank among the coke-producing states, with a production of 380,525 short tons. This was an increase of 23,561 tons, or 6.6 per cent, over the production of 1889.[1] The three chief iron-producing districts correspond, in a general way, to the location of the iron ore deposits. The eastern district comprises the counties of Johnson, Sullivan, and Washington; the Chattanooga district, the most important of the three, includes the counties of Roane, Rhea, Hamilton, Marion, and Franklin; and the central district embraces the counties of Montgomery, Stewart, Dickson, Hickman, Lewis, Lawrence, and Wayne. The

[1] See special report on Coke.

furnaces in the last-named district rely chiefly upon charcoal, though some of them have recently begun the use of coke.

There were 97 establishments engaged in the manufacture of foundry and machine shop products in 1900, with 3,282 wage-earners, and products valued at $4,479,489. In 1890 there were 68 establishments, 2,620 wage-earners, and products valued at $4,427,187. The increase in the value of products during the decade was $52,302, or 1.2 per cent.

There were 72 establishments engaged in the manufacture of textiles in 1900, with 4,251 wage-earners, and products valued at $3,907,279. In 1890 there were 69 establishments, 3,051 wage-earners, and products valued at $3,724,138. The increase in the value of products during the decade was $183,141, or 4.9 per cent. Tennessee possesses facilities for the ordinary textile manufactures, the eastern section being well adapted to the production of wool. Knoxville has a large woolen mill, and small woolen mills are scattered over the eastern and central sections. No factories for the manufacture of hosiery and knit goods were reported in 1890; in 1900 there were 4.

There were 16 establishments engaged in car construction and general shop work of steam railroad companies in 1900, with 2,817 wage-earners, and products valued at $3,113,053. In 1890 there were 10 establishments, 1,772 wage-earners, and products valued at $1,605,778. The increase in the value of products during the decade was $1,507,275, or 93.9 per cent.

There were 92 establishments engaged in the manufacture of tobacco in 1900, with 1,237 wage-earners, and products valued at $3,010,602. In 1890 there were 54 establishments, 700 wage-earners, and products valued at $853,529. The increase in the value of products during the decade was $2,157,073, or 252.7 per cent. In addition to the ordinary varieties, Tennessee produces several kinds of fine tobaccos, the most important being the bright tobaccos of Greene county and the fine red shipping tobaccos of the Clarksville district.

There were 17 establishments engaged in the manufacture of cottonseed oil and cake in 1900, with 751 wage-earners, and products valued at $2,980,041. In 1890 there were 15 establishments, 1,030 wage-earners, and products valued at $2,504,741. The increase in the value of products during the decade was $475,300, or 19 per cent. The industry is carried on most extensively in the western section of the state, centering at Memphis.

There were 44 establishments engaged in the manufacture of leather in 1900, with 803 wage-earners, and products valued at $2,802,117. In 1890 there were 60 establishments, 612 wage-earners, and products valued at $1,266,556. The increase in the value of products during the decade was $1,535,561, or 121.2 per cent.

There were 88 establishments engaged in the manufacture of planing mill products in 1900, with 1,170 wage-earners, and products valued at $2,323,247. In 1890 there were 73 establishments, 1,498 wage-earners, and products valued at $3,450,243. The decrease in the value of products during the decade was $1,126,996, or 32.7 per cent.

URBAN MANUFACTURES.

Table 4 shows the totals for the manufacturing and mechanical industries of the cities of Chattanooga, Knoxville, Memphis, and Nashville, as returned at the censuses of 1890 and 1900, with the percentages of increase.

TABLE 4.—COMPARATIVE SUMMARY, CHATTANOOGA, KNOXVILLE, MEMPHIS, AND NASHVILLE, 1890 AND 1900, WITH PER CENT OF INCREASE.

	Year.	Number of establishments.	Capital.	Wage-earners.		Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.

	1890	27.7	57.7	55.3	67.8	64.6	55.6	59.0

[1] Decrease.

It appears from Table 4 that there has been a considerable increase during the past decade in the combined manufactures of these 4 cities. The number of establishments increased from 1,264 to 1,698, or 34.3 per cent; the average number of wage-earners from 20,718 to 27,066, or 30.6 per cent; and the value of products from $43,071,586 to $55,370,257, or 28.6 per cent. The percentage of increase in each of these particulars was smaller in these 4 cities than in the state as a whole. The city of Knoxville shows the most rapid growth, the value of products having increased from $5,020,116 in 1890 to $6,943,595 in 1900, or 38.3 per cent. In Nashville, the leading manufacturing city, the number of establishments increased from 420 to 489, or 16.4 per cent; the number of wage-earners from 7,275 to 8,447, or 16.1 per cent; and the value of products from $14,590,823 to $18,469,823, or 26.6 per cent. The number of establishments, number of wage-earners, and value of products in this city in 1900 constituted 6.1, 16.7, and 17.1 per cent, respectively, of the totals for the state.

Table 5 presents the totals for the manufacturing industries of the 18 cities and towns withdrawn from the enumerators, places them in comparison with the totals for the entire state and the state exclusive of these cities and towns, and shows their rank in population and in value of products.

Of the 8,016 establishments in the state, 2,416, or 30.1 per cent, were located in these 18 cities and towns. They furnished employment to 34,093 wage-earners, or 67.5 per cent of the total number, and the value of their products, $69,411,208, formed 64.2 per cent of the total for the state.

Table 6 shows the totals for the state by counties.

Table 7 shows the totals for the state by specified industries.

Table 8 shows the totals for the cities of Chattanooga, Knoxville, Memphis, and Nashville by specified industries.

Table 9 shows the totals for the cities and towns withdrawn from the enumerators, exclusive of those shown in Table 8.

TEXAS.

Table 1 shows the manufacturing and mechanical industries of the state of Texas as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.						PER CENT OF INCREASE.				
	1900	1890	1880	1870	1860	1850	1890 to 1900	1880 to 1890	1870 to 1880	1860 to 1870	1850 to 1860

Per cent of assessed value	4.2	2.8									

[1] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 7.)
[2] Not reported separately.
[3] Decrease.
[4] Not reported.
[5] As given for the year 1900 in Dana's supplement, "State and City," to the Commercial and Financial Chronicle, under date of April 13, 1901.
[6] Does not include value of rented property.

Although Texas is an agricultural and stock-raising state, Table 1 shows that there has been a large growth in its manufacturing and mechanical industries during the half century. The population during these years increased from 212,592 to 3,048,710, while the average number of wage-earners employed in manufacturing establishments increased from 1,066 to 48,153, embracing, in 1900, 1.6 per cent of the entire population, compared with five-tenths of 1 per cent in 1850. Probably the best indication of the importance of the wage-earning class is afforded by the greatest number employed at any one time during the year. In 1900 this was 77,995, or 2.6 per cent of the total population of the state. The greatest percentage of increase in the value of products is shown for the decade ending with 1860, but the greatest absolute increase was between the years 1880 and 1890.

Manufacturing in Texas is chiefly a result of the state's abundance of raw materials, especially lumber, cotton, and wheat, the leading industries being those which are more or less dependent upon these materials. The large area of the state, and the heavy freight charges, tend to encourage local production, while abundant fuel is available for power in the vicinity of Fort Worth and Dallas. There were 883,832 short tons of coal mined in the state in 1899, or nearly seven times the production of 1889.[1]

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for eleemosynary and penal institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

[1] United States Geological Survey: Mineral Resources, 1899, Metallic Products, Coal, and Coke, page 502.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	COST OF MATERIALS USED. Total.	COST OF MATERIALS USED. Purchased in raw state.	COST OF MATERIALS USED. Purchased in partially manufactured form.	COST OF MATERIALS USED. Fuel, freight, etc.	Value of products, including custom work and repairing.
Total	16,245	$92,747,345	18,300	52,085	$20,697,998	$6,201,861	$67,683,062	$27,550,627	$36,156,424	$3,976,011	$121,015,480
Hand trades[1]	4,583	4,851,355	5,159	6,872	3,477,727	654,802	7,049,023	91,790	6,713,030	244,203	15,756,310
Eleemosynary and penal institutions	23	767,326	-------	945	82,218	581	309,097	64,958	159,136	85,003	652,232
Establishments with a product of less than $500	3,933	1,546,137	4,226	2,987	63,425	56,356	271,196	43,628	221,364	6,204	948,266
All other establishments	7,706	85,582,527	8,915	41,281	17,074,628	5,490,122	60,053,746	27,350,251	29,062,894	3,640,601	103,658,672

[1] Includes bicycle and tricycle repairing, 66; blacksmithing and wheelwrighting, 2,100; boots and shoes, custom work and repairing, 340; carpentering, 397; clothing, men's, custom work and repairing, 276; clothing, women's, dressmaking, 81; dyeing and cleaning, 56; furniture, cabinetmaking, repairing, and upholstering, 101; lock and gun smithing, 62; masonry, brick and stone, 96; millinery, custom work, 421; painting, house, sign, etc., 166; paper hanging, 1; plastering and stuccowork, 24; plumbing, and gas and steam fitting, 87; sewing machine repairing, 8; taxidermy, 2; typewriter repairing, 1; watch, clock, and jewelry repairing, 298.

Of the 16,245 establishments of all classes shown in this table, 8,516, or 52.4 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $16,704,576, or only 13.8 per cent of the total value of the products of the state.

In addition to the 16,245 active establishments in the state during the census year, with a capital of $92,747,345, shown in Table 2, there were 177 idle establishments, with a capital of $1,158,574, divided as follows:

INDUSTRIES.	Number of idle establishments.	Capital.	INDUSTRIES.	Number of idle establishments.	Capital.
Brick and tile	14	$54,055	Lumber and timber products	11	$52,330
Cotton, compressing	3	105,375	Oil, cottonseed and cake	1	50,000
Cotton, ginning	94	207,250	Petroleum, refining	1	25,000
Flouring and grist mill products	16	73,815	Sugar and molasses, refining	7	252,415
Iron and steel	1	274,000	Woolen goods	1	10,000
Lime and cement	1	80,000	All other industries	27	24,334

TABLE 3.—COMPARATIVE SUMMARY OF ELEVEN LEADING INDUSTRIES.

INDUSTRIES.	Year.	Number of establishments.	Capital.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.

	1890	165	1,989,016	693	397,135	125,987	1,349,381	2,488,356

The 11 leading industries of the state in 1900, as shown by Table 3, embraced 5,793 establishments, or 47.1 per cent of the total number in the state; used a capital of $60,176,540, or 66.5 per cent of the total; gave employment to 30,119 wage-earners, or 62.5 per cent of the total number; and paid $12,692,437, or 61.8 per cent of the total wages. The value of their products was $73,024,636, or 61.2 per cent of the total. In the discussion of Table 3, which follows, these industries are ranked with reference to the value of their products.

Table 3 shows that the manufacture of lumber and timber products is the most important industry in the state. The 637 establishments reported in 1900 gave employment to 7,924 wage-earners, or 16.5 per cent of the wage-earners employed in the state, and the products were valued at $16,296,473, or 13.6 per cent of the total value of the products of the state. In 1890 there were 314 establishments, 7,485 wage-earners, and products valued at $11,942,566. The increase in the value of products during the decade was $4,353,907, or 36.5 per cent.

The greatest increase took place during the last two or three years of the decade, 243 of the 637 establishments reported in 1900 having been erected during the census year. The industry is confined almost entirely to the counties composing the extreme eastern part of the state. The 215 mills in this section, from Bowie county on the north to Jefferson and Harris counties on the south, reported products valued at $13,930,298 in 1900, or 85.5 per cent of the total for the state, the industry centering chiefly around the towns of Beaumont and Orange. Forests of shortleaf pine extend from the Texarkana district southward to a point about 100 miles north of Beaumont, and average about 4,000 feet of merchantable timber per acre. From this point southward to Jefferson county, and extending across the Sabine River into Louisiana, lies the finest continuous area of longleaf pine in the United States, the average stand of merchantable timber ranging from 6,000 to 35,000 feet per acre. Many of the mills use considerable quantities of timber brought from the pine forests of western Louisiana. The small quantities of hard-wood lumber manufactured in Texas—chiefly oak, ash, and elm—were reported mainly from the counties lying along and near the Red River, in the northwestern portion of the state.

The manufacture of cottonseed oil and cake ranks second among the industries of the state in 1900, with 103 establishments, 2,478 wage-earners, and products valued at $14,005,324. In 1890 there were 13 establishments, 866 wage-earners, and products valued at $3,262,596. The increase in the value of products during the decade was $10,742,728, or 329.3 per cent. Allied to this industry is the ginning of cotton, with 3,222 establishments in 1900, and 4,295 wage-earners. The receipts for ginning and other work done amounted to $5,886,923. In 1890 there were 572 establishments and 2,440 wage-earners, and the receipts for ginning and other work done amounted to $1,172,298. The increase in these receipts during the decade was $4,714,625, or 402.2 per cent. These figures do not include the operations of many private plantation ginneries, or ginneries connected with saw, grist, or cottonseed-oil mills. For the full number of ginneries in operation reference should be made to the special report on cotton ginning. In each of these 2 industries Texas ranks first in the United States—a natural result of its preeminence in cotton growing. There were 2,658,555 commercial bales of cotton grown and ginned in the state in 1899, or 27.9 per cent of the production of the United States.[1] The cotton belt in Texas extends from Travis county, near the center of the state, in a northeasterly direction to Grayson, Fannin, and Lamar counties, bordering upon Indian Territory. The ginneries in the counties of this belt handled 38 per cent of the entire cotton production of the state in 1899. Three of the largest ginneries in the United States, ginning annually over 7,000 round bales each, are located at Waco, Farmersville, and Granger, and in the average size of its ginneries Texas is exceeded only by Oklahoma and Indian Territory. Nowhere, except in these territories, are automatic gins so largely used, or have the ginneries so generally adopted the custom of pressing the cotton after ginning into the so-called "round bales." This process was first introduced in 1894, in Texas, and since then has been very widely adopted in other states. "Round bales" are ready for shipment when they leave the ginnery, and the work of cotton compressors is therefore dispensed with. Of the 93,325,729 gallons of cottonseed oil produced in the United States during the census year,

[1] Special Report on Cotton Ginning (Crop of 1899).

24,354,695 gallons, or 26.1 per cent, were produced in Texas.[1] Large quantities of this oil are shipped each year from Galveston to Mediterranean ports. The cake and meal are not so largely used as fertilizers in Texas as they are in the cotton states east of the Mississippi River. This is due to the more recent development of the Texas soils, and the greater demand in this state for cottonseed meal and cake as food for cattle. It is estimated that half a million cattle are annually fattened on hulls and meal in the cotton states west of the Mississippi River.[2]

There were 289 establishments engaged in the manufacture of flouring and grist mill products, the industry third in rank in 1900, with 705 wage-earners, and products valued at $12,333,730. In 1890 there were 690 establishments, 1,626 wage-earners, and products valued at $9,903,455. The increase in the value of products during the decade was $2,430,275, or 24.5 per cent. There were 12,228,132 bushels of wheat and 3,565,933 bushels of corn ground in the mills of Texas during the census year. During the years 1898, 1899, and 1900 Texas rose to a leading position among the wheat producing states, ranking twenty-second in the United States in 1898, nineteenth in 1899, and sixth in 1900.[3] The large wheat production of Oklahoma and Indian Territory is also available, and is drawn upon to supply the mills of Texas. The most extensive operations outside the city of Galveston are in the counties which are near these territories. Waterpower is used in only a few establishments, steam supplying 85.5 per cent of the total power used. In many of the smaller mills cotton ginning is combined with flour and grist milling, and the total value of products includes $12,955 received for custom cotton ginning.

There were 56 establishments engaged in car construction and general shop work of steam railroad companies in 1900, with 6,633 wage-earners, and products valued at $8,314,691. In 1890 there were 31 establishments, 2,354 wage-earners, and products valued at $2,860,235. The increase in the value of products during the decade was $5,454,456, or 190.7 per cent. The immense area of Texas was traversed by 9,886 miles of railroads in 1900, a greater mileage than that of any other state in the Union except Illinois and Pennsylvania.[4] This has necessitated a large number of repair shops, and accounts for the importance of this industry in the state. The establishments reported in 1900 were located in 37 different counties. In addition to the general repair work carried on in these shops, 412 freight cars, 11 passenger cars, and 9 locomotives were built during the census year.

[4] Interstate Commerce Commission: Statistics of Railways in the United States, 1900, page 12.

There were 772 establishments engaged in printing and publishing in 1900, with 2,547 wage-earners, and products valued at $4,577,110. In 1890 there were 447 establishments, 2,069 wage-earners, and products valued at $3,971,410. The increase in the value of products during the decade was $605,700, or 15.3 per cent.

There were 359 establishments engaged in the manufacture of saddlery and harness in 1900, with 1,093 wage-earners, and products valued at $3,420,790. In 1890 there were 165 establishments, 693 wage-earners, and products valued at $2,488,356. The increase in the value of products during the decade was $932,434, or 37.5 per cent. This industry is carried on extensively in the city of Dallas, and its products find a market in nearly all the states and territories west of the Mississippi River.[5]

There were 9 establishments engaged in the manufacture of malt liquors in 1900, with 585 wage-earners, and products valued at $2,689,606. In 1890 there were 7 establishments, 401 wage-earners, and products valued at $1,702,087. The increase in the value of products during the decade was $987,519, or 58 per cent. There was no malt produced in the breweries of Texas during the census year, these establishments being dependent on outside sources for this most important material.

There were 99 establishments engaged in the manufacture of foundry and machine shop products in 1900, with 1,343 wage-earners, and products valued at $2,682,426. In 1890 there were 59 establishments, 782 wage-earners, and products valued at $1,874,059. The increase in the value of products during the decade was $808,367, or 43.1 per cent.

There were 76 establishments engaged in the manufacture of planing mill products in 1900, with 657 wage-earners, and products valued at $1,605,297. In 1890 there were 62 establishments, 949 wage-earners, and products valued at $2,700,941. The decrease in the value of products during the decade was $1,095,644, or 40.6 per cent.

There were 171 establishments engaged in the manufacture of clay products in 1900, with 1,859 wage-earners, and products valued at $1,212,266. In 1890 there were 143 establishments, 2,072 wage-earners, and products valued at $1,311,270. The decrease in the value of products during the decade was $99,004, or 7.6 per cent.

URBAN MANUFACTURES.

Table 4 shows the totals for the manufacturing and mechanical industries of the cities of Dallas, Fort Worth, Galveston, Houston, and San Antonio, as returned at the censuses of 1890 and 1900, with the percentages of increase.

[5] Annual Report of the Dallas Commercial Club, 1899, page 22.

TABLE 4.—COMPARATIVE SUMMARY, DALLAS, FORT WORTH, GALVESTON, HOUSTON, AND SAN ANTONIO, 1890 AND 1900, WITH PER CENT OF INCREASE.

	1890	25.4	42.9	35.4	47.3	58.3	47.2	48.4

[1] Decrease.

It appears from Table 4 that there has been an increase during the past decade in the combined manufactures of these 5 cities. The number of establishments increased from 1,337 to 1,698, or 27 per cent; the average number of wage-earners from 12,334 to 14,924, or 21 per cent; and the value of products from $34,061,949 to $39,293,035, or 15.4 per cent. The percentage of increase in each of these particulars was smaller in these 5 cities than in the state as a whole. Fort Worth shows a decrease in each of these particulars, and Galveston a decrease in the value of products. Houston shows the greatest growth, the value of products having increased from $6,832,943 in 1890 to $10,641,575 in 1900, or 55.7 per cent. In Dallas, the leading manufacturing city, the number of establishments increased from 312 to 373, or 19.6 per cent; the number of wage-earners from 3,554 to 3,756, or 5.7 per cent; and the value of products from $9,054,766 to $11,480,499, or 26.8 per cent. The number of establishments, number of wage-earners, and value of products, in this city in 1900, constituted 3, 7.8, and 9.6 per cent, respectively, of the totals for the state.

Table 5 presents the totals for the manufacturing industries of the 30 cities and towns withdrawn from the enumerators, places them in comparison with the totals for the entire state and the state exclusive of these cities and towns, and shows their rank in population and in value of products.

Per cent of urban manufactures to total for state	28.1	54.8	25.6	55.9	65.1	72.6	60.2	59.3	-------	-------	12.8	-------	-------

Of the 12,289 establishments in the state, 3,448, or 28.1 per cent, were located in these 30 cities and towns. They furnished employment to 26,916 wage-earners, or 55.9 per cent of the total number, and the value of their products, $70,862,826, formed 59.3 per cent of the total for the state.

Table 6 shows the totals for the state by counties.

Table 7 shows the totals for the state by specified industries.

Table 8 shows the totals for the cities of Austin, Dallas, Fort Worth, Galveston, Houston, San Antonio, and Waco by specified industries.

Table 9 shows the totals for the cities and towns withdrawn from the enumerators, exclusive of those shown in Table 8.

TABLE 6.—MANUFACTURES

[No manufactures reported from the following counties: Andrews, Aransas, Bailey, Borden, Buchel, Castro, Cochran, Concho, Crane, Dallam, Dawson, Parmer, Randall, Roberts, Schleicher, Sherman, Sterling, Swisher,

UTAH.

Utah was organized as a territory in 1850, but until 1868 its area was much greater than that of the present state. The Ninth Census (1870) is, therefore, the first with which comparison can be made.

Table 1 shows the manufacturing and mechanical industries as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.						PER CENT OF INCREASE.				
	1900	1890	1880	1870	1860	1850	1890 to 1900	1880 to 1890	1870 to 1880	1860 to 1870	1850 to 1860

[1] Decrease.
[2] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 6.)
[3] Not reported separately.
[4] Not reported.
[5] Exclusive of 1,797 Indians and other persons on Indian reservations, which classes were not included at previous censuses.
[6] Total assessed valuation, real estate not separated, as given for the year 1900, in Dana's supplement, "State and City," to the Commercial and Financial Chronicle, under date of April 13, 1901.
[7] Does not include the value of rented property.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for institutions and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

In addition to the 1,669 active establishments in the state during the census year, with a capital of $15,043,958, shown in Table 2, there were 16 idle establishments, with a capital of $276,471. Of these, 2, with a capital of $30,300, were reported for the manufacture of brick and tile; 5, with a combined capital of $17,775, for the manufacture of flouring and grist mill products; 1, with a capital of $188,346, for lead smelting and refining; and 1, with a capital of $21,500, for the manufacture of lime and cement. The remaining idle capital, amounting to $18,550, was invested in comparatively small establishments reported for various industries.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS.		Miscellaneous expenses.	COST OF MATERIALS USED.				Value of products, including custom work and repairing.
				Average number.	Total wages.		Total.	Purchased in raw state.	Purchased in partially manufactured form.	Fuel, freight, etc.	
Total	1,669	$15,043,958	1,817	6,666	$3,395,900	$934,001	$12,883,357	$7,778,802	$4,054,567	$1,049,988	$21,239,900
Hand trades[1]	614	918,939	717	1,074	537,989	154,311	950,836	16,283	885,375	49,178	2,333,716
Educational institutions	5	302,117	------	26	5,220	850	7,682	519	6,449	714	15,732
Establishments with a product of less than $500	264	90,893	287	25	2,310	3,978	21,721	898	20,599	224	67,985
All other establishments	786	13,732,009	813	5,541	2,850,381	774,862	11,903,118	7,761,102	3,142,144	999,872	18,822,467

[1] Includes bicycle and tricycle repairing, 21; blacksmithing and wheelwrighting, 187; boots and shoes, custom work and repairing, 80; carpentering, 43; clothing, men's, custom work and repairing, 62; clothing, women's, dressmaking, 28; dyeing and cleaning, 5; furniture, cabinetmaking, repairing, and upholstering, 9; lock and gun smithing, 7; masonry, brick and stone, 5; millinery, custom work, 52; painting, house, sign, etc., 29; paper hanging, 3; plastering and stuccowork, 3; plumbing, and gas and steam fitting, 27; sewing machine repairing, 4; taxidermy, 2; typewriter repairing, 1; watch, clock, and jewelry repairing, 46.

Of the 1,669 establishments of all classes, 878, or 52.6 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting chiefly of sums received for custom work and repairing, amounted to $2,401,701, or only 11.3 per cent of the total products for the state.

Table 1 shows a rapid increase in the manufacturing and mechanical industries of Utah, but, as previously explained, the statistics for 1850 and 1860 pertain to a greater area than that now covered by the state. The increase during the last decade is largely due to the inclusion as a manufacturing industry in 1900 of lead smelting and refining—which industry was included in the report on mineral industries in 1880 and 1890. The totals for 1870 included 1 establishment with a product valued at $75,000, engaged in milling quartz, an industry which has been excluded from the reports on manufactures since that time. The lead mined in the state during 1899 amounted to 13 per cent of the total production of the United States,[1] and the smelting and refining of this ore is the most important industry manufacturing for the outside market; but as only 2 establishments were reported for 1900, the statistics can not be shown separately without disclosing the operations of individual establishments, and are therefore grouped with "all other industries." The product of these smelters includes the precious metals as well as lead, the value of the silver largely exceeding the value of lead produced.

The highly concentrated brine of Great Salt Lake has made the manufacture of salt an important industry in the state, although the value of the product reported in 1900 was but $139,488, as compared with $144,300 in 1890.

Another leading industry was the manufacture of boots and shoes, with a product valued at $225,986. Among the lines of industrial activity dependent upon the agricultural and horticultural products of the state, are flour and grist milling, with a product valued at $1,829,840; the canning of fruits and vegetables, with a product valued at $300,349; the manufacture of beet sugar, with a product valued at $1,037,355; of malt liquors, with a product valued at $432,835; and of butter and cheese, with a product valued at $713,889.

Three other large industries show value of products as follows: Construction and repair shops of steam railroads, $1,306,591; foundry and machine shops, $217,392; and lumber and timber products, $214,187.

[1] Production of Lead in 1899, page 9. (Extract from Annual Report of the Geological Survey, 1899-1900, Part VI.)

URBAN MANUFACTURES.

Table 3 shows the totals for the manufacturing and mechanical industries of Salt Lake City as returned at the censuses of 1880, 1890, and 1900, with the percentages of increase.

TABLE 3.—COMPARATIVE SUMMARY, SALT LAKE CITY, 1880, 1890, AND 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.			PER CENT OF INCREASE.	
	1900	1890	1880	1890 to 1900	1880 to 1890
Number of establishments	432	175	166	146.9	5.4
Capital	$4,048,906	$3,354,035	$860,415	20.7	289.8
Wage-earners, average number	2,977	1,986	928	49.9	114.0
Total wages	$1,601,253	$1,205,454	$425,537	32.8	183.3
Miscellaneous expenses	$479,634	$291,255	(1)	64.7	-------
Cost of materials used	$2,743,674	$1,966,818	$812,736	39.5	142.0
Value of products, including custom work and repairing	$6,109,409	$4,624,419	$1,610,133	32.1	187.2

[1] Not reported.

It appears from Table 3 that there has been a considerable increase during the past decade in the manufactures of the city. The number of establishments increased from 175 to 432, or 146.9 per cent; the average number of wage-earners from 1,986 to 2,977, or 49.9 per cent; and the value of products from $4,624,419 to $6,109,409, or 32.1 per cent. There were 432 establishments in Salt Lake City in 1900, or 30.9 per cent of the entire number located within the state. These establishments had a combined capital amounting to $4,048,906, or 27.6 per cent of all the capital employed in the state. Of the wage-earners, 2,977, or 45 per cent of all in the state, were employed in Salt Lake City. The total amount of wages paid in the city amounted to $1,601,253, or 47.3 per cent of all wages paid in the state. The value of products, including custom work and repairing, during 1900 was $6,109,409, or 28.8 per cent of the total products of the state.

Table 4 combines the totals for the industries in Brigham, Lehi City, Logan, Ogden, Park City, Provo City, Salt Lake City, and Springville, and places them in comparison with the totals for the entire state and the state exclusive of these cities.

TABLE 4.—URBAN MANUFACTURES.

	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS.		Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.
				Average number.	Total wages.			
Total for state	1,400	$14,650,948	1,530	6,615	$3,388,370	$929,173	$12,855,954	$21,156,183

Springville	17	156,760	18	14	6,860	4,969	77,242	95,482
Total for state exclusive of urban manufactures	603	7,088,202	650	2,139	995,624	246,854	8,160,381	11,377,376
Per cent of urban manufactures to total for state	56.9	51.6	57.5	67.7	70.6	73.4	36.5	46.2

Of the 1,400 establishments in the state, 797, or 56.9 per cent, are located in these 8 cities. The capital reported for these establishments is $7,562,746, or 51.6 per cent of that for the entire state. They furnished employment to 4,476 wage-earners, or 67.7 per cent of the total number, paid $2,392,746 in wages, or 70.6 per cent of the total amount, and the value of their products, $9,778,807, formed 46.2 per cent of the total for the state.

Table 5 shows the totals for the state by counties.

Table 6 shows the totals for the state by specified industries.

Table 7 shows the totals for Salt Lake City by specified industries.

Table 8 shows the totals for all industries in the cities withdrawn from the enumerators, exclusive of Salt Lake City, shown in Table 7.

VERMONT.

Table 1 shows the manufacturing and mechanical industries of the state of Vermont as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.						PER CENT OF INCREASE.				
	1900	1890	1880	1870	1860	1850	1890 to 1900	1880 to 1890	1870 to 1880	1860 to 1870	1850 to 1860

[1] Decrease.
[2] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 6.)
[3] Not reported separately.
[4] Not reported.
[5] Less than one-tenth of 1 per cent.
[6] As given in State and City Supplement, Dana's Commercial and Financial Chronicle, April 13, 1901.
[7] Does not include value of rented property.

Table 1 reveals the generally steady growth of the manufacturing industries of Vermont during the half century, a growth which is striking when compared with the small increase of population.

The total population of the state in 1850 was 314,120, and in 1900, 343,641, an increase of only 29,521, or 9.4 per cent, while the average number of wage-earners employed in manufacturing establishments has increased from 8,445 in 1850, to 29,455 in 1900, or 248.8 per cent, embracing, in 1900, 8.6 per cent of the population as compared with 2.7 per cent in 1850. Probably the best indication of the importance of the wage-earning class is afforded by the greatest number employed at any one time during the year. In 1900 this was 40,160, or 11.7 per cent of the total population of the state.

The increase in the value of products from 1850 to 1860 was 70.8 per cent; from 1860 to 1870, 119.9 per cent; from 1880 to 1890, 22.3 per cent; and from 1890 to 1900, 50.3 per cent. From 1870 to 1880, there was a decrease of 2.6 per cent. The values, however, for 1870 were expressed in a currency which was at a discount in gold, and should, therefore, be reduced about one-fifth for purposes of comparison with other census years.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for a governmental establishment and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	COST OF MATERIALS USED. Total.	COST OF MATERIALS USED. Purchased in raw state.	COST OF MATERIALS USED. Purchased in partially manufactured form.	COST OF MATERIALS USED. Fuel, freight, etc.	Value of products, including custom work and repairing.
Total	4,817	$48,962,114	5,367	29,575	$12,249,695	$3,498,656	$29,941,931	$11,268,450	$16,939,006	$1,734,475	$57,849,869
Hand trades[1]	1,470	1,941,500	1,627	2,409	1,028,435	200,586	1,766,003	16,061	1,676,190	73,752	4,311,933
Governmental establishment	1	38,598	--------	4	2,097	183	17,858	----------	16,143	1,715	29,098
Establishments with a product of less than $500	745	375,552	793	116	9,914	16,025	65,249	5,823	59,348	78	196,956
All other establishments	2,601	46,606,464	2,947	27,046	11,209,249	3,281,862	28,092,821	11,246,566	15,187,325	1,658,930	53,311,882

[1] Includes bicycle and tricycle repairing, 40; blacksmithing and wheelwrighting, 613; boots and shoes, custom work and repairing, 101; carpentering, 78; clothing, men's, custom work and repairing, 68; clothing, women's, dressmaking, 86; dyeing and cleaning, 3; furniture, cabinetmaking, repairing, and upholstering, 50; lock and gun smithing, 5; masonry, brick and stone, 29; millinery, custom work, 154; painting, house, sign, etc., 90; paper hanging, 2; plumbing, and gas and steam fitting, 56; sewing machine repairing, 1; taxidermy, 3; watch, clock, and jewelry repairing, 91.

Of the 4,817 establishments of all classes, shown in this table, 2,215, or 46 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $4,508,889, or only 7.8 per cent of the total products of the state.

In addition to the 4,817 active establishments in the state during the census year, with a capital of $48,962,114, shown in Table 2, there were 23 idle establishments, with a capital of $104,160, divided as follows:

INDUSTRIES.	Number of idle establishments.	Capital.
Foundry and machine shop products	2	$12,000
Lumber, planing mill products, including sash, doors, and blinds	1	32,000
Marble and stone work	1	11,500
Paper and wood pulp	1	15,000
Woolen goods	3	13,370
All other industries	15	20,290

Comparative statistics for the 10 leading industries in Vermont are presented in Table 3.

TABLE 3.—COMPARATIVE SUMMARY OF TEN LEADING INDUSTRIES.

INDUSTRIES.	Year.	Number of establishments.	Capital.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.

	1890	29	3,304,382	1,541	582,965	178,385	1,435,163	2,723,683

The 10 leading industries of the state in 1900, as shown in Table 3, embraced 1,618 establishments, or 39.7 per cent of the total number in the state; $29,260,101, or 60.3 per cent of the total capital; 15,000, or 50.9 per cent of the total average number of wage-earners; $6,681,018, or 54.6 per cent of the total wages; and $34,366,777, or 59.6 per cent of the total products. In the discussion which follows, these industries are ranked with reference to the value of the products.

Table 3 shows that the manufacture of lumber and timber products is the most important in the state. The 658 establishments reported for this industry gave employment to 3,625 persons, or 12.3 per cent of the wage-earners in the state, and paid in wages $1,184,904, or 9.7 per cent of the total wages of the state. The value of the products was $6,131,808, or 10.6 per cent of the value of all the products of the state. In 1890 the establishments numbered 779, the wage-earners, 6,054, and the value of the products was $6,958,674.

Allied to the manufacture of lumber and timber products is the manufacture of planing mill products, including sash, doors, and blinds. For this industry 46 establishments were reported, an increase of 48.4 per cent over 1890, when the number was 31. The number of wage-earners increased from 628 in 1890 to 814 in 1900, or 29.6 per cent; and the value of the products from $1,868,760 to $2,598,581, or 39.1 per cent. Sawmills were among the first mechanical establishments in the state. At the close of the Revolutionary War, Lake Champlain became the principal avenue of commerce between the settlements along the lake and Canada. Large quantities of pine and oak timber were cut in the forests that skirted the lake and larger rivers, and were floated in rafts by means of jury-mast and sail down the lake, thence by the Richelieu and St. Lawrence rivers to Quebec, and shipped to Europe.[1] With the removal of the natural barriers to navigation in the Richelieu River and the opening of the railroad from Burlington to the New England markets, Burlington became the center of a large lumber trade. In 1882 the sales of the Burlington lumber market amounted to 117,000,000 feet,[1] the city ranking third in importance as a lumber market in the United States. Since the establishment of all-rail connections from Canadian mills to the Boston market, permitting winter shipments and avoiding reshipment, there has been a gradual decrease in the city's lumber trade, which, however, still remains its most important industry.

Next in importance stands the factory manufacture of cheese, butter, and condensed milk. In the decade from 1890 to 1900 the number of establishments increased from 123 to 255, or 107.3 per cent; the capital from $367,353 to $1,222,892, or 232.9 per cent; the wage-earners from 263 to 522, or 98.5 per cent; and the products from $1,602,641 to $5,656,265, or 252.9 per cent.

The manufacture of monuments and tombstones is third in importance, and also shows a notable increase in all particulars, the percentages of gain being nearly the same in number of establishments, average number of wage-earners, and value of products. In 1890, 96 establishments were reported, and in 1900, 268, an increase of 179.2 per cent. The wage-earners in 1890 numbered 1,095, and in 1900, 2,974, an increase of 171.6 per cent. The value of products in 1890 was $1,492,384, and in 1900, $4,045,611, an increase of 171.1 per cent. The showing for marble and stone work, an allied industry, is also satisfactory. The number of establishments in 1890 was 46, compared with 54 in 1900, an increase of only 17.4 per cent; but the value of products, $1,656,637 in 1890, amounted to $2,484,551 in 1900, an increase of 50 per cent. Both industries owe their importance to extensive quarries.[2] A large proportion of the marble used in the United States is obtained from quarries in Vermont. It was not until 1785 that the first quarry was opened by Isaac Underhill on land in Dorset. In 1805 a quarry was started in Middlebury. The largest producing quarries are on Otter Creek, Proctor and West Rutland being the principal quarrying towns. Quarries are operated at different points in the western part of the state, extending from Isle La Motte, where black marble is found, to Bennington county. These marbles are very beautiful in finish and texture. The manufacture of marble monuments as an important industry dates from 1808. The stock was first taken from the top or outer edge of the layers, where the strata could readily be split into sheets of suitable thickness. These sheets were cut down with a chisel into the desired shape. Marble was first sawed in South Dorset in 1818, and found a market in Boston, New York, Philadelphia, Cleveland, and intermediate points.

The quarrying of granite began in 1812.[3] During the past twenty-five years quarries have been opened in Barre, Hardwick, Williamstown, Dummerston, Berlin, Woodbury, and Ryegate.[3] The city of Barre had the largest per cent of increase in population of any place in the state in the last decade, due almost entirely to the development of these quarries and the manufactures allied to them.

It is interesting to note in this connection that the quarrying and cutting of slate is an important industry of southwestern Vermont. The first quarry was opened in 1839 at Fair Haven and was worked eight years before roofing slate was manufactured.[4] There were 23 establishments in the state in 1900 (see Table 6), engaged in the manufacture of roofing and roofing materials. These reported a capital of $545,914; 1,604 wage-earners; and products valued at $907,744. In 1890 there were only 2 establishments reported for the industry.

The 27 establishments reported in 1900 as engaged in the manufacture of paper and wood pulp had a capital of $4,853,806, and gave employment to 1,216 wage-earners, with total wages of $571,018. The products were valued at $3,384,773. The increase over 1890 in number of estab-

[4] History of Rutland county, Vermont, by H P. Smith and W. S. Rann, pages 192 and 193.

lishments was 28.6 per cent; in number of wage-earners, 14.2 per cent; and in value of products, 38.2 per cent. This industry is largely located at Bellows Falls on the Connecticut River, and is favored by unfailing waterpower and adjacent forests.

The manufacture of flouring and grist mill products in a total of 211 establishments, with a capital of $1,289,497, gave employment to 190 wage-earners in 1900, and paid in wages $81,363. The value of the products amounted to $3,222,347. In 1890 there were 217 establishments having a capital of $1,343,356; 251 wage-earners with total wages of $95,685; and products valued at $2,890,174.

In wool manufactures 24 establishments were reported in 1900, with a capital of $3,202,151; 1,557 wage-earners, with total wages of $603,963; and products valued at $2,822,646. In 1890 there were 29 establishments having a capital of $3,304,382, and products to the value of $2,723,683. The pioneer woolen manufacturer was Joel Valentine, who began the business in 1824.[1]

The 61 establishments reported for the manufacture of foundry and machine shop products in 1900, had a capital of $2,507,813; 1,288 wage-earners, with total wages of $626,794; and products valued at $2,185,510. While the number of establishments remained the same as in 1890, the capital was larger by 79.3 per cent, and the value of products increased 82.3 per cent.

The manufacture of hosiery and knit goods showed an increase in establishments from 10 in 1890 to 14 in 1900, or 40 per cent, and in value of products, an increase from $1,105,958 in 1890 to $1,834,685 in 1900, or 65.9 per cent.

Table 4 presents the totals for the manufacturing industries of the 21 cities and towns withdrawn from the enumerators and places them in comparison with the totals for the entire state, and the state exclusive of these cities and towns.

[1] Less than one-tenth of 1 per cent.

Of the 4,071 establishments in the state, 1,617, or 39.7 per cent, are located in these 21 cities and towns. The capital reported for these establishments is $26,361,298, or 54.3 per cent of that for the entire state. They furnished employment to 17,617 wage-earners, or 59.8 per cent of the total number; paid $7,665,220 in wages, or 62.6 per cent of the total amount; and the value of their products, $31,861,298, formed 55.3 per cent of the total for the state.

Table 5 shows the totals for the state by counties.

Table 6 shows the totals for the state by specified industries.

Table 7 shows the totals for all industries in the cities and towns withdrawn from the enumerators.

VIRGINIA.

Table 1 shows the manufacturing and mechanical industries of Virginia as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.						PER CENT OF INCREASE.

[1] Decrease.
[2] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 7.)
[3] Not reported separately.
[4] Not reported.
[5] As given for the year 1900 in Dana's supplement, "State and City," to the Commercial and Financial Chronicle, under date of April 13, 1901.
[6] Does not include value of rented property.

Although Virginia is an agricultural state, Table 1 shows that there has been a considerable growth in its manufacturing and mechanical industries during the half century. The population during these years increased from 1,421,661 to 1,854,184, or 30.4 per cent, while the average number of wage-earners employed in manufacturing establishments increased from 29,110 to 72,702, or 149.7 per cent, embracing, in 1900, 3.9 per cent of the entire population, compared with 2 per cent in 1850. Probably the best indication of the importance of the wage-earning class is afforded by the greatest number employed at any one time during the year. In 1900 this was 100,033, or 5.4 per cent of the total population of the state. Measured by the value of products, the greatest percentage of increase, 71.1, was during the decade ending with 1860, although the greatest absolute increase, $43,809,086, was between the years 1890 and 1900. The decrease shown for the decade, 1860 to 1870, is due in part to the setting off of West Virginia from Virginia, December 31, 1862.

The iron mines, forests, and tobacco and cotton fields of the state of Virginia furnish abundant raw materials for manufactures. Its waterpower is extensive, and has been developed largely at Fredericksburg and at Petersburg, and more especially at Richmond, where a 5,000-horsepower plant was erected recently. The best of steam coal is found in large quantities in the Pocahontas field in the western part of the state, while the Potomac, Rappahannock, James, and York rivers, navigable for 352 miles, together with the 70 miles of sheltered coast line along Chesapeake Bay, afford facilities for the cheap shipment of products to domestic and foreign markets. Manufactures during the last decade were greatly stimulated by the development of railways, the mileage having increased from 2,821 miles in 1889 to 3,684 miles in 1899.[1] Industrial education is afforded by the Virginia Agricultural and Mechanical College and Hampton Institute.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for a governmental establishment, educational, eleemosynary, and penal institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

[1] Interstate Commerce Commission: Statistics of Railways, 1889, page 11; and 1899, page 12.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	COST OF MATERIALS USED. Total.	COST OF MATERIALS USED. Purchased in raw state.	COST OF MATERIALS USED. Purchased in partially manufactured form.	COST OF MATERIALS USED. Fuel, freight, etc.	Value of products, including custom work and repairing.
Total	12,177	$111,035,752	13,552	76,003	$24,157,337	$12,338,124	$75,916,354	$34,182,219	$36,654,262	$5,079,873	$135,593,412
Hand trades [1]	2,623	3,246,850	2,954	6,191	2,346,773	1,259,304	4,879,770	59,919	4,705,231	114,620	11,319,905
Governmental establishment	1	6,380,867	--------	2,094	1,659,214	4,625	764,558	----------	737,498	27,060	2,498,553
Educational, eleemosynary, and penal institutions	6	22,643	1	53	10,917	80	16,866	220	16,188	458	41,630
Establishments with a product of less than $500	3,922	961,254	4,130	1,154	41,486	68,817	283,173	87,230	195,943	----------	880,319
All other establishments	5,625	100,424,138	6,467	66,511	20,098,947	11,005,298	69,971,987	34,034,850	30,999,402	4,937,735	120,853,005

[1] Includes bicycle and tricycle repairing, 63; blacksmithing and wheelwrighting, 889; boots and shoes, custom work and repairing, 283; carpentering, 284; clothing, men's, custom work and repairing, 164; clothing, women's, dressmaking, 128; dyeing and cleaning, 27; furniture, cabinetmaking, repairing, and upholstering, 91; lock and gun smithing, 21; masonry, brick and stone, 56; millinery, custom work, 167; painting, house, sign, etc., 118; paper hanging, 28; plastering and stuccowork, 27; plumbing, and gas and steam fitting, 117; sewing machine repairing, 5; taxidermy, 1; typewriter repairing, 3; watch, clock, and jewelry repairing, 151.

Of the 12,177 establishments of all classes shown in this table, 6,545, or 53.7 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $12,200,224, or only 9 per cent of the total value of the products of the state.

In addition to the 12,177 active establishments in the state during the census year, with a capital of $111,035,752, shown in Table 2, there were 112 idle establishments, with a capital of $1,884,479, divided as follows:

INDUSTRIES.	Number of idle establishments.	Capital.	INDUSTRIES.	Number of idle establishments.	Capital.
Brick and tile	19	$156,174	Patent medicines and compounds	1	$37,000
Carriages and wagons	2	30,400	Pottery, terra cotta, and fire-clay products	4	69,750
Chemicals	1	78,000	Roofing and roofing materials	1	40,800
Flouring and grist mill products	16	14,545	Tobacco, chewing, smoking, and snuff	2	17,500
Iron and steel	9	1,295,162	Woolen goods	1	36,000
Leather, tanned, curried, and finished	3	36,500	Zinc, smelting and refining	1	17,500
Lumber and timber products	22	28,035	All other industries	27	10,813
Lumber, planing mill products, including sash, doors, and blinds	3	16,300			

TABLE 3.—COMPARATIVE SUMMARY OF TEN LEADING INDUSTRIES.

INDUSTRIES.	Year.	Number of establishments.	Capital.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.

	1890	101	1,886,806	1,630	303,479	182,599	5,420,492	6,487,643

The 10 leading industries of the state in 1900, as shown in Table 3, embraced 3,634 establishments, or 44.1 per cent of the total number in the state; used a capital of $54,074,182, or 52.2 per cent of the total; gave employment to 37,833 wage-earners, or 52 per cent of the total number; and paid $11,243,302, or 50.1 per cent of the total wages. The value of their products was $79,657,265, or 60.3 per cent of the total. In the discussion of Table 3, which follows, these industries are ranked with reference to the value of their products.

Table 3 shows that the manufacture of tobacco is the most important industry in the state. The 212 establishments reported in 1900 gave employment to 11,815 wage-earners, or 16.3 per cent of the wage-earners employed in the state, and the products were valued at $21,278,266, or 16.1 per cent of the total value of the products of the state. In 1890 there were 296 establishments, 13,658 wage-earners, and products valued at $22,020,298. The decrease in the value of products during the decade was $742,032, or 3.4 per cent. The economic history of colonial Virginia is essentially a record of its tobacco culture. In 1619, 20,000 pounds of tobacco were exported, and in 1642 this staple was made the sole legal-tender currency in the colony.[1] Danville, Lynchburg, and Richmond are now among the largest tobacco markets in the United States, their combined sales in 1898 amounting to 11.1 per cent of the production of the country.[2] This abundant supply of raw material naturally caused the development of tobacco manufactures at an early date. At the census of 1810, 2,726,713 pounds of manufactured tobacco and snuff were reported. In 1899 the state ranked fifth in the manufacture of chewing and smoking tobacco.[3] During the last decade the value of products in this branch of the industry, including snuff, decreased from $11,804,813 to $10,707,766. The cigarette manufacture at Richmond began about 1874[4] and has had a steady growth. The climate is well suited to the handling of the tobacco leaf, and considerable quantities of Connecticut, Pennsylvania, and Havana leaf are brought into the state to be manufactured into cigars.[5]

The manufacture of flouring and grist mill products ranked second among the industries of the state in 1900, with 1,726 establishments, 790 wage-earners, and products valued at $12,687,267. In 1890 there were 1,179 establishments, 1,475 wage-earners, and products valued at $11,716,356. The increase in the value of products during the decade was $970,911, or 8.3 per cent. Flour and grist milling began in Virginia in 1621, when a windmill was built by Governor Yeardley.[6] The large wheat production of the state, 6,330,450 bushels in 1899,[7] has been for many years more than sufficient for local consumption, and large quantities of flour have been exported to the West Indies, South America, Africa, and Europe.[8] For many years it was believed that only Virginia flour could stand a tropical climate without detriment.

There were 1,341 establishments engaged in 1900 in the manufacture of lumber and timber products, the industry third in rank, with 7,611 wage-earners, and products valued at $12,137,177. In 1890 there were 663 establishments, 5,973 wage-earners, and products valued at $5,630,600. The increase in the value of products during the decade was $6,506,577, or 115.6 per cent. The forests of Virginia early attracted the attention of settlers, and in 1608, the year following the founding of Jamestown, one of the Virginia Company's ships returning to England carried a cargo of iron ore, cedar posts, and walnut boards.[9] Trained workmen were brought from Hamburg, and by 1630 sawmills were in operation.[10] In 1897 forests covered 23,400 square miles, or 58 per cent of the land area of the state.[11] Longleaf and loblolly pine constitute about 75 per cent of the standing timber of the state.[12] The mills which saw this timber are located chiefly near Norfolk and along the James River, and, in addition to the

local supply, use many logs brought by rail and canal from North Carolina. Hard wood timber products are manufactured chiefly among the oak, ash, and poplar forests in the western and northwestern counties. These forests are being rapidly exhausted. Large numbers of chestnut oaks are sacrificed annually for the tan-bark they furnish, while the finest white oak trees are selected for the manufacture of staves, and in many cases all but a few feet at the base of each is left to decay.

There were 20 establishments engaged in the manufacture of iron and steel in 1900, with 3,097 wage-earners, and products valued at $8,341,888. In 1890 there were 21 establishments, 3,010 wage-earners, and products valued at $6,326,084. The increase in the value of products during the decade was $2,015,804, or 31.9 per cent. In 1899 Virginia ranked fifth in the United States in the production of iron ore.[1] An abundance of this mineral, combined with a plentiful supply of fuel, has made the manufacture of iron one of the leading industries of the state for more than a century. The first attempt by Europeans to manufacture iron in America was made in Virginia in 1619 by skilled iron-makers, imported for the purpose, but the enterprise failed. It was not until some time between the years 1710 and 1723 that the first iron was manufactured in the colony.[2] Six mines were in operation in 1781, and in connection with 5 of these, 4,400 tons of pig iron and 600 tons of bar iron were made annually, while 2 forges manufactured bars from pig iron brought from Maryland.[3] Small quantities of pig iron were exported previous to that year.[4] The advance of the industry since that date was checked for a time by the exhaustion of the older mines, but the increase of transportation facilities has given access to deposits[5] in the western part of the state, where the manufacture is now chiefly carried on.

There were 28 establishments engaged in car construction and general shop work of steam railroad companies in 1900, with 4,922 wage-earners, and products valued at $6,277,279. In 1890 there were 8 establishments, 1,643 wage-earners, and products valued at $1,504,995. The increase in the value of products during the decade was $4,772,284, or 317.1 per cent. Fourteen of the railroads in Virginia have repair shops located at 21 different points in the state. In addition to general repair work, freight cars were built during the census year at Danville, Portsmouth, Richmond, and Roanoke, passenger cars at Portsmouth, and locomotives at Roanoke.

There were 80 establishments engaged in the manufacture of foundry and machine shop products in 1900, with 2,912 wage-earners, and products valued at $4,833,137. In 1890 there were 59 establishments, 1,971 wage-earners, and products valued at $2,739,695. The increase in the value of products during the decade was $2,093,442, or 76.4 per cent. The beginning of this industry in Virginia at an early date was a natural result of the local production of iron and the demand for machinery and repairs by the sawmills and flouring mills. In 1850 there were 42 foundries in the state and 20 other establishments employing machinists and millwrights, with combined products valued at $849,291. One establishment, at Richmond, achieved a national reputation by making the engines and boilers for the United States steam frigates Roanoke and Colorado.[6] Several establishments in tobacco manufacturing centers make a specialty of tobacconists' tools and machinery.[7] In connection with the development of the iron industries, attention may be called to the large iron and steel shipbuilding operations at Newport News and Richmond. But as there were only 2 establishments in the state in 1900, the statistics can not be separately shown.

There were 65 establishments engaged in the tanning, currying, and finishing of leather in 1900, with 889 wage-earners, and products valued at $4,716,920. In 1890 there were 82 establishments, 401 wage-earners, and products valued at $1,224,800. The increase in the value of products during the decade was $3,492,120, or 285.1 per cent. This is a much larger absolute increase than has ever taken place before in the history of this industry in Virginia. Its importance is due largely to the abundance of oak timber which supplies the bark for tanning. The largest operations are in the mountainous counties in the western part of the state. As early as 1810 there were 442 tanneries located in 15 counties of the state, and a product of 273,829 hides was reported.

There were 39 establishments engaged in the manufacture of fertilizers in 1900, with 1,171 wage-earners, and products valued at $3,415,850. In 1890 there were 28 establishments, 600 wage-earners, and products valued at $2,475,638. The increase in the value of products during the decade was $940,212, or 38 per cent. The importance of this industry in Virginia is largely due to the great demand for fertilizers to replenish the soil, exhausted by the large tobacco crops. There were only 3 establishments reported in 1860, with products valued at $224,200, or 25.2 per cent of the value of all fertilizers produced in the United States in that year.

There were 35 establishments engaged in the manufacture of textiles in 1900, with 3,293 wage-earners, and products valued at $3,282,583. In 1890 there were 44 establishments, 2,389 wage-earners, and products valued at $2,342,457. The increase in the value of products during the decade was $940,126, or 40.1 per cent. Cotton spinning and weaving as a household industry was common in Virginia as early as 1685,[8] but cotton manufacturing has assumed importance only during the last quarter of a century with the development of the waterpower of the Virginia Piedmont district. Practically all the cotton manufacturing carried on in 1900 was in this region, water supplying more than three-fifths of the power used. Sheet-

ings and shirtings were the most important products, though considerable quantities of drills, duck, and fancy-woven fabrics were also reported. Woolen goods have been manufactured in Virginia since 1646,[1] and the industry is now carried on in more than 12 different localities, chiefly in the Piedmont and Alpine regions.

There were 88 establishments engaged in the manufacture of planing mill products in 1900, with 1,333 wage-earners, and products valued at $2,686,898. In 1890 there were 65 establishments, 1,136 wage-earners, and products valued at $2,350,281. The increase in the value of products during the decade was $336,617, or 14.3 per cent.

	1890	27.2	38.0	45.5	49.9	59.2	41.8	45.3

[1] Decrease.

It appears from Table 4 that there has been an increase during the past decade in the combined manufactures of these 3 cities. Although the number of establishments decreased from 1,611 to 1,433, or 11 per cent, the average number of wage-earners increased from 24,390 to 25,756, or 5.6 per cent; and the value of products from $40,060,084 to $44,762,435, or 11.7 per cent. The city of Norfolk shows the greatest growth, as measured by the value of products, which increased from $5,100,408 in 1890 to $9,397,355 in 1900, or 84.2 per cent. In Richmond, the leading manufacturing city in the state, the value of products increased during the decade from $27,792,672 to $28,900,616, or 4 per cent, while the number of establishments decreased from 966 to 763, or 21 per cent, and the number of wage-earners from 16,891 to 16,692, or 1.2 per cent. The number of establishments, number of wage-earners, and value of products, in this city in 1900, constituted 9.3, 23, and 21.9 per cent, respectively, of the totals for the state.

Table 5 presents the totals for the manufacturing industries of the 23 cities and towns withdrawn from the enumerators, places them in comparison with the totals for the entire state and the state exclusive of these cities and towns, and shows their rank in population and in value of products.

Of the 8,248 establishments in the state, 2,972, or 36 per cent, were located in these 23 cities and towns. They furnished employment to 51,552 wage-earners, or 70.9 per cent of the total for the state, and the value of their products, $88,354,963, formed 66.8 per cent of the total for the state.

Table 6 shows the totals for the entire state by counties.

Table 7 shows the totals for the state by specified industries.

Table 8 shows the totals for the cities of Norfolk, Petersburg, Richmond, and Roanoke by specified industries.

Table 9 shows the totals for all industries in the cities and towns withdrawn from the enumerators, exclusive of those shown in Table 8.

WASHINGTON.

Washington was organized as a territory March 2, 1853, being set off from Oregon. The Eighth Census (1860) was the first, therefore, in which the statistics of Washington were published separately. In 1863 the territory was reduced to its present area, so that the statistics for 1870 are the earliest that are strictly comparable with the later censuses. Washington was admitted as a state November 11, 1889.

Table 1 shows the manufacturing and mechanical industries of the state as returned at the censuses of 1860 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1860 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.					PER CENT OF INCREASE.			
	1900	1890	1880	1870	1860	1890 to 1900	1880 to 1890	1870 to 1880	1860 to 1870
Number of establishments	3,631	1,543	261	269	52	135.3	491.2	[1]3.0	417.3
Capital	$52,649,760	$34,369,735	$3,202,497	$1,893,674	$1,296,200	53.2	973.2	69.1	46.1

Cost of materials used	$49,099,182	$19,917,057	$1,967,469	$1,435,128	$502,021	146.5	912.3	37.1	185.9
Value of products, including custom work and repairing	$86,795,051	$41,768,022	$3,250,134	$2,851,052	$1,406,921	107.8	1,185.1	14.0	102.6
Total population	[5]511,786	349,390	75,116	23,955	11,594	46.5	365.1	213.6	106.6
Wage-earners engaged in manufactures	33,806	18,677	1,147	1,026	870	81.0	1,528.3	11.8	17.9
Per cent of total population	6.6	5.3	1.5	4.3	7.5	--------	--------	--------	--------
Assessed value of real estate	[6]$177,822,995	$177,204,671	$11,335,923	$5,146,776	$1,876,063	0.3	1,463.2	120.3	174.3
Value of land and buildings invested in manufactures[7]	$15,846,854	$12,776,478	(3)	(3)	(3)	24.0	--------	--------	--------
Per cent of assessed value	8.9	7.2	--------	--------	--------	--------	--------	--------	--------

[1] Decrease.
[2] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 7.)
[3] Not reported separately.
[4] Not reported.
[5] Exclusive of 6,317 Indians and other persons on Indian reservations, which classes were not included at previous censuses.
[6] As given for the year 1900 in Dana's supplement, "State and City," to the Commercial and Financial Chronicle, under date of April 13, 1901.
[7] Does not include value of rented property.

Table 1 shows the notable growth in the manufacturing and mechanical industries of Washington during the last forty years. The population during these years increased from 11,594 to 511,786, while the average number of wage-earners employed in manufacturing establishments increased from 870 to 33,806, embracing, in 1900, 6.6 per cent of the entire population, compared with 7.5 per cent in 1860. Probably the best indication of the importance of the wage-earning class is afforded by the greatest number employed at any one time during the year. In 1900 this was 52,347, or 10.2 per cent of the total population of the state. Measured by the value of products, the greatest percentage of increase was during the decade ending with the year 1890, although the greatest absolute increase, $45,027,029, was between the years 1890 and 1900. The notable growth of the state in manufactures occurred, therefore, during these two decades. Previously the population increased more rapidly than the number of wage-earners engaged in manufactures.

The state of Washington possesses diversified and extensive natural resources, large navigable rivers and lakes, spacious harbors, including the remarkable Puget Sound basin, and a geographical position which furnishes great commercial advantages. Falls and rapids abound, with great waterpower, the falls at Spokane alone being estimated at 35,000 horsepower.[1] Early industrial development was hindered by lack of transportation facilities, but rapid growth began in 1885, when through railroad communication was established with the older settled parts of the United States. Three transcontinental lines now have their termini at Seattle. In 1897 the discovery of gold in Alaska and in Yukon, and, later, the expanding trade with the Orient, gave new impetus to the industries of the state.

The mineral-bearing deposits of the state are not greatly developed, yet the coal mines in 1899 produced 2,029,881 short tons.[2] The output of gold in 1899 was 33,156 fine ounces, and of silver, 256,000 fine ounces.[3] The largest part of the ore used in lead smelting is brought to Puget Sound

[3] Ibid., page 127.

from the Cœur d'Alene district in Idaho, that it may meet the fuel and encounter ores carrying the precious metals.[1] Much is imported from British Columbia and Mexico. Of the ore used in copper smelting the greater part is of domestic production.

[1] United States Geological Survey: Mineral Resources, 1899, Metallic Products, Coal, and Coke, page 227.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for governmental establishments, penal institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS.		Miscellaneous expenses.	COST OF MATERIALS USED.				Value of products, including custom work and repairing.
				Average number.	Total wages.		Total.	Purchased in raw state.	Purchased in partially manufactured form.	Fuel, freight, etc.	
Total	3,952	$53,866,322	4,448	34,028	$19,178,659	$3,872,908	$49,253,881	$16,842,307	$30,461,281	$1,950,293	$87,105,242
Hand trades[1]	1,418	2,774,105	1,631	4,973	3,443,882	843,172	5,743,572	369,296	5,202,482	171,794	12,646,361
Governmental establishments	2	851,051	-------	86	66,821	-------	70,509	-------	67,859	2,6[illegible]0	137,330
Penal institutions	4	213,751	-------	-------	-------	2,974	57,899	41,816	4,679	11,404	88,914
Establishments with a product of less than $500	315	151,760	342	136	4,965	9,479	26,291	2,265	24,026	-------	83,947
All other establishments	2,213	49,875,655	2,475	28,833	15,662,991	3,017,283	43,355,610	16,428,930	25,162,235	1,764,445	74,148,690

[1] Includes bicycle and tricycle repairing, 50; blacksmithing and wheelwrighting, 267; boots and shoes, custom work and repairing, 143; carpentering, 209; clothing, men's, custom work and repairing, 159; clothing, women's, dressmaking, 71; dyeing and cleaning, 18; furniture, cabinetmaking, repairing, and upholstering, 37; lock and gun smithing, 21; masonry, brick and stone, 38; millinery, custom work, 89; painting, house, sign, etc., 94; plastering and stuccowork, 18; plumbing, and gas and steam fitting, 79; sewing machine repairing, 1; taxidermy, 2; typewriter repairing, 1; watch, clock, and jewelry repairing, 121.

Of the 3,952 establishments of all classes shown in this table, 1,733, or 43.9 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $12,730,308, or only 14.6 per cent of the total value of the products of the state.

In addition to the 3,952 active establishments in the state during the census year, with a capital of $53,866,322, shown in Table 2, there were 42 idle establishments, with a capital of $8,479,707, divided as follows:

INDUSTRIES.	Number of idle establishments.	Capital.	INDUSTRIES.	Number of idle establishments.	Capital.
Agricultural implements	1	$50,000	Glass	1	$60,000
Brick and tile	6	29,953	Iron and steel (blast furnace)	1	468,656
Fish, canning and preserving	2	60,800	Lumber and timber products	12	7,714,493
Flouring and grist mill products	2	17,500	Woolen goods	1	50,250
Fruits and vegetables, canning and preserving	12	18,945	All other industries	4	9,110

TABLE 3.—COMPARATIVE SUMMARY OF TEN LEADING INDUSTRIES.

INDUSTRIES.	Year.	Number of establishments.	Capital.	WAGE-EARNERS.		Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.

The 10 leading industries of the state in 1900, as shown in Table 3, embraced 1,391 establishments, or 38.3 per cent of the total number in the state; used a capital of $37,811,584, or 71.8 per cent of the total; gave employment to 23,080 wage-earners, or 68.3 per cent of the total number; and paid $12,445,522, or 65.1 per cent of the total wages. The value of their products was $52,769,825, or 60.8 per cent of the total. In the discussion of Table 3, which follows, the industries are ranked with reference to the value of their products.

Table 3 shows that the manufacture of lumber and timber products is the most important industry in the state. The 778 establishments reported in 1900 gave employment to 15,696 wage-earners, or 46.4 per cent of the wage-earners in the state, and their products were valued at $30,286,280, or 34.9 per cent of the total value of the products of the state. In 1890 there were 462 establishments, 9,491 wage-earners, and products valued at $17,450,301. The increase in the value of products during the decade was $12,835,979, or 73.6 per cent. A period of special activity marked the close of the decade, 226 establishments having begun operations during the census year. The total stand of merchantable timber in the Puget Sound district, or that part of the state west of the Cascade Mountains, is very large. More than 95 per cent of the entire product of the lumber industry in 1900 was reported from the 19 counties of this section, the center being in King county, where there were 72 establishments, having an aggregate product valued at $5,220,548, or more than one-sixth of the total value of the lumber and timber products of the state. The characteristic products of these mills are red fir lumber and cedar shingles. The first waterpower sawmill was built at Tumwater, about two miles from Olympia, in 1847, and the first logging company was organized at Olympia in 1848.[1] The first steam sawmill in the state was built in 1853, on a site now in the business center of Seattle. The first shingle mill was built in 1854, on McAllister Creek, near the mouth of the Nesqually River.

The manufacture of flouring and grist mill products ranked second among the industries of the state in 1900, with 85 establishments, 488 wage-earners, and products valued at $6,875,672. In 1890 there were 38 establishments, 170 wage-earners, and products valued at $2,460,809. The increase in the value of products during the decade was $4,414,863, or 179.4 per cent. The products in 1900 included 1,868,780 barrels of wheat flour, some of which was exported to China and Japan. Before 1839 Marcus Whitman built a gristmill for his colony at Wallawalla,[2] but the first on Puget Sound did not come into existence until 1846, at the falls of the Deschutes River, about two miles from Olympia.[3]

There were 36 establishments engaged, in 1900, in fish canning and preserving, the industry third in rank, with 2,190 wage-earners, and products valued at $4,831,038. In 1890 there were 7 establishments, 316 wage-earners, and products valued at $525,000. The increase in the value of products during the decade was $4,306,038, or 820.2 per cent. The business of packing and preserving fish, both for domestic use and for sale, began with the settlement of the territory. Salmon and oysters were first shipped to San Francisco in 1850–1851.[4] The waters teemed with fish, and not until the establishment of canneries was there any perceptible decrease in their numbers. The new systems and methods introduced soon depleted the rivers, and in order to restock them the state, in 1895–1896, built its first fish hatchery, on the Kalama River, a tributary of the Columbia.[5] In 1900 the state owned 14 hatcheries, and turned out 57,156,500 young salmon—16,635,500 into the Columbia and 40,521,000 into other rivers.[6]

There were 80 establishments engaged in the manufacture of foundry and machine shop products in 1900, with 1,075 wage-earners, and products valued at $2,257,643. In 1890 there were 27 establishments, 515 wage-earners, and products valued at $1,347,700. The increase in the value of products during the decade was $909,943, or 67.5 per cent. Foundries and machine shops were necessary

adjuncts of sawmills, and some of the early mill companies also made castings for other mills and for steamboats. The first regular custom foundry and machine shop was established at Olympia in 1855.

There were 246 establishments engaged in printing and publishing in 1900, with 930 wage-earners, and products valued at $1,855,730. In 1890 there were 145 establishments, 780 wage-earners, and products valued at $1,678,541. The increase in the value of products during the decade was $177,189, or 10.6 per cent. The first newspaper published in Washington was The Columbian, established at Olympia, September 11, 1852.

There were 36 establishments engaged in wooden ship and boat building in 1900, with 741 wage-earners, and products valued at $1,505,649. In 1890 there were 17 establishments, 171 wage-earners, and products valued at $188,685. The increase in the value of products during the decade was $1,316,964, or 698 per cent. Ship and boat building, one of the pioneer industries of Washington, was begun at several places in 1853.[1] The first steamboat built in the territory was the Julia Barclay, at Port Blakeley, in 1858.[2] Many kinds of craft, ranging from the launch to the battleship, are now constructed at the Washington shipyards. The Washington fir is said to furnish timber peculiarly adapted to shipbuilding because of its great strength, durability, and excellent texture.

There were 16 establishments engaged in car construction and general shop work of steam railroad companies in 1900, with 956 wage-earners, and products valued at $1,479,680. In 1890 there were 4 establishments, 342 wage-earners, and products valued at $461,561. The increase in the value of products during the decade was $1,018,119, or 220.6 per cent.

There were 29 establishments engaged in the manufacture of planing mill products in 1900, with 647 wage-earners, and products valued at $1,257,369. In 1890 there were 39 establishments, 839 wage-earners, and products valued at $2,030,279. The decrease in the value of products during the decade was $772,910, or 38.1 per cent.

There were 25 establishments engaged in the manufacture of malt liquors in 1900, with 211 wage-earners, and products valued at $1,230,525. In 1890 there were 13 establishments, 209 wage-earners, and products valued at $1,178,306. The increase in the value of products during the decade was $52,219, or 4.4 per cent. The first brewery in the state was built at Steilacoom, Pierce county, in 1854. The beer was brewed in an open 5-barrel kettle suspended from a crane over an open fire. The state produces both barley and hops of a superior quality in quantities sufficient for domestic uses. In 1899 the barley crop was 1,410,360 bushels.[3]

There were 60 establishments engaged in the factory manufacture of cheese, butter, and condensed milk in 1900, with 146 wage-earners, and products valued at $1,190,239. In 1890 there were 3 establishments, 3 wage-earners, and products valued at $33,100. The increase in the value of products during the decade was $1,157,139. The state has good dairying facilities, and there is an increasing demand for butter and cheese, much of which is still supplied by other states. In 1900 the creameries and cheese factories produced 3,198,421 pounds of butter and 1,482,127 pounds of cheese. The first creamery operated continuously in Washington was built at Ridgefield, Clarke county, in 1886.

Slaughtering and meat packing can not be shown in the comparative summary of leading industries, because the figures in 1890 were not published separately. The combined products of the 18 slaughtering and meat packing establishments reported in 1900 amounted to $4,892,857. There are several other important industries the statistics of which can not be shown, because the number of establishments in each is less than 3, and publication of the figures would disclose the operations of individual establishments. These industries include copper smelting and refining, the manufacture of iron and steel, lead smelting and refining, and the manufacture of paper and wood pulp. The paper mills not only supply the local market and the markets of the other Pacific coast states, but export products to Hawaii, Australia, China, and Japan.[4]

URBAN MANUFACTURES.

Table 4 shows the totals for the manufacturing and mechanical industries of the cities of Seattle and Tacoma, as returned at the censuses of 1890 and 1900, with the percentages of increase.

	1890	36.0	34.9	39.8	52.7	44.0	50.0	49.4

[1] Decrease.

It appears from Table 4 that there has been a large increase during the past decade in the manufactures of these 2 cities. The number of establishments increased from 556 to 1,334, or 139.9 per cent; the average number of wage-earners from 7,426 to 12,827, or 72.7 per cent; and the value of products from $20,635,962 to $38,402,899, or 86.1 per cent.

Seattle, the leading manufacturing city of the state, shows the more rapid growth. The number of establishments increased from 331 to 953, or 187.9 per cent; the average number of wage-earners from 3,768 to 8,480, or 125.1 per cent; and the value of products from $10,203,007 to $26,373,402, or 158.5 per cent. The number of establishments, number of wage-earners, and value of products in this city in 1900 constituted 26.2, 25.1, and 30.4 per cent, respectively, of the totals for the state.

Table 5 presents the totals for the manufacturing industries of the 9 cities withdrawn from the enumerators and places them in comparison with the totals for the entire state and the state exclusive of these cities.

TABLE 5.—URBAN MANUFACTURES.

Per cent of urban manufactures to total for state	51.5	48.3	49.3	51.3	53.8	73.1	59.2	59.0

Of the 3,631 establishments in the state, 1,871, or 51.5 per cent, were located in these 9 cities. They furnished employment to 17,356 wage-earners, or 51.3 per cent of the total number, and the value of their products, $51,219,242, formed 59 per cent of the total for the state.

Table 6 shows the totals for the state by counties.

Table 7 shows the totals for the state by specified industries.

Table 8 shows the totals for the cities of Seattle, Spokane, and Tacoma by specified industries.

Table 9 shows the totals for the cities withdrawn from the enumerators, exclusive of those shown in Table 8.

WEST VIRGINIA.

West Virginia was organized as a state in 1863, and therefore first appeared in census statistics in 1870.

Table 1 shows the manufacturing and mechanical industries of the state as returned at the censuses of 1870 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1870 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.				PER CENT OF INCREASE.		
	1900	1890	1880	1870	1890 to 1900	1880 to 1890	1870 to 1880

Per cent of total population	3.5	2.5	2.3	2.6			
Assessed value of real estate	[6]$172,250,553	$121,202,365	$105,000,306	$95,924,774	42.1	15.4	9.5
Value of land and buildings invested in manufactures [7]	$15,096,225	$7,754,341	(4)	(4)	94.7		
Per cent of assessed value	8.8	6.4					

[1] Less than one-tenth of 1 per cent.
[2] Decrease.
[3] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 7.)
[4] Not reported separately.
[5] Not reported.
[6] As given for the year 1899, in the Report of the Auditor of the State of West Virginia, page 46.
[7] Does not include value of rented property.

Although West Virginia is an agricultural state, Table 1 shows that there has been a considerable growth in the manufacturing and mechanical industries during the last thirty years. The population during these years increased from 442,014 to 958,800, or 116.9 per cent, while the average number of wage-earners employed in manufacturing establishments increased from 11,672 to 33,272, or 185.1 per cent, embracing, in 1900, 3.5 per cent of the entire population, compared with 2.6 per cent in 1870. Probably the best indication of the importance of the wage-earning class is afforded by the greatest number employed at any one time during the year. In 1900 this was 45,111, or 4.7 per cent of the total population of the state. The greatest increase in the value of products, $36,136,205, or 93.4 per cent, is shown for the decade ending with the year 1900. During the decade from 1870 to 1880 there was a decrease of 5.1 per cent in the value of products. The values for 1870, however, were expressed in a currency which was at a discount in gold, and should be reduced by about one-fifth for purposes of comparison with other census years.

Manufactures in West Virginia are very largely located in the northern part of the state and along the Ohio River, which for 300 miles forms its western boundary. The value of products reported in 1900 for the 12 counties bordering upon this river amounted to $43,990,709, or 58.8 per cent of the total for the state. Four of these counties, situated within the narrow strip of territory between the Ohio River and Pennsylvania, reported 43.8 per cent of the state's total value of products. This localization, which was shown also at the census of 1860, is due partly to the shipping facilities furnished by the Ohio River and partly to abundant supplies of gas and coal in this part of the state. The first natural gas known in America was discovered in West Virginia, and it was here also that it was first used for manufacturing purposes.[1] At the close of 1899 there were in the state 1,646.3 miles of pipe for conveying natural gas to consumers and the production of that year, valued at $2,335,864, was exceeded by only two states, Pennsylvania and Indiana.[2] Natural gas has no equal as fuel in the manufacture of glass, the puddling of iron, and the heating of large furnaces in the manufacture of steel. In West Virginia, during 1899, it was used in 305 establishments in these and other industries.[3] Many

[3] Ibid., page 302.

of the factories in Wheeling use coal mined within or near the city limits, while others are supplied from the coal fields of Marion county, 50 miles distant.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for educational and eleemosynary institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS.		Miscellaneous expenses.	COST OF MATERIALS USED.				Value of products, including custom work and repairing.
				Average number.	Total wages.		Total.	Purchased in raw state.	Purchased in partially manufactured form.	Fuel, freight, etc.	
Total	6,364	$56,392,364	7,135	33,481	$12,987,194	$3,963,478	$43,170,729	$14,233,141	$26,979,337	$1,958,251	$75,259,094
Hand trades[1]	1,386	2,206,747	1,520	2,626	1,029,018	302,239	2,104,484	19,650	2,009,677	75,157	4,794,829
Educational and eleemosynary institutions	3	11,910				37	21,095		20,901	194	30,853
Establishments with a product of less than $500	1,943	476,216	2,051	209	17,957	17,627	142,754	46,528	96,226		389,911
All other establishments	3,032	53,697,491	3,564	30,646	11,940,219	3,643,575	40,902,396	14,166,963	24,852,533	1,882,900	70,043,501

[1] Includes bicycle and tricycle repairing, 16; blacksmithing and wheelwrighting, 580; boots and shoes, custom work and repairing, 116; carpentering, 93; clothing, men's, custom work and repairing, 116; clothing, women's, dressmaking, 47; dyeing and cleaning, 9; furniture, cabinetmaking, repairing, and upholstering, 43; lock and gun smithing, 5; masonry, brick and stone, 39; millinery, custom work, 127; painting, house, sign, etc., 43; paper hanging, 3; plastering and stuccowork, 12; plumbing, and gas and steam fitting, 46; sewing machine repairing, 2; watch, clock, and jewelry repairing, 89.

Of the 6,364 establishments of all classes shown in this table, 3,329, or 52.3 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $5,184,740, or 6.9 per cent of the total products of the state.

In addition to the 6,364 active establishments in the state during the census year, with a capital of $56,392,364, shown in Table 2, there were 33 idle establishments, with a capital of $868,450, divided as follows:

INDUSTRIES.	Number of idle establishments.	Capital.	INDUSTRIES.	Number of idle establishments.	Capital.
Brick and tile	4	$41,000	Glass	5	$335,720
Explosives	1	68,200	Iron and steel	2	380,535
Flouring and grist mill products	10	12,013	Leather, tanned, curried, and finished	2	15,700
Fruits and vegetables, canning and preserving	1	10,250	All other industries	8	5,032

	1890	50	493,113	444	181,196	25,623	543,793	910,640

The 10 leading industries of the state in 1900, as shown in Table 3, embraced 2,061 establishments, or 46.7 per cent of the total number in the state; used a capital of $36,532,455, or 65.3 per cent of the total; gave employment to 21,422 wage-earners, or 64.4 per cent of the total number; and paid $8,677,943, or 66.9 per cent of the total wages. The value of their products was $48,987,302, or 65.5 per cent of the total. In the discussion of Table 3, which follows, these industries are ranked with reference to the value of their products.

Table 3 shows that the manufacture of iron and steel is the most important industry in the state. The 11 establishments reported in 1900 gave employment to 4,467 wage-earners, or 13.4 per cent of the wage-earners employed in the state, and their products were valued at $16,514,212, or 22.1 per cent of the total value of the products of the state. In 1890 there were 12 establishments, 3,757 wage-earners, and products valued at $10,556,865. The increase in the value of products during the decade was $5,957,347, or 56.4 per cent. This is a greater absolute increase than is shown for any other industry. The products of the blast furnaces for 1900 were valued at $3,119,301, while the value of the products of the rolling mills and steel works, including tin and terne plate, amounted to $14,857,344. The first rolling mill west of the Allegheny Mountains, of which there is any exact record, was in operation near Morgantown as early as 1812.[1] Cut nails were among the products of this pioneer mill, a manufacture which afterward became so important that Wheeling, its chief center, was at one time known as "The Nail City." The industry has declined in recent years as a result of the greater demand for wire nails, which have never been very largely manufactured in West Virginia. The iron and steel manufacture of the state is confined to Wheeling and its vicinity. Its development there is due, in part, to the cheapness of fuel—natural gas being used in almost all the rolling mills—and also to the proximity of the Pittsburg (Pa.) district.

The manufacture of lumber and timber products ranked second among the industries of the state in 1900, with 950 establishments, 5,327 wage-earners, and products valued at $10,612,837. In 1890 there were 454 establishments, with 4,182 wage-earners, and products valued at $5,515,065. The increase in the value of products during the decade was $5,097,772, or 92.4 per cent. In 1898 there were in the state 16,000 square miles of forests, including spruce, poplar, and one of the largest areas of hard-wood timber in the United States.[2] There was little development of the state's forest wealth until after 1865, owing to the lack of transportation facilities,[3] and in 1870 lumbering held only fifth rank among the industries of the state. The railroad construction between the years 1896 and 1900 opened up new regions for lumbering operations and explains, in part, the rapid increase in the industry since 1890. The greatest production shown is for the mountainous counties in the eastern part of the state, the city of Charleston being an important lumber center.

There were 737 establishments engaged in flour and grist milling in 1900, the industry third in rank, with 314 wage-earners, and products valued at $5,541,353. In 1890, 496 establishments were reported, with 545 wage-earners, and products valued at $3,902,994. The increase in the value of products during the decade was $1,638,359, or 42 per cent. This is the first notable increase in this industry since the formation of the state, the value of the products reported at the censuses of 1870, 1880, and 1890 being, in each instance, nearly the same.

There were 77 establishments engaged in the manufacture of coke in 1900, with 3,131 wage-earners, and products valued at $3,529,241. In 1890, 45 establishments were reported, with 1,034 wage-earners, and products valued at $1,130,762. The increase in the value of products during the decade was 212.1 per cent. The development of this industry in West Virginia during the last twenty years is remarkable. In 1880 the state produced 3.5 per cent of the coke made in the United States; in 1889, 6.1 per cent; and in 1899, 11.6 per cent, ranking second only to Pennsylvania in that year.[4] This high rank is due, not so much to the large coal production of the state, which was but 7.6 per cent of the total production in 1899, as to the special suitability of this coal for coking purposes. One-half of the entire production in 1890 was

from the ovens of the Flat Top District in the southern part of the state. Next to the Connellsville District this is the most important coking region in the United States.[1] The recent completion by the United States Government of a series of 11 locks and dams on the Kanawha River, rendering it navigable for 90 miles from its mouth, has stimulated the coke as well as the coal production of the Kanawha District drained by this river.

There were 46 establishments engaged in the tanning and currying of leather in 1900, with 664 wage-earners, and products valued at $3,210,753. In 1890 there were 50 establishments, with 210 wage-earners, and products valued at $896,120. The increase in the value of products during the decade was $2,314,633, or 258.3 per cent. Tanning has been carried on in West Virginia in a small way since the early days of its settlement as a part of Virginia. In 1860 the value of leather manufactured in Ohio county alone was $104,150. But it was during the last decade that the industry became of special importance. The extensive oak and hemlock forests furnish the bark for tanning purposes,[2] and the rapid growth of the industry since 1890 must be attributed to the increased supply of this material, made available by the great increase in lumbering. The largest production of leather in 1900 was in the eastern and northeastern parts of the state, a region from which a very large lumber product was also reported.

There were 23 establishments engaged in the car construction and general shop work of steam railroad companies in 1900, with 2,605 wage-earners, and products valued at $2,943,557. In 1890 there were 7 establishments, with 1,022 wage-earners, and products valued at $910,393. The increase in the value of products during the decade was $2,033,164, or 223.3 per cent.

There were 16 establishments engaged in the manufacture of glass in 1900, with 1,949 wage-earners, and products valued at $1,871,795. In 1890 there were 7 establishments, with 1,371 wage-earners, and products valued at $945,234. The increase in the value of products during the decade was $926,561, or 98 per cent. These products included 2,288,580 dozen blown tumblers, stem ware, and bar goods, and 61,547 dozen lamps. Glass produced in these factories during the census year was exported to Australia, Canada, Mexico, England, South America, and South Africa. Glass has been manufactured in what is now West Virginia since 1821, when a window glass factory was erected in Wheeling, and it was in this city, in 1864, that the second great improvement in the glass manufacture of modern times was made.[3] The cost of manufacture was reduced by one-half by the discovery of a process which caused the substitution of lime glass for flint glass in the finer products. The cheapness of natural gas, as well as the superior glass produced as a result of the absence of sulphur,[4] caused this fuel to be employed almost exclusively in the glass works of the state in 1900.

There were 62 establishments engaged in the manufacture of foundry and machine shop products in 1900, with 591 wage-earners, and products valued at $1,401,852. In 1890 there were 30 establishments, with 355 wage-earners, and products valued at $506,513. The increase in the value of products during the decade was $895,339, or 176.8 per cent. These products included machinery used in the factories and mines, several establishments in and near Parkersburg, the oil center of the state, making the manufacture and repair of oil-drilling machinery a specialty.

There were 83 establishments engaged in the manufacture of planing mill products in 1900, with 555 wage-earners, and products valued at $1,820,463. In 1890 there were 50 establishments, with 444 wage-earners, and products valued at $910,640. The increase in the value of products during the decade was $909,823, or 99.9 per cent.

There were 14 establishments engaged in the manufacture of pottery, terra cotta, and fire-clay products in 1900, with 1,269 wage-earners, and products valued at $1,104,883. In 1890, 8 establishments were reported, with 61 wage-earners, and products valued at $55,372. The increase in the value of products during the decade was $1,049,511, or 1,895.4 per cent. These products included porcelain china and other porcelain ware, and vitrified brick. The industry is carried on almost exclusively in the extreme northern part of the state in the vicinity of East Liverpool, Ohio, one of the most important centers of the pottery manufacture in the United States.

URBAN MANUFACTURES.

Table 4 shows the totals for the manufacturing and mechanical industries of the city of Wheeling, as returned at the censuses of 1880, 1890, and 1900, with percentages of increase.

TABLE 4.—COMPARATIVE SUMMARY, WHEELING, 1880, 1890, AND 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.			PER CENT OF INCREASE.	
	1900	1890	1880	1890 to 1900	1880 to 1890
Number of establishments	406	418	227	[1] 2.9	84.1
Capital	$13,224,577	$8,494,630	$4,868,288	55.7	74.5
Wage-earners, average number	7,219	6,107	5,512	18.2	10.8
Total wages	$3,096,730	$2,471,162	$2,192,255	25.3	12.7
Miscellaneous expenses	$1,954,205	$1,205,931	([2])	62.0	----------
Cost of materials used	$9,076,978	$7,381,940	$5,203,931	23.0	41.9
Value of products, including custom work and repairing	$16,747,544	$13,022,589	$9,259,844	28.6	40.6

[1] Decrease. [2] Not reported.

It appears from Table 4 that there has been a considerable increase during the past decade in the manufactures of Wheeling, the principal city of the state. Although the number of establishments decreased from 418 to 406, or 2.9 per cent, there was an increase in the average number of wage-earners from 6,107 to 7,219, or 18.2 per cent; and in the value of products from $13,022,589 to $16,747,544, or 28.6 per cent. The increase was much smaller in Wheeling than in the state as a whole. The number of establishments, number of wage-earners, and value of products reported for this city in 1900 constituted 9.2, 21.7, and 22.4 per cent, respectively, of the totals for the entire state.

Table 5 presents the totals for the manufacturing industries of the 6 cities and towns withdrawn from the enumerators and places them in comparison with the totals for the entire state and the state exclusive of these cities and towns.

TABLE 5.—URBAN MANUFACTURES.

	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS.		Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.

WISCONSIN.

Table 1 shows the manufacturing and mechanical industries of Wisconsin as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.						PER CENT OF INCREASE.				
	1900	1890	1880	1870	1860	1850	1890 to 1900	1880 to 1890	1870 to 1880	1860 to 1870	1850 to 1860
Number of establishments	16,187	10,417	7,674	7,013	3,064	1,262	55.4	35.7	9.4	128.9	142.8

Per cent of assessed value	20.7	17.7	------	------	------	------	------	------	------	------	------

[1] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 7.)
[2] Not reported separately.
[3] Decrease.
[4] Not reported.
[5] Exclusive of 6,126 Indians and other persons on Indian reservations, which classes were not included at previous censuses.
[6] As given for the year 1900 in Dana's supplement, "State and City," to the Commercial and Financial Chronicle, under date of April 13, 1901.
[7] Does not include value of rented property.

Table 1 shows that there has been a notable growth in the manufacturing and mechanical industries of Wisconsin during the half century. The population during these years increased from 305,391 to 2,062,916, while the average number of wage-earners employed in manufacturing establishments increased from 6,089 to 142,076, embracing, in 1900, 6.9 per cent of the entire population, compared with 2 per cent in 1850. Probably the best indication of the importance of the wage-earning class is afforded by the greatest number employed at any one time during the year. In 1900 this was 194,991, or 9.5 per cent of the total population of the state. Measured by the value of products, the greatest percentage of increase, 199.7, was during the decade ending with the year 1860, although the greatest absolute increase was between the years 1880 and 1890.

The remarkable growth of manufactures in Wisconsin is to be attributed to an abundant supply of materials and excellent market facilities. Manufacturing is not concentrated in a few localities, but is distributed throughout the state. Six large rivers—the Menominee, St. Croix, Chippewa, Wisconsin, Fox, and Wolf—with many smaller streams, and nearly two thousand fresh-water lakes in the northern part of the state, afford enormous waterpower, as yet only partially developed. On the western boundary of the state are 250 miles of navigable rivers, while the Great Lakes extend for more than 400 miles along the northern and eastern borders. On the shores of Lake Michigan and Green Bay are 11 important manufacturing cities, all accessible to lake-going vessels; and the cities of Ashland and Superior, on Lake Superior, are large and growing manufacturing centers. In 1900 Wisconsin had 6,531 miles of railroads, which have contributed to the development of agriculture and manufactures.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for a governmental establishment, educational, eleemosynary, and penal institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	COST OF MATERIALS USED. Total.	COST OF MATERIALS USED. Purchased in raw state.	COST OF MATERIALS USED. Purchased in partially manufactured form.	COST OF MATERIALS USED. Fuel, freight, etc.	Value of products, including custom work and repairing.
Total	18,259	$331,691,656	19,468	143,027	$58,449,055	$30,982,395	$209,117,735	$84,508,738	$115,390,995	$9,218,002	$361,696,978
Hand trades[1]	6,054	10,031,550	6,984	14,064	6,047,117	1,388,658	12,212,150	382,551	11,531,179	298,420	26,424,816
Governmental establishment	1	4,100		3	1,920		20		20		2,428
Educational, eleemosynary, and penal institutions	10	187,645		242	10,230	2,000	96,914	7,970	85,732	3,212	117,692
Establishments with a product of less than $500	2,061	931,132	2,221	706	29,308	45,041	182,634	27,001	154,767	866	757,916
All other establishments	10,133	320,537,229	10,263	128,012	52,360,480	29,546,696	196,626,017	84,091,216	103,619,297	8,915,504	334,394,126

[1] Includes bicycle and tricycle repairing, 179; blacksmithing and wheelwrighting, 1,581; boots and shoes, custom work and repairing, 612; carpentering, 665; clothing, men's, custom work and repairing, 661; clothing, women's, dressmaking, 224; dyeing and cleaning, 29; furniture, cabinetmaking, repairing, and upholstering, 142; lock and gun smithing, 44; masonry, brick and stone, 223; millinery, custom work, 611; painting, house, sign, etc., 379; paper hanging, 23; plastering and stuccowork, 54; plumbing, and gas and steam fitting, 248; sewing machine repairing, 9; taxidermy, 4; watch, clock, and jewelry repairing, 366.

Of the 18,259 establishments of all classes shown in this table, 8,115, or 44.4 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $27,182,732, or only 7.5 per cent of the total value of the products of the state.

In addition to the 18,259 active establishments in the state during the census year, with a capital of $331,691,656, shown in Table 2, there were 98 idle establishments, with a capital of $2,836,898, divided as follows:

INDUSTRIES.	Number of idle establishments.	Capital.	INDUSTRIES.	Number of idle establishments.	Capital.
Baskets, and rattan and willow ware	1	$67,000	Lime and cement	3	$9,900
Bicycle and tricycle repairing	2	11,540	Lumber and timber products	18	312,335
Brick and tile	11	51,420	Lumber, planing mill products, including sash, doors, and blinds	8	10,100
Cheese, butter, and condensed milk, factory product	15	44,926	Malt	1	24,000
Flouring and grist mill products	11	296,075	Marble and stone work	1	27,351
Foundry and machine shop products	2	14,000	Oil, linseed	1	15,000
Fruits and vegetables, canning and preserving	1	9,000	Paper and wood pulp	1	400,000
Furniture, factory product	1	47,000	Woolen goods	2	34,000
Hosiery and knit goods	2	30,519	All other industries	19	27,402
Iron and steel	1	1,320,325			
Leather, tanned, curried, and finished	2	85,005			

TABLE 3.—COMPARATIVE SUMMARY OF TWENTY LEADING INDUSTRIES.

The 20 leading industries of the state in 1900, as shown in Table 3, embraced 6,397 establishments, or 39.5 per cent of the total number in the state; used a capital of $258,990,016, or 78.3 per cent of the total; gave employment to 91,674 wage-earners, or 64.5 per cent of the total number; and paid $39,569,374, or 67.7 per cent of the total wages. The value of their products was $263,982,867, or 73.2 per cent of the total. In the discussion of Table 3, which follows, the industries are ranked with reference to the value of their products.

Table 3 shows that the manufacture of lumber and timber products is the most important industry in the state. The 1,066 establishments reported in 1900 gave employment to 21,701 wage-earners, or 15.3 per cent of the wage-earners in the state, and their products were valued at $57,634,816, or 16 per cent of the total value of the products of the state. In 1890 there were 1,119 establishments, 41,305 wage-earners, and products valued at $60,966,444. The decrease in the value of products during the decade was $3,331,628, or 5.5 per cent. Notwithstanding this decrease, Wisconsin in 1900 was the first among the states in the value of its lumber and timber products; Michigan, which was first in 1890, also suffered a decline. Most of the timber has been removed from the southern part of the state, yet in the north there is still an abundance of pine, hemlock, spruce, and deciduous timber. During the census year, including custom sawing, there were produced 3,389,166,000 feet of sawed lumber.

The manufacture of flouring and grist mill products ranked second among the industries of the state in 1900, with 717 establishments, 1,412 wage-earners, and products valued at $26,327,942. In 1890 there were 497 establishments, 1,770 wage-earners, and products valued at $24,252,297. The increase in the value of products during the decade was $2,075,645, or 8.6 per cent. Although the agricultural interests of the state are important and extensive, much of the material for this industry is brought from other states. The Wisconsin wheat crop of 1899 was 11,773,382 bushels,[1] while 22,356,963 bushels of wheat were consumed by the mills of the state.

There were 272 establishments engaged in 1900 in the manufacture of foundry and machine shop products, the industry third in rank, with 12,670 wage-earners, and products valued at $22,252,730. In 1890 there were 155 establishments, 4,987 wage-earners, and products valued at $8,467,290. The increase in the value of products during the decade was $13,785,440, or 162.8 per cent. This is a greater absolute increase than is shown for any other industry. The products of this industry include machinery for motive power (principally gas and steam engines and boilers), and for the equipment of lumber, flour, and paper mills, breweries, and mines. Milwaukee is the principal seat of this industry, with products valued at $14,495,362, or 65.1 per cent of the total for the state.

[1] Yearbook of the Department of Agriculture, 1899, page 766.

There were 2,018 establishments engaged in the factory manufacture of cheese, butter, and condensed milk in 1900, with 1,780 wage-earners, and products valued at $20,120,147. In 1890 there were 966 establishments, 1,373 wage-earners, and products valued at $6,960,711. The increase in the value of products during the decade was $13,159,436, or 189.1 per cent. The striking growth of this industry in the last decade has brought the state to the second place in value of products in 1900, instead of fourth as in 1890. The products in 1900 included 61,813,502 pounds of butter and 77,748,680 pounds of cheese.

There were 42 establishments engaged in the tanning, currying, and finishing of leather in 1900, with 5,262 wage-earners, and products valued at $20,074,373. In 1890 there were 38 establishments, 2,487 wage-earners, and products valued at $11,161,850. The increase in the value of products during the decade was $8,912,523, or 79.8 per cent. An abundant supply of tan-bark, the result of the extensive lumber operations in the state, has contributed much to the growth of the leather industry.

There were 147 establishments engaged in the manufacture of malt liquors in 1900, with 3,904 wage-earners, and products valued at $19,394,709. In 1890 there were 107 establishments, 2,859 wage-earners, and products valued at $14,193,057. The increase in the value of products during the decade was $5,201,652, or 36.6 per cent. This was the third industry in importance in 1890, measured by the value of products, and while other industries have had a more rapid growth, the figures given show that the increase in this state is more than commensurate with the increase throughout the country, Wisconsin ranking fourth in 1900, as compared with fifth in 1890. Milwaukee continues to be the principal seat of this industry, the value of products having increased from $10,810,695 in 1890 to $13,899,390 in 1900.

There were 11 establishments engaged in slaughtering and meat packing in 1900, with 1,361 wage-earners, and products valued at $13,601,125. In 1890 there were 15 establishments, 737 wage-earners, and products valued at $8,393,754. The increase in the value of products during the decade was $5,207,371, or 62 per cent.

There were 47 establishments engaged in the manufacture of paper and wood pulp in 1900, with 4,240 wage-earners, and products valued at $10,895,576. In 1890 there were 27 establishments, 1,779 wage-earners, and products valued at $4,475,368. The increase in the value of products during the decade was $6,420,208, or 143.5 per cent. These mills are situated mainly on the large rivers which afford the abundant power so essential to the successful conduct of this industry. The large quantities of spruce, hemlock, and other woods used are furnished by the forests of the state, and the quality of the water is unexcelled for paper-making purposes.

There were 12 establishments engaged in the manufacture of iron and steel in 1900, with 1,921 wage-earners, and products valued at $8,905,226. In 1890 there were 9 establishments, 1,890 wage-earners, and products valued at $6,501,761. The increase in the value of products during the decade was $2,403,465, or 37 per cent. The iron ore mined in the northern part of the state is among the best in the world.

There were 78 establishments engaged in the factory manufacture of furniture in 1900, with 7,775 wage-earners, and products valued at $8,721,823. In 1890 there were 46 establishments, 2,909 wage-earners, and products valued at $3,616,517. The increase in the value of products during the decade was $5,105,306, or 141.2 per cent.

There were 123 establishments engaged in the manufacture of planing mill products in 1900, with 4,377 wage-earners, and products valued at $8,400,695. In 1890 there were 88 establishments, 3,480 wage-earners, and products valued at $6,295,810. The increase in the value of products during the decade was $2,104,885, or 33.4 per cent. The manufacture of furniture and of planing mill products are closely allied to lumbering, the principal industry of the state, and their development has been fostered by the abundant supply of available material. These three industries, directly dependent on the forests for their materials, had a combined product valued at $74,757,334, or 20.7 per cent of the total for all industries of the state.

There were 51 establishments engaged in the manufacture of agricultural implements in 1900, with 3,289 wage-earners, and products valued at $7,886,363. In 1890 there were 51 establishments, 2,765 wage-earners, and products valued at $5,015,512. The increase in the value of products during the decade was $2,870,851, or 57.2 per cent. The growth of this industry has been stimulated by proximity to the markets of Wisconsin and other grain-growing states, and by the ready supply of both wood and iron.

There were 436 establishments engaged in the manufacture of carriages and wagons in 1900, with 3,402 wage-earners, and products valued at $6,956,341. In 1890 there were 500 establishments, 3,251 wage-earners, and products valued at $5,947,499. The increase in the value of products during the decade was $1,008,842, or 17 per cent.

There were 46 establishments engaged in car construction and general shop work of steam railroad companies in 1900, with 4,502 wage-earners, and products valued at $6,306,823. In 1890 there were 22 establishments, 2,148 wage-earners, and products valued at $2,221,152. The increase in the value of products during the decade was $4,085,671, or 183.9 per cent.

There were 628 establishments engaged in the manufacture of tobacco in 1900, with 2,269 wage-earners, and products valued at $4,888,030. In 1890 there were 359 establishments, 1,896 wage-earners, and products valued at $3,737,577. The increase in the value of products during the decade was $1,150,453, or 30.8 per cent. The cultivation of tobacco was introduced in 1850,[1] and large quantities are now produced, especially of grades suitable for use in cigars. The value of cigars and cigarettes produced in 1900 was $3,255,676, and of chewing and smoking tobacco and snuff, $1,632,354.

[1] Yearbook of the Department of Agriculture, 1899, page 432.

There were 40 establishments engaged in the factory manufacture of boots and shoes in 1900, with 2,507 wage-earners, and products valued at $4,791,684. In 1890 there were 32 establishments, 2,036 wage-earners, and products valued at $2,972,233. The increase in the value of products during the decade was $1,819,451, or 61.2 per cent.

There were 89 establishments engaged in the factory manufacture of men's clothing in 1900, with 2,327 wage-earners, and products valued at $4,393,092. In 1890 there were 27 establishments, 2,662 wage-earners, and products valued at $3,909,726. The increase in the value of products during the decade was $483,366, or 12.4 per cent.

There were 62 establishments engaged in the manufacture of textiles in 1900, with 3,930 wage-earners, and products valued at $4,238,242. In 1890 there were 60 establishments, 3,747 wage-earners, and products valued at $4,100,201. The increase in the value of products during the decade was $138,041, or 3.4 per cent. The value of hosiery and knit goods increased from $1,635,641 in 1890 to $2,486,813 in 1900, or 52 per cent. This was the only one of the textile industries which showed an advance. The value of the woolen goods produced in the state declined from $1,844,364 in 1890 to $1,435,368 in 1900, or 22.2 per cent, and that of cotton goods from $620,196 to $316,061, or 49 per cent.

There were 495 establishments engaged in the printing and publishing of newspapers and periodicals in 1900, with 2,679 wage-earners, and products valued at $4,103,415. In 1890 there were 379 establishments, 2,218 wage-earners, and products valued at $3,256,897. The increase in the value of products during the decade was $846,518, or 26 per cent.

There were 17 establishments engaged in the manufacture of malt in 1900, with 366 wage-earners, and products valued at $4,089,715. In 1890 there were 15 establishments, 339 wage-earners, and products valued at $2,472,018. The increase in the value of products during the decade was $1,617,697, or 65.4 per cent. This industry is tributary to the manufacture of malt liquors, and does not include the grain malted by brewers for their own use or for sale.

URBAN MANUFACTURES.

Table 4 shows the totals for the manufacturing and mechanical industries of the cities of La Crosse, Milwaukee, Oshkosh, and Racine, as returned at the censuses of 1890 and 1900, with the percentages of increase.

TABLE 4.—COMPARATIVE SUMMARY, LA CROSSE, MILWAUKEE, OSHKOSH, AND RACINE, 1890 AND 1900, WITH PER CENT OF INCREASE.

	Year.	Number of establishments.	Capital.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.
The State	1900	16,187	$330,568,779	142,076	$58,407,597	$30,935,354	$208,838,167	$360,818,942

	1890	35.4	39.4	43.4	50.9	54.7	48.7	49.8

[1] Decrease.

It appears from Table 4 that there has been a considerable increase during the past decade in the manufactures of these 4 cities. The number of establishments increased from 3,692 to 4,134, or 12 per cent; the average number of wage-earners from 52,071 to 62,709, or 20.4 per cent; and the value of products from $123,744,437 to $153,352,242, or 23.9 per cent. The city of Racine shows the most rapid growth, the value of products having increased from $8,462,359 to $12,502,796, or 47.7 per cent. The city of La Crosse shows a general decrease, due to the exhaustion of the forests tributary to its lumber mills, which in 1890 turned out products valued at $3,570,522, while in 1900 the value was only $1,544,410.

In Milwaukee, the leading city of the state, the number of establishments increased from 2,879 in 1890 to 3,342 in 1900, or 16.1 per cent; the average number of wage-earners from 38,850 to 48,328, or 24.4 per cent; and the value of products from $97,503,951 to $123,786,449, or 27 per cent. The number of establishments, number of wage-earners, and value of products in this city in 1900 constituted 20.6, 34, and 34.3 per cent, respectively, of the totals for the state.

Table 5 presents the totals for the manufacturing industries of the 53 cities and towns withdrawn from the enumerators, places them in comparison with the totals for the entire state and the state exclusive of these cities and towns, and shows their rank in population and in value of products.

TABLE 5.—URBAN MANUFACTURES.

Per cent of urban manufactures to total for state	51.5	75.6	51.8	80.3	80.1	83.9	68.8	72.8	-------	-------	36.9	-------	-------

[1] Exclusive of 6,126 Indians and other persons on Indian reservations, which classes were not included at previous censuses.

Of the 16,187 establishments in the state, 8,329, or 51.5 per cent, were located in these 53 cities and towns. They furnished employment to 114,030 wage-earners, or 80.3 per cent of the total number, and the value of their products, $262,595,610, formed 72.8 per cent of the total for the state.

Table 6 shows the totals for the state by counties.

Table 7 shows the totals for the state by specified industries.

Table 8 shows the totals for the cities of La Crosse, Milwaukee, Oshkosh, Racine, Sheboygan, and Superior by specified industries.

Table 9 shows the totals for the cities and towns withdrawn from the enumerators, exclusive of those shown in Table 8.

TABLE 6.—MANUFACTURES

	COUNTIES.	Number of establishments.	CAPITAL. Total.	Land.	Buildings.	Machinery, tools, and implements.	Cash and sundries.	Proprietors and firm members.	SALARIED OFFICIALS, CLERKS, ETC. Number.	Salaries.	AVERAGE NUMBER OF WAGE-EARNERS AND TOTAL WAGES. Total. Average number.	Wages.
1	The State	16,187	$330,568,779	$60,375,729	$44,014,040	$62,101,320	$164,077,690	17,247	10,760	$10,608,383	142,076	$58,407,597

WYOMING.

Table 1 shows the manufacturing and mechanical industries of the state of Wyoming, as returned at the censuses of 1870 (the first census at which separate totals were published) to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1870 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.				PER CENT OF INCREASE.		
	1900	1890	1880	1870	1890 to 1900	1880 to 1890	1870 to 1880

Per cent of total population	2.5	1.7	1.9	5.5			
Assessed value of real estate	(6)	$12,719,221	$4,485,291	$863,665		183.6	419.3
Value of land and buildings invested in manufactures[7]	$652,886	$356,090	(3)	(3)	83.3		
Per cent of assessed value		2.8					

[1] Decrease.
[2] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 5.)
[3] Not reported separately.
[4] Not reported.
[5] Exclusive of 1,961 Indians and other persons on Indian reservations, which classes were not included at previous censuses.
[6] Figures not available.
[7] Does not include value of rented property.

The increase in the number of establishments reported in Wyoming since 1870—nearly tenfold—would seem to indicate a marked development in the manufacturing and mechanical industries of the state during the past thirty years. Wyoming, however, is chiefly a stock-raising and mining region, and the manufactures are almost entirely limited to products which are for local consumption; therefore, the increase in the number of establishments has been chiefly in the neighborhood industries, which are carried on in small shops, and the capital invested, wages paid, and value of products have not increased in the same ratio. Rich deposits of iron ore have been exploited and abundant supplies of petroleum discovered in recent years, but the lack of transportation facilities has proved a serious handicap to their rapid development, and, consequently, to the development of the manufactures which are closely allied to these industries.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for governmental establishments and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables, and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	COST OF MATERIALS USED. Total.	COST OF MATERIALS USED. Purchased in raw state	COST OF MATERIALS USED. Purchased in partially manufactured form.	COST OF MATERIALS USED. Fuel, freight, etc.	Value of products, including custom work and repairing.
Total	380	$2,440,958	412	2,250	$1,391,471	$180,131	$1,897,184	$458,676	$1,332,399	$106,109	$4,324,752
Hand trades[1]	133	168,595	153	278	201,374	48,214	362,372	900	348,200	13,272	807,934
Governmental establishments	5	14,905	------	6	4,380	450	8,105	5,356	1,816	933	11,853
Establishments with a product of less than $500	41	14,618	40	3	951	1,149	3,630	121	3,509	------	11,659
All other establishments	196	2,242,840	219	1,963	1,184,766	130,318	1,523,077	452,299	978,874	91,904	3,493,306

[1] Includes bicycle and tricycle repairing, 5; blacksmithing and wheelwrighting, 30; boots and shoes, custom work and repairing, 18; carpentering, 19; clothing, men's, custom work and repairing, 17; clothing, women's, dressmaking, 3; furniture, cabinetmaking, repairing, and upholstering, 3; lock and gun smithing, 2; masonry, brick and stone, 3; millinery, custom work, 10; painting, house, sign, etc., 5; plastering and stuccowork, 2; plumbing, and gas and steam fitting, 7; taxidermy, 1; watch, clock, and jewelry repairing, 13.

Of the 380 establishments of all classes shown in this table, 179, or 47.1 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $819,593, or only 19 per cent of the total value of the products of the state.

In addition to the 380 active establishments in the state during the census year, with a capital of $2,440,958, shown in Table 2, there were 3 idle establishments with a capital of $60,850.

Table 3 presents the totals for the manufacturing industries of the cities withdrawn from the enumerators, and places them in comparison with the totals for the entire state and the state exclusive of these cities.

TABLE 3.—URBAN MANUFACTURES.

	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.
Total for state	334	$2,411,435	372	2,241	$1,386,140	$178,532	$1,885,449	$4,301,240
Total for urban manufactures	100	968,576	103	979	682,102	100,798	853,976	1,898,365
Cheyenne	71	645,105	79	589	474,111	71,546	542,428	1,254,074
Laramie	29	323,471	24	390	207,991	29,252	311,548	644,291
Total for state exclusive of urban manufactures	234	1,442,859	269	1,262	704,038	77,734	1,031,473	2,402,875
Per cent of urban manufactures to total for state	29.9	40.2	27.7	43.7	49.2	56.5	45.3	44.1

Of the 334 establishments in the state, 100, or 29.9 per cent, were located in these 2 cities. They furnished employment to 979 wage-earners, or 43.7 per cent of the total number, and the value of their products, $1,898,365, formed 44.1 per cent of the total for the state.

Table 4 shows the totals for the state by counties.

Table 5 shows the totals for the state by specified industries.

Table 6 shows the totals for all industries in the cities withdrawn from the enumerators.

TABLE 4.—MANUFACTURES

[1] The difference between the totals stated in the table for 1880 and those published in the reports of the Tenth Census is caused by the elimination of data which was duplicated in the Tenth Census under the head of "Mixed Textiles," such data having been also included in the totals of that census for the different branches of the textile industries.

CITIES SHOWN SEPARATELY FOR 1880, 1890, AND 1900.

omitted for 1880 were not reported separately at that census.]

AVERAGE NUMBER OF WAGE-EARNERS AND TOTAL WAGES—continued.				MISCELLANEOUS EXPENSES.					COST OF MATERIALS USED.			Value of products, including custom work and repairing.	
Women, 16 years and over.		Children, under 16 years.											
Average number.	Wages.	Average number.	Wages.	Total.	Rent of works.	Taxes, not including internal revenue.	Rent of offices, interest, etc.	Contract work.	Total.	Principal materials, including mill supplies and freight.	Fuel and rent of power and heat.

[1] The difference between the totals stated in the table for 1880 and those published in the reports of the Tenth Census is caused by the elimination of data which was duplicated in the Tenth Census under the head of "Mixed Textiles," such data having been also included in the totals of that census for the different branches of the textile industries.

CITIES SHOWN SEPARATELY FOR 1880, 1890, AND 1900—Continued.

AVERAGE NUMBER OF WAGE-EARNERS AND TOTAL WAGES—continued.				MISCELLANEOUS EXPENSES.					COST OF MATERIALS USED.			Value of products, including custom work and repairing.	
Women, 16 years and over.		Children, under 16 years.		Total.	Rent of works.	Taxes, not including internal revenue.	Rent of offices, interest, etc.	Contract work.	Total.	Principal materials, including mill supplies and freight.	Fuel and rent of power and heat.		
Average number.	Wages.	Average number.	Wages.

TABLE 4.—SUMMARY OF STATISTICS FOR 73 SELECTED INDUSTRIES IN 209 PRINCIPAL CITIES, BY INDUSTRIES: 1900.

MANUFACTURING AND MECHANICAL INDUSTRIES.	Number of establishments.	Capital.	SALARIED OFFICIALS, CLERKS, ETC.		AVERAGE NUMBER OF WAGE-EARNERS AND TOTAL WAGES.					Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.
					Total.		Average number.					
			Number.	Salaries.	Average number.	Wages.	Men, 16 years and over.	Women, 16 years and over.	Children, under 16 years.			
Total	62,241	$3,684,540,461	178,172	$194,192,202	2,052,631	$937,320,561	1,495,760	494,404	62,467	$537,619,795	$2,862,832,280	$5,158,219,448
Agricultural implements	178	90,941,833	7,089	5,606,902	26,416	13,102,718	26,114	180	122	7,396,539	25,860,456	59,130,503
Awnings, tents, and sails	658	3,991,275	433	338,929	3,993	1,868,946	2,300	1,665	28	493,219	6,100,039	10,957,475
Bags, other than paper	71	7,531,252	336	381,151	3,533	1,076,569	1,237	2,144	152	528,974	16,659,051	19,827,017
